In this shocking exposé, two government fraud experts reveal how private contractors have put the lives of countless American soldiers on the line while damaging our strategic interests and our image abroad. From the shameful war profiteering of companies like Halliburton/KBR to the sinister influence that corporate lobbyists have on American foreign policy, Dina Rasor and Robert H. Bauman paint a disturbing picture. Here they give the inside story on troops forced to subsist on little food and contaminated water, on officers afraid to lodge complaints because of Halliburton's political clout, on millions of dollars in contractors' bogus claims that are funded by American taxpayers. Drawing on exclusive sources within government and the military, the authors show how money and power have conspired to undermine our fighting forces and threaten the security of our country.

This special edition of Greg Mankiw's intermediate macroeconomics textbook takes the same approach that made the parent text a bestseller, but with coverage shaped to address fiscal policy, monetary/exchange-rate policy, deficit reduction, and other critical economic issues from the uniquely Canadian perspective. Like Mankiw's *Macroeconomics*, the Canadian edition teaches fundamentals by relating theoretical concepts to big issues and policy debates, but illustrates those ideas and discussions with examples and cases from Canada, as well as research by Canadian economists.

Physics Independently Published

Foreword by Michael Shermer, Publisher of Sceptic Magazine and Monthly Columnist for Scientific American Stenger confronts mainstream theologians and New Age gurus-anyone who tries to link physics to mysticism. He takes their theories seriously enough to examine them in detail and he finds that, so far, none of them live up to the standards of scientific truth. As we accompany him on his investigation, he guides us through the most important concepts in modern physics from relativity to string theory. The world has needed a book like this for a long time. If you care about scientific literacy, *Quantum Gods* is not optional.-GEOFF GILPIN, Author of *The Maharishi Effect: A Personal Journey Through the Movement That Transformed American Spirituality* Physics has developed a reputation of providing support for all sorts of supernatural beliefs, from old-fashioned religions to New Age ideas. Quantum physics, especially, seems to mean 'magic' for too many people. ... Be grateful for the work of Victor Stenger, who is one of the best for diligently separating real physics from popular misconceptions.... Everyone interested in debates over physics and the supernatural should read this book.-TANER EDIS, Associate Professor of Physics, Truman State University; Author of *The Ghost in the Universe and Science and Nonbelief* Does quantum mechanics show a connection between the human mind and the cosmos? Are our brains tuned into a cosmic consciousness that pervades the universe enabling us to make our own reality? Do quantum mechanics and chaos theory provide a place for God to act in the world without violating natural laws? Many popular books make such claims and argue that key developments in twentieth-century physics, such as the uncertainty principle and the butterfly effect, support the notion that God or a universal mind acts upon material reality. Physicist Victor J. Stenger examines these contentions in this carefully reasoned and incisive analysis of popular theories that seek to link spirituality to physics. Throughout the book Stenger alternates his discussions of popular spirituality with a survey of what the findings of twentieth-century physics actually mean. Thus he offers the reader a useful synopsis of contemporary religious ideas as well as basic but sophisticated physics presented in layperson's terms (without equations). Of particular interest in this book is Stenger's discussion of a new kind of deism, which proposes a God who creates a universe with many possible pathways determined by chance, but otherwise does not interfere with the physical world or the lives of humans. Although it is possible, says Stenger, to conceive of such a God who plays dice with the universe and leaves no trace of his role as prime mover, such a God is a far cry from traditional religious ideas of God and, in effect, may as well not exist. Like his bestselling book, *God: The Failed Hypothesis*, this new work presents a rigorously argued challenge to many popular notions of God and spirituality. Victor Stenger (Lafayette, CO) is adjunct professor of philosophy at the University of

Colorado and emeritus professor of physics and astronomy at the University of Hawaii. He is the author of the New York Times bestseller *God: The Failed Hypothesis*, and many other books, including *Has Science Found God?*, *The Comprehensible Cosmos*, *Timeless Reality*, *The Unconscious Quantum*, and *Physics and Psychics*.

Without the close, there is no sale. Pretty obvious, right? Yet, for many salespeople, closing is the most baffling and elusive part of the selling process. All too often, salespeople meet qualified clients and charm them with an eloquent presentation, only to see the sale mysteriously slip from between their fingers in the end. Which is sad when you consider all the hard work – the prospecting, preparation, planning, and practice – done for the sake of a moment of truth that never arrives. Fortunately, closing is an art that can be mastered, and now *Sales Closing For*

Dummies shows you how. Packed with powerful principles that can help you become a top-producing salesperson, *Sales Closing For Dummies* is the ultimate guide to mastering that most mysterious part of the selling equation. Tom Hopkins, the legendary sales genius who, by age 30 was the nation's leading real-estate trainer, demystifies closing and shows what it takes to be a champion closer, including how to: Lead a sale without being pushy Read the signs of an interested potential buyer Use questioning methods that close sales, time and again Help clients feel good about their buying decisions Keep your clients' business and build their loyalty Build long-term relationships and watch your sales grow With the help of dozens of real-life examples from a wide cross section of industries, Tom shows why professional selling is about communication, not coercion. And he shares his considerable insight and experience on: Verbal and visual buying cues and how to recognize them Choosing the best location for closing Addressing concerns and creating a sense of urgency Time-tested tactics and strategies for ending customer procrastination, overcoming their fear, closing from a distance, and more The ten biggest closing mistakes and how to avoid them Add-on selling and other ways of getting your clients to help you to build your business Featuring Tom's Hopkins' trademark "Red Flag" key points and situation scripts, this fun, easy-to-understand guide arms you with the hands-on tools and techniques you'll need to become a world-class closer.

Do you wonder how movies – sequences of static frames – appear to move, or why 3-D films look different from traditional movies? Why does ventriloquism work, and why can airliner flights make you feel disoriented? The answers to these and other questions about the human senses can be found within the pages of *Foundations of Sensation and Perception*. This third edition maintains the standard for clarity and accessibility combined with rigor which was set in previous editions, making it suitable for a wide range of students. As in the previous editions, the early chapters allow students to grasp fundamental principles in relation to the relatively simple sensory systems (smell, taste, touch and balance) before moving on to more complex material in hearing and vision. The text has been extensively updated, and this new edition includes: a new chapter devoted to attention and perception over 200 new references over 30 new figures and improved, more colorful, visual presentation a new companion website with a range of resources for students and lecturers The book contains a range of pedagogical features, including tutorial sections at the end of each chapter. This distinctive feature introduces areas of the subject which are rarely included in student texts, but are crucial for establishing a firm foundation of knowledge. Some tutorials are devoted to more advanced and technical topics (optics, light measurement, Bayesian inference), but treated in an accessible manner, while others cover topics a little outside of the mainstream (music perception, consciousness, visual art). *Foundations of Sensation and Perception* will enable the reader to achieve a firm grasp of current knowledge concerning the processes that underlie our perception of the world and will be an invaluable resource for those studying psychology, neuroscience, and related disciplines.

In this *Good and Beautiful Series* book, James Bryan Smith helps us know how to live in relationship with others as apprentices of Jesus. "Apprentices of Jesus are not part-time do-gooders," he writes. "They live in continuous contact with the kingdom of God, and are constantly men and women in whom Christ dwells. They do not sometimes tell the truth, sometimes live sacrificially or sometimes forgive. There are myriad opportunities for us to impact the world in which we live." Yet many times we've gotten it wrong, tending to emphasize personal faith over social justice or vice versa. In these pages Jim Smith shows us how to bring spiritual formation and community engagement together, and then once again offers spiritual practices that root new, true narratives about God and the world in our souls. His insight and humility as a fellow learner with us will lead us to live in authentic ways as a good and beautiful community of Christ-followers, shining the light of the Spirit into every relationship. The *Good and Beautiful Series* includes four essential discipleship books from James Bryan Smith. Work through these proven Bible study resources individually or with a group to learn who God is, what it

means to be a Christian, how to live in community, and how to address toxic self-narratives that hinder spiritual growth.
