Multiliteracies in International Educational Contexts: Towards Education Justice examines how multiliteracies and Learning by Design have been taken up across international second-language instructional contexts, with a focus on inclusive practices and social justice. This edited collection brings together a team of international contributors to offer a global perspective on the application of multiliteracies in L2 education. Through the analysis of classroom-based qualitative and quantitative data on different aspects of the multiliteracies pedagogy, the book shows how the multiliteracies pedagogy can facilitate more inclusive practices while providing suggestions for pedagogical interventions and future research. This book will be a key resource for language educators, researchers, and practitioners interested in the multiliteracies pedagogy, as well as those interested in critical and social justice approaches to language teaching.

La educación psicomotora, inspirada en las nociones de unidad funcional, aporta nuevos medios de proceder que influyen hoy todos los aspectos pedagógicos. A. MAIGRE y J. DESTROOPER analizan y describen aquí magistral y asequeblemente este positivo enfoque, superando el modelo descriptivo y realizando, en verdad, una obra original. La matemática moderna y la escuela activa, así como la

filosofía educativa de hoy, armonizan en un todo coherente -la educación total- con la dimensión corporal del ser. Este nuevo camino, audaz y realista, hará impacto en los próximos y futuros desarrollos de la educación.
