### Conoscersi con l'Enneagramma Basic Books

Il presente Glossario nasce dalla necessità di far chiarezza sui concetti base della linguistica forense, disciplina di intersezione tra i saperi umanistici e le scienze forensi. L'obiettivo principale dell'opera è la conciliazione ermeneutica, alla base ogni collaborazione interdisciplinare tra studiosi di diversa provenienza e formazione: si vogliono rendere comprensibili - senza banalizzazione alcuna - i principali concetti linguistico-filologici agli operatori forensi, e far sì che le basi delle scienze forensi - indispensabili alla disciplina - siano altrettanto chiare agli umanisti.

### Clinical Psycho-Oncology John Wiley & Sons

"The fifth edition of this highly successful text, An Introduction to Social Psychology has been fully revised and updated. Accessibility for students has been improved, including better illustrations, greater use of colour and a more approachable format, as well as a wealth of online resources. Combining its traditional academic rigour with a contemporary level of cohesion, accessibility, pedagogy and instructor support, the fifth edition of An Introduction to Social Psychology provides the definitive treatment of social psychology"--

This book analyzes and discusses in detail art therapy, a specific tool used to sustain health in affective developments, rehabilitation, motor skills and cognitive functions. Art therapy is based on the assumption that the process of making art (music, dance, painting) sparks emotions and enhances brain activity. Art therapy is used to encourage personal growth, facilitate particular brain areas or activity patterns, and improve neural connectivity. Treating neurological diseases using artistic strategies offers us a unique option for engaging brain structural networks that enhance the brain's ability to form new connections. Based on brain plasticity, art therapy has the potential to increase our repertoire for treating neurological diseases. Neural substrates are the basis of complex emotions relative to art experiences, and involve a widespread activation of cognitive and motor systems. Accordingly, art therapy has the capacity to modulate behavior, cognition, attention and movement. In this context, art therapy can offer effective tools for improving general well-being, quality of life and motivation in connection with neurological diseases. The book discusses art therapy as a potential group of techniques for the treatment of neurological disturbances and approaches the relationship between humanistic disciplines and neurology from a holistic perspective, reflecting the growing interest in this interconnection.

Ernesto Macaro brings together a wealth of research on the rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Guangwei Hu, National Institute of Education, Singapore Additional online resources are available at [www.oup.com/elt/teacher/emi](http://www.oup.com/elt/teacher/emi) Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university. ### Neuroscienze della narrazione Walter de Gruyter

The first comprehensive, fully-illustrated approach to the voice that explains the anatomy and mechanics in detailed yet down-to-earth terms, for voice users and professionals of all kinds This book is the first to explain, in clear and concise language, the anatomy and mechanics of the mysterious and complex bodily system we call the voice. Beautifully illustrated with more than 100 detailed images, Anatomy of the Voice guides voice teachers and students, vocal coaches, professional singers and actors, and anyone interested in the voice through the complex landscape of breathing, larynx, throat, face, and jaw. Theodore Dimon, an internationally recognized authority on the subject, as well as an expert in the Alexander Technique, makes unfamiliar terrain accessible and digestible by describing each vocal system in short, manageable sections and explaining complex terminology. The topics he covers include ribs, diaphragm, and muscles of breathing; the intrinsic musculature of the larynx, its structure and action; the suspensory muscles of the throat; the face and jaw; the tongue and palate; and the evolution and function of the larynx.

### Theoretical Basis for Nursing Mimesis

What is it about the human mind that accounts for the fact that we can speak and understand a language? Why can't other creatures do the same? And what does this tell us about the rest of human abilities? Recent dramatic discoveries in linguistics and psychology provide intriguing answers to these age-old mysteries. In this fascinating book, Ray Jackendoff emphasizes the grammatical commonalities across languages, both spoken and signed, and discusses the implications for our understanding of language acquisition and loss.

### Helga's Diary: A Young Girl's Account of Life in a Concentration Camp W. W. Norton & Company

"The key to health is on your face and in your hands" This book presents a self-care method unique in its genre, which offers extraordinary, sometimes amazing and often immediate results for all kinds of disharmony in the body. The method began life in 1980s Vietnam - like many important discoveries, a result of war and necessity - independent of resource availability. It was developed by a group of acupuncturists to put healing in the hands of the masses by replacing needles with equally effective blunt rounded tools. It is the most recent reflexology on the planet and has nothing to do with other oriental techniques related to the face. Today 'Dien Chan' is a popular and accepted method of healthcare in its home country and part of their official system. However, it is the work of two self declared Italian 'free-sprits', over the past twenty years, which has suitably translated the technique and advanced it to meet the needs of modern Westerners. No longer a painful stimulation of pre-defined points; it has evolved to a relaxing massage of zones and individual, personalised points. 'Dien Chan Zone' incorporates simplified principles and teachings of Traditional Chinese Medicine, protocols for allergies and intolerances, a unique Facial-Cranial reflexology and a beauty treatment to tone muscle and regulate skin function. It is the authors' overriding intention to facilitate learning and to make this method accessible to everyone. In this book they share full instructions for self-treatment which they know present a great frontier of freedom, and the medicine of the future. Contains 95 full colour maps Beatrice Moricoli, founder of S.I.R.F.A./A.I.R.F.I. in Milan, is the first female teacher of Dien Chan (Zone) in Italy, but for many years has practiced also as a therapist and teacher of Reiki, Shiatsu, Tui Na, Chinese Medicine and 'The Blowing Technique'. Vittorio Bergagnini, founder of S.I.R.F.A./A.I.R.F.I. in Milan, is a teacher of Dien Chan Zone as well as Tai Chi Chuan, Reiki, Foot Reflexology and Wung Chun.

Manuale di copywriting e scrittura per i social offre una risposta teorico-pratica alle domande quotidiane di migliaia di persone che ogni giorno lavorano con Facebook, Instagram, LinkedIn e gli altri social, andando a colmare una lacuna nella manualistica italiana dedicata alla scrittura. Chi sono gli utenti e come ottenere la loro attenzione? Quali sono gli obiettivi giusti e quali contenuti pubblicare per raggiungerli? Come si scrive un post o un'inserzione pubblicitaria? Come si progetta e realizza un meme o una sceneggiatura per un video? Come si deve scrivere una didascalia o una biografia per Instagram? Rispondendo a tutti questi interrogativi, il manuale è di fatto una guida indispensabile, ricca di consigli, esempi e tecniche sperimentate, per chiunque lavori con i social, per le aziende e le agenzie di comunicazione o come freelance.

Che cosa hanno scoperto le neuroscienze riguardo le narrazioni? È possibile manipolare le persone con nuovi e più pericolosi strumenti di propaganda? Il binomio neuroscienze-intelligenza artificiale cambierà lo storytelling, e se sì, in che modo? Quali saranno gli effetti sul lavoro di scrittori, content creator, giornalisti, educatori, artisti, manager e, in generale, di coloro che ogni giorno hanno a che fare con le storie? Esiste il rischio di un nuovo conformismo tecnologico che possa appiattire l'informazione, la letteratura e le arti? Scritto con l'intento di rispondere a questi e altri interrogativi, "Neuroscienze della narrazione" inquadra in maniera chiara, dettagliata e precisa l'impatto delle ultime tecnologie e scoperte scientifiche su narrazioni e storytelling, analizzandone sia i rischi sia le possibilità. Chi scrive storie - ma anche chi vuole leggerle con un occhio critico - troverà in questo libro un indispensabile supporto per capirne i meccanismi, la potenza e i condizionamenti.

Le lingue della malattia. Seconda serie raccoglie interventi di teoria e storia dei principi linguistico-medici e clinici, saggi di lingua della medicina e della malattia e una sezione dedicata a esperienze e riflessioni intorno alla medicina e alle patologie; quest'ultimo gruppo di scritti, di carattere non scientifico, è centrale nell'economia e nell'ideologia che fonda il lavoro: senza una consapevolezza

profonda dell'unicità delle esperienze soggettive, a contatto o nella malattia, la linguistica non può che intercettare variabili inessenziali e increspature di superficie.

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.

La linguistica cognitiva, prospettiva recente e innovativa in una ricchissima tradizione di studi sul linguaggio, estende la sua analisi ai meccanismi cognitivi che stanno alla base della struttura della lingua e del comportamento linguistico, evidenziando i processi di acquisizione, elaborazione, produzione e comprensione della conoscenza, tramite pensiero, esperienza e sensi. Carla Bazzanella esplora questo variegato territorio, dai confini non nettamente definiti, selezionando prospettive generali e delineando mappe orientative. Nel volume troveremo i temi centrali della disciplina, come categorizzazione, concettualizzazione, metafora, spazio, e le connessioni e gli intrecci con le neuroscienze, con particolare riferimento a tematiche quali l'attenzione e la memoria.
