Nature

This book is the first to give a comprehensive and detailed overview of the complete geography of Albania in

English. It highlights the most important and manifold potentials of nature, society and economy of Albania as well as development problems during different time periods. One focus lies on Albania's perspectives and challenges for the future. Beside natural aspects also topics such as migration, poverty, social situation, economy, urban development, regional disparities among others are discussed. This book appeals to academics and researchers of geography, regional development and related disciplines as well as teachers and students of geography, geology, natural sciences, social sciences, economics. The book is also attractive for media representatives, tourists and other interested individuals travelling to Albania.

Politika Ballkanike e Ruisë dhe çështja shqiptare Springer Science & Business Media

A comprehensive source book for anybody interested in the potential of remote sensing and GIS technology for the Eastern Europe countries in transition, and less developed countries in general. Leading experts from Europe, Canada and the USA cover a wide variety of applications, from the provision of satellite data to land, water and atmosphere planning issues. The individual contributions present a nice balance between theory and proved application methods. The book is suitable for a wide spectrum of readers, such as graduate students of the environmental and geo sciences, teachers and professors, specialists at

various administrative levels, political decision makers and policy makers, and technical aid GOs and NGOs.
