A manual for Mindful

Focusing, a new integration of Eastern and Western techniques for accessing your inherent wisdom. Ever come up against one of those moments when life requires a response—and you feel clueless? We all have. But there's good news: you have all the wisdom you need to respond to any situation, even the "impossible" ones. It's a matter of tuning in to your felt sense: that subtle physical sensation that lives somewhere between your conscious and

subconscious mind and that can be accessed through Focusing, the well-known method developed by the psychologist Eugene Gendlin. David Rome's technique of Mindful Focusing unites Gendlin's method with Buddhist mindfulness practices to provide a wonderfully effective method for accessing your inherent answer to any question—and for responding honestly and creatively to the world around you. *History Alive!* Ready-Ed

A detailed chronology of the early, pre-Internet years of online information systems and services. Every field of history has a basic need for a detailed chronology of what happened: who did what when. In the absence of such a resource, fanciful accounts flourish. This book provides a rich narrative of the early development of online information retrieval systems and services, from 1963 to 1976—a

period important to anyone who uses a search engine, online catalog, or large database. Drawing on personal experience, extensive research, and interviews with many of the key participants, the book describes the individuals, projects, and institutions of the period. It also corrects many common errors and misconceptions and provides milestones for many of the significant developments in online systems and technology.
