Modern Art  
Le Corbusier's  
Modulor—a  
fundamental  
work in the  
history of

architecture—  
as a beautiful  
facsimile  
edition.

**Le Corbusier**  
Routledge  
This revised  
and updated  
edition looks  
anew at the  
respective  
merits of two  
giants of  
modern

architecture.  
As well as  
featuring  
writings by  
the architects  
themselves,  
the book  
illustrates the  
evolution of  
the work of  
Loos and Le  
Corbusier,  
with detailed  
reference to

their domestic projects, ranging from the Strasser House (1919) to the Last House (1932), and from Maison Domino (1915) to Villa Savoye (1932).

**The Villa Savoye**

Birkhäuser  
This collection of an important architectural theorist's essays considers and compares designs by Palladio and Le Corbusier, discusses mannerism and modern architecture, architectural

vocabulary in the 19th century, the architecture of Chicago, neoclassicism and modern architecture, and the architecture of utopia.

*The Tectonics of Structural Systems W.*

W. Norton & Company  
Coinciding with the 50th anniversary of his death (August 27, 2015), one of Le Corbusier's most significant books becomes available again in English. We are doing a reprint of MIT

Press's first edition of 1991, which again is based on the original French version of 1930, with an introduction added by the author in 1960. While the MIT Press version had black-and-white illustrations throughout, Park Books' new edition features some of Le Corbusier's drawings in color as they were in the earlier French editions. A new essay by British scholar Tim Benton, written for this

new edition, contextualizes the book within Le Corbusier's oeuvre and comments on its lasting significance. An also new appendix explains specialist terms and provides background information on persons and historic events no longer necessarily known to a younger generation of architects. The Precisions, as the book is known commonly, emerged from a spontaneous

and exuberant series of 10 lectures Le Corbusier gave in Buenos Aires during the fall of 1929. As he spoke, Le Corbusier improvised drawings on large sheets of paper with crayons. While similar drawings appear in other works, here all the lectures and images appear in their original context as Le Corbusier assembled them more than 80 years ago. The texts reflect a new maturity in Le

Corbusier's thinking and an extreme confidence in the development of his ideas. The drawings and lectures are unique in their eloquent and concise summary of his philosophy of architecture and urban design, stating the principles that informed his work from the 1920s on. They contain some of his most compelling aphorisms, both verbal and visual, covering technique as the basis of architecture,

the human scale in design, furniture, the private house, apartments and office buildings, the city, the League of Nations competition, teaching architecture, and a splendid analysis of the transformation of his own work in houses from La Roche-Jeanneret to the Villa Savoye. [Based on MIT Press's copy for their 1991 edition] Le Corbusier. The Villa Savoye Routledge

The Tectonics of Structural Systems provides an architectural approach to the theory of structural systems. The book combines: structural recommendations to follow during the architectural design of various structural systems and the tectonic treatment of structural recommendations in architecture. Written expressly for students, the book makes structures understandable

and useful, providing: practical and useful knowledge about structures a design based approach to the subject of structures and a bridge in the gap between structures and the theory of design. Good architectural examples for each structural system are given in order to demonstrate that tectonics can be achieved by applying technical knowledge about structures.

Over 300 illustrations visually unpack the topics being explained, making the book ideal for the visual learner. *Raumplan versus Plan Libre* Houghton Mifflin Harcourt Die kompromisslose klare Bauweise macht die 1931 fertig gestellte Villa Savoye von Le Corbusier zu einer unverwechselbaren Ikone in der Architektur des 20. Jahrhunderts.

Andre Malraux stellte sie denn auch 1964 unter Denkmalschutz. In diesem Guide wird sie anhand historischer Dokumente und neuer Aufnahmen sowohl dem Besucher vor dem architekturinteressierten Leser zuhause umfassend vorgestellt." *Le Corbusier, 1887-1965* Birkhäuser La Villa La Roche et la Villa Jeanneret, construites côte à côte, sont désignées,

selon les auteurs, tantôt comme un seul, tantôt comme deux bâtiments. Architectural Excellence in Islamic Societies Springer Science & Business Media The villas of the 1920s in and around Paris, including such modern classics as the Villa La Roche-Jeanneret in the Auteuil district of Paris, the Villa Stein-de Monzie in Garches, and the Villa Savoye in Poissy,

constituted a radically new orientation for architecture that have made them central points of reference for all subsequent generations of architects right up to the present. This standard work, long out of print, reveals the design processes behind these icons of modernism, from the first idea to the occupation of the homes, and sheds light on the steps and contexts of daily work. It

measures the concept of modern architecture against the built reality, and enables us to rediscover the architect Le Corbusier behind the myth. The continuing relevance of Le Corbusier's oeuvre today is underscored by the extensive exhibition "Le Corbusier: The Art of Architecture", organized by the Vitra Design Museum in collaboration with the Netherlands Architecture

Institute, the Royal Institute of British Architects and the Fondation Le Corbusier. The author, Tim Benton, is recognised as a leading expert on Le Corbusier and one of the most important art historians worldwide. He now teaches at the Open University, Great Britain's largest university. Die in den zwanziger Jahren in und um Paris entstandenen Villen, unter ihnen Klassiker der Moderne wie

die Villa La Roche-Jeanneret im Pariser Stadtteil Auteuil, die Villa Stein-de Monzie in Garches und die Villa Savoye in Poissy, wurden mit ihrer radikalen architektonischen Neuorientierung zu zentralen Bezugspunkten für alle folgenden Architektengenerationen, bis in die Gegenwart. Fernab jeder Heldenverehrung zeigt das Buch die Entwurfsprozesse hinter diesen Ikonen der Moderne, von der ersten Idee bis zum Bezug der Häuser, und beleuchtet die alltäglichen Arbeitsschritte und -beziehungen. Es misst das Ideal der neuen Architektur an der gebauten Wirklichkeit und erlaubt es, den Architekten Le Corbusier hinter dem Mythos neu zu entdecken. Der Autor Tim Benton gehört zu den weltweit bedeutendsten Kunsthistorikern. Er lehrt heute an der Open University, der größten Universität Großbritanniens und gilt als führender Kenner Le Corbusiers. Die Aktualität des Werks von Le Corbusier wird im Jahr der Neuausgabe dieses Klassikers auch von der umfassenden Ausstellung Le Corbusier - The Art of Architecture des Vitra Design Museums in Zusammenarbeit mit dem Niederländischen Architekturinstitut

itut und dem Royal Institute of British Architects unterstrichen. **The Villas of Le Corbusier and Pierre Jeanneret 1920-1930** Birkhäuser Le Corbusier (1887-1965) was the most significant architect of the twentieth century. Every architecture student examines the Swiss master's work. Yet, all too frequently, they rely on reproductions of faded drawings of uneven size and quality. Le Corbusier Redrawn

presents the only collection of consistently rendered original drawings (at 1:200 scale) of all twenty-six of Le Corbusier's residential works. Using the original drawings from the Le Corbusier Foundation's digital archives, architect Steven Park has beautifully redrawn 130 perspectival sections, as well as plans, sections, and elevations of exterior forms and interior spaces. These remarkable

new drawings- which combine the conceptual clarity of the section with the spatial qualities of the perspective- not only provide information about the buildings, they also help students experience specific works spatially as they learn to critically examine Le Corbusier's works. *The Le Corbusier Guide* 010 Publishers The book describes the story of

Clarté, Le Corbusier's first apartment building, continuing the narrative into the 21st century. The steel skeleton building completed in Geneva in 1930/1932 is a prototype of the Moderne style and a precursor of the Unité d'Habitation. The building was neglected for many decades and not listed as a historic building until the 1990s. In 2007 the external envelope was repaired as

the first step, followed by refurbishment of the interior, in which building preservation requirements were taken into account in an exemplary manner. The building log book by the architects and structural engineers is illustrated with numerous new and historic drawings and photographs, and has been supplemented with an account of the building's history. The renovated building is presented in

large photographs. **Le Corbusier, Paris - Chandigarh** Taschen  
 Par son architecture d'une netteté absolue, la Villa Savoye achevée par Le Corbusier en 1931 est un emblème de l'architecture du XXe siècle reconnaissable entre mille. Elle réalise de manière subtile la fusion des « cinq points de la nouvelle architecture » : plan libre, fenêtre bandeau, façade libre,

pilotis et toit-terrasse. Tout en intégrant manifestement des éléments de l'architecture classique, elle fait partie des œuvres pionnières de l'architecture moderne. André Malraux la classa d'ailleurs monument historique en 1965. Avec des documents d'époque et des photographies récentes à l'appui, ce guide présente les nombreuses facettes de cette villa aussi bien au

visiteur qu'au lecteur amateur d'architecture. *Corbusier* Courier Corporation This book discusses architectural excellence in Islamic societies drawing on textual and visual materials, from the Aga Khan Documentation Center at MIT, developed over more than three decades. At the core of the discussion are the efforts, processes, and outcomes of the Aga

Khan Award for Architecture (AKAA). The AKAA recognises excellence in architectural and urban interventions within cities and settlements in the Islamic world which are continuously challenged by dramatic changes in economies, societies, political systems, decision-making, and environmental requirements. Architectural Excellence in Islamic Societies

responds to the recurring question about the need for architectural awards, arguing that they are critical to validating the achievements of professional architects while making their contributions more widely acknowledged by the public. Through analysis and critique of over sixty awarded and shortlisted projects from over thirty-five countries, this book provides an expansive look at the

history of the ACAA through a series of narratives on the enduring values of architecture, architectural and urban conservation, built environment sustainability, and architectural pluralism and multiple modernities. Architectural Excellence in Islamic Societies will appeal to professionals and academics, researchers, and upper-level students in architectural history and

theory and built environment related fields. *Le Corbusier and the Architectural Promenade* Birkhäuser With its uncompromising and clear construction, the Villa Savoye, completed in 1931, established Le Corbusier's reputation as an undisputed master of twentieth-century architecture. André Malraux placed it on the historic register in 1964. In this guide, historic documents

and new photographs provide an in-depth presentation both to visitors to the site and to interested readers at home.
