MCCARTHY MOHAMMED

Minefill 2020-2021 ANU Press

The current rapid rise of commodity prices comes at a critical moment, as European and U.S. economies stagger in their attempts to regain ground lost in the recent financial crisis. Facing mounting worries and anger from both policymakers and the public, regulators at the most recent G20 summit agreed to address commodity price volatility worldwide. They are bringing forward a number of proposals to improve the regulation, functioning, and transparency of commodity markets. This book collects the findings of a task force composed of financial and nonfinancial firms as well as regulators and academics. It sheds new light on price formation mechanisms in spot and future commodities markets and highlights key drivers of price formation in main commodities markets.

Tangled Up in Black Nicholas Brealey
"I enthusiastically endorse the fourth edition of IHRM. The editors are to be congratulated for recruiting the top-rated authors in this field to contribute to this volume. The chapters are up to date, insightful, and sometimes even provocative. Students, including post-grads and advanced undergraduates, as well as savvy practitioners, will benefit from reading this volume." Neal M. Ashkanasy, Professor of Management, The University of Queensland Anne-Wil Harzing and Ashly Pinnington's bestselling textbook has guided thousands of students through their International Human Resource Management studies. The fourth edition retains the critical edge, academic rigour and breadth of coverage which have established this book as the most authoritative text on the market. The new edition by our international team of experts provides an even more stimulating journey through the core curriculum, contemporary debates and emerging issues in IHRM. New for the fourth edition: Reduced number of chapters to allow for greater depth and an improved structure

ensuring fundamental topics underpin your knowledge Expanded coverage of Equality and Diversity, Corporate Social Responsibility and Sustainability and Cross-Cultural Management in line with developments in the field New Stop and Reflect feature provides an opportunity to test your understanding at regular intervals This text comes with access to a companion website containing web links, SAGE journal articles and more.

The King of Oil SAGE

Robert M. Grant combines a highly accessible writing style with a concentration on the fundamentals of value creation and an emphasis on practicality in this leading strategy text. In this new edition several topics have increased emphasis including: platform-based competition and 'ecosystems' of related industries; the role of strategy making processes/practices; mergers, acquisitions and alliances; and additional emphasis on strategy implementation.

Critical Metals Handbook Athabasca University Press

Mankind is using a greater variety of metals in greater quantities than ever before. As a result there is increasing global concern over the long-term availability of secure and adequate supplies of the metals needed by society. Critical metals, which are those of growing economic importance that might be susceptible to future scarcity, are a particular worry. For many of these we have little information on how they are concentrated in the Earth's crust, how to extract them from their ores, and how to use, recycle and dispose of them effectively and safely. Published with the British Geological Survey, the **Critical Metals Handbook** brings together a wealth of knowledge on critical metals and provides a foundation for improving the future security and sustainability of critical metal supplies. Written by international experts, it provides a unique source of authoritative information on diverse aspects of the critical metals, including geology, deposits, processing, applications, recycling, environmental issues and markets. It is aimed at a

broad non-specialist audience, including professionals and academics working in the exploration and mining sectors, in mining finance and investment, and in mineral processing and manufacturing. It will also be a valuable reference for policy makers concerned with resource management, land-use planning, eco-efficiency, recycling and related fields.

Critical Mineral Resources of the United States John Wiley & Sons

Corporate Governance Matters gives corporate board members, officers, directors, and other stakeholders the full spectrum of knowledge they need to implement and sustain superior governance. Authored by two leading experts, this comprehensive reference thoroughly addresses every component of governance. The authors carefully synthesize current academic and professional research, summarizing what is known, what is unknown, and where the evidence remains inconclusive. Along the way, they illuminate many key topics overlooked in previous books on the subject. Coverage includes: International corporate governance. Compensation, equity ownership, incentives, and the labor market for CEOs. Optimal board structure, tradeoffs, and consequences. Governance, organizational strategy, business models, and risk management. Succession planning. Financial reporting and external audit. The market for corporate control. Roles of institutional and activist shareholders. Governance ratings. The authors offer models and frameworks demonstrating how the components of governance fit together, with concrete examples illustrating key points. Throughout, their balanced approach is focused strictly on two goals: to "get the story straight," and to provide useful tools for making better, more informed decisions.

The Meaning of the Mark CRC Press

The OECD Convention is the first major international treaty specifically to address 'supply-side bribery' by sanctioning the briber. The OECD Convention establishes an international standard for compliance with anti-corruption rules by 36 countries,

including the 30 OECD members and six non-member countries, with the leading OECD exporting countries receiving particular attention. This book is an article-by-article commentary which gives particular attention to the results of the OECD monitoring process as applied to state implementation. Companies in particular are at ever greater risk of legal and 'reputational' damage resulting from failure to comply with the anti-corruption standards set inter alia, by the OECD Convention. This book provides them with comprehensive guidance on the OECD standards. The commentary also constitutes a significant work of comparative criminal law. It is written and edited by persons who include experts involved in development of the Convention standards as well as academics and legal practitioners.

Mining in the Asia-Pacific John Wiley & Sons

Clement uses class analysis to explore the complexities of contemporary Canadian society in this revealing study. He also explores the relationship between class and gender, ethnicity and region, comparing illustrations from Canada with those from countries such as Sweden and the U.S. An extensive review of material on class in Canada is provided.

The Rise of the Female Executive Springer Nature

Billionaire oil trader Marc Rich for the first time talks at length about his private life (including his expensive divorce from wife Denise); his invention of the spot oil market, which made his fortune and changed the world economy; his lucrative and unpublicized dealings with Ayatollah Khomeini's Iran, Fidel Castro's Cuba, war-ravaged Angola, and apartheid South Africa; his quiet cooperation with the Israeli and U.S. governments (even after he was indicted for tax fraud by Rudy Guiliani) and near-comical attempts by U.S. officials to kidnap him illegally. This sure-to-make-headlines book is the first no-holds-barred biography of Rich, who was famously pardoned by Bill Clinton, and resurfaced in the news during the confirmation hearings of Attorney General Eric Holder. The King of Oil sheds stunning new light on one of the most controversial international businessmen of all time.

International Human Resource Management Springer

Provides a timely review of gender equality in the boardroom, and through interviews with mentors and mentees it illustrates how mentoring can play a part in helping women stay engaged in their career. This book includes international comparisons and an examination of the UK

and EU political environments.

The Indigenous World 2016 Open Road Media

A thorough introduction to corporate finance from a renowned professor of finance and banking As globalization redefines the field of corporate finance, international and domestic finance have become almost inseparably intertwined. It's increasingly difficult to understand what is happening in capital markets without a firm grasp of currency markets, the investment strategies of sovereign wealth funds, carry trade, and foreign exchange derivatives products.

International Corporate Finance offers thorough coverage of the international monetary climate, including Islamic finance, Asian banking, and cross-border mergers and acquisitions. Additionally, the book offers keen insight on global capital markets, equity markets, and bond markets, as well as foreign exchange risk management and how to forecast exchange rates. Offers a comprehensive discussion of the current state of international corporate finance Provides simple rules and pragmatic answers to key managerial questions and issues Includes case studies and real-world decision-making situations For anyone who wants to understand how finance works in today's hyper-connected global economy, International Corporate Finance is an insightful, practical guide to this complex subject.

Challenge of Class Analysis Geological Survey

Established in 1970, the PbZn symposium series is considered the leading international technical forum for the lead and zinc processing industries. The PbZn 2020 volume addresses all aspects of current processing technologies for primary and secondary lead and zinc, as well as emerging technologies for both metals.

Contemporary Strategy Analysis Blurb

Rapidly rising carbon emissions from the intense development of Western Canada's fossil fuels continue to aggravate the global climate emergency and destabilize democratic structures. The urgency of the situation demands not only scholarly understanding, but effective action. Regime of Obstruction aims to make visible the complex connections between corporate power and the extraction and use of carbon energy. Edited by William Carroll, this rigorous collection presents research findings from the first three years of the seven-year, SSHRC-funded partnership, the Corporate Mapping Project. Anchored in sociological and political theory, this comprehensive

volume provides hard data and empirical research that traces the power and influence of the fossil fuel industry through economics, politics, media, and higher education. Contributors demonstrate how corporations secure popular consent, and coopt, disorganize, or marginalize dissenting perspectives to position the fossil fuel industry as a national public good. They also investigate the difficult position of Indigenous communities who, while suffering the worst environmental and health impacts from carbon extraction, must fight for their land or participate in fossil capitalism to secure income and jobs. The volume concludes with a look at emergent forms of activism and resistance, spurred by the fact that a just energy transition is still feasible. This book provides essential context to the climate crisis and will transform discussions of energy democracy.

Contributions by Laurie Adkin, Angele Alook, Clifford Atleo, Emilia Belliveau-Thompson, John Bermingham, Paul Bowles, Gwendolyn Blue, Shannon Daub, Jessica Dempsey, Emily Eaton, Chuka Ejeckam, Simon Enoch, Nick Graham, Shane Gunster, Mark Hudson, Jouke Huizer, Ian Hussey, Emma Jackson, Michael Lang, James Lawson, Marc Lee, Fiona MacPhail, Alicia Massie, Kevin McCartney, Bob Neubauer, Eric Pineault, Lise Margaux Rajewicz, James Rowe, JP Sapinsky, Karena Shaw, and Zoe Yunker. Price Formation in Commodities Markets Cambridge University Press

Provides the latest data and analysis of foreign direct investment (FDI) and other activities of transnational corporations, as well as the policies to regulate them at the national and international levels. It aims to analyse the cross-border activities of translational corporations and related policy measures with a view to helping policy makers formulate appropriate policy responses.

Transnational Corporations John Wiley & Sons

This book provides the most comprehensive survey of mining activity and the principal challenges confronting the resources industry in the Asia-Pacific region today, and presents new theoretical and practical insights into the political and business risks faced by mining companies operating in the region from both academic and corporate perspectives. It focuses on the exploration, production and trade of the principal commodities coal, iron ore, uranium, oil and gas, and gold, as well as the emerging commodities unconventional gas and rare earth minerals, provides the reader with a valuable understanding of resource

activity in the region. In addition, it also integrates and draws attention to eight key issue areas which have the potential to pose significant risks, challenges and opportunities for the industry going forward, which include sustainable development, resource governance and economic contributions, declining ore grades and territorial expansion, community aspects of mining, mining and indigenous peoples, climate change, and impact assessment. The contributors to this volume are experts in their respective fields, and the diversity of voices makes this book a must read for scholars, industry participants, investors and policy-makers with an interest in mining in the Asia-Pacific.

Mergers, Acquisitions, and Corporate Restructurings FT Press

Based on his award-winning doctoral dissertation, Gary Foley chronicles the development of the Black Power Movement within the Australian Aboriginal community and the 1972 Aboriginal Embassy. Focussing on a specific and under-researched period that was crucial in Australian history, Foley challenges the prevailing academic understandings of this period and overturns many of the popular misconceptions. His research shows that as a participant and historian, an innovative approach can be found to reveal the achievements and legacy of Aboriginal activism. Foley's dissertation is a seminal piece of Australian political history, unique in its autobiographical approach, and steeped in academic practice. It was awarded a Chancellor's Prize for Excellence in the PhD thesis in the Humanities, Creative Arts and Social cluster at the University of Melbourne in 2014.

World Investment Report 2015

Cambridge University Press
Florence Thépot provides the first systematic account of the interaction between competition law and corporate governance. She challenges the 'black box' conception of the firm- or 'undertaking' - in competition law, as applied to increasingly complex corporate relations. The book opens the 'black box' of the firm to understand the internal drivers of collusive behaviour, and proposes a unified approach to cartel enforcement, based on the agency theory. It explores key issues including corporate compliance programmes, the attribution of

liability in corporate groups, and structural links between competitors, and should be read by anyone interested in how the evolution of the corporate landscape impacts competition law.

The OECD Convention on Bribery
Routledge

Today marks the release of the controversial book "Commodities: Switzerland's Most Dangerous Business". The fact-filled and groundbreaking analysis of the industry, as powerful as it is unknown, shows why resource-rich developing countries remain poor while Switzerland-based commodity companies rake in profits in the billions. And it illustrates the gray areas of a business model whose risks are becoming increasingly apparent. Unnoticed by the public and politicians, Switzerland has become the world's most important commodities hub. Trade in oil, gas, coal, metals and agricultural products - particularly via deals made in Geneva and Zug - has grown by an incredible 1,500 percent since 1998, according to BD investigations. The result: Seven of the twelve corporations with the highest turnover in Switzerland trade in, and/or mine, commodities. Switzerland has become a global commodity hub thanks to its mix of tax privileges, a strong financial sector, weak regulation and lax embargo policy. The Swiss commodities business is dangerous for developing countries that are blessed with natural resources but that suffer from weak governance. The business is life-threatening for all those who must live amid the filth and toxins of the mines and facilities. The extensive misery of entire countries and the fairytale wealth of a few Swiss top traders are causally related. The book "Commodities: Switzerland's Most Dangerous Business" shows how. The richly-illustrated reference work offers a portrait of the key firms and people behind the discreet deals, provides insight into the social and ecological consequences for the producing countries, analyzes the practices and repercussions of tax avoidance and speculation, and offers proposals for achieving more justice in a multi-billion-dollar business that affects everyone.

Large-scale Mines and Local-level Politics
Salis Verlag

Mainland China businesses are going global, transforming the country from a

manufacturing export platform into an overseas investment powerhouse. China Goes Global is the most thorough and up-to-date empirical analysis of the accelerating effort of Chinese companies to go global by investing overseas. It details the overall trends of this activity with respect to its sectors, channels, overseas targets, and particular firms, along the role of Chinese Government policy in facilitating business enterprise globalization. The book offers readers an enterprise level of view outward expansion by Chinese firms that is focused not only on the big-names, but also less well-known, but equally important trailblazing enterprises. In doing so it offers practical suggestions on how firms can tackle the challenges encountered when expanding outward.

Redefining Shareholder Value Springer

World Energy Outlook 2019 John Wiley & Sons

Despite the difference in their populations and political status, New Caledonia and Papua New Guinea have comparable levels of economic dependence on the extraction and export of mineral resources. For this reason, the costs and benefits of large-scale mining projects for indigenous communities has been a major political issue in both jurisdictions, and one that has come to be negotiated through multiple channels at different levels of political organisation. The 'resource boom' that took place in the early years of the current century has only served to intensify the political contests and conflicts that surround the distribution of social, economic and environmental costs and benefits between community members and other 'stakeholders' in the large-scale mining industry. However, the mutual isolation of Anglophone and Francophone scholars has formed a barrier to systematic comparison of the relationship between large-scale mines and local-level politics in Papua New Guinea and New Caledonia, despite their geographical proximity. This collection of essays represents an effort to overcome this barrier, but is also intended as a major contribution to the growth of academic and political debate about the social impact of the large-scale mining industry in Melanesia and beyond.
