In Evangelist Marketing, Alex Goldfayn

argues that technology companies succeed in spite of their marketing, not because of it. He says that if consumer tech makers ceased all marketing activity today, they would not see a significant decline in sales. In this book, Alex presents why the current state of

overly-technical, features-oriented tech marketing, branding, communications and public relations is costing the industry billions of dollars—easy money that's voluntarily being left on the table. Then he lays out a step-by-step system for creating intensely loyal brand evangelists based on deep consumer insights and simple, emotional language. *Evangelist Marketing* is written for consumer tech companies big and small—from PC manufacturers to Web-based services. It's also sure to improve the work of their marketing and public relations agencies.

Needs of the Fire Service Samuel French, Limited

A penetrating and insightful study of privacy and security in telecommunications for a post-9/11,

post-Patriot Act world.

Telecommunication has never been perfectly secure. The Cold War culture of recording devices in telephone receivers and bugged embassy offices has been succeeded by a post-9/11 world of NSA wiretaps and demands for data retention. Although the 1990s battle for individual and commercial freedom to use cryptography was won, growth in the use of cryptography has been slow. Meanwhile, regulations requiring that the computer and communication industries build spying into their systems for government convenience have increased rapidly. The application of the 1994 Communications Assistance for Law Enforcement Act has expanded beyond the intent of Congress to apply to voice over Internet Protocol (VoIP) and other

modern data services; attempts are being made to require ISPs to retain their data for years in case the government wants it; and data mining techniques developed for commercial marketing applications are being applied to widespread surveillance of the population. In *Privacy on the Line*, Whitfield Diffie and Susan Landau strip away the hype surrounding the policy debate over privacy to examine the national security, law enforcement, commercial, and civil liberties issues. They discuss the social function of privacy, how it underlies a democratic society, and what happens when it is lost. This updated and expanded edition revises their original--and prescient--discussions of both policy and technology in light of recent

controversies over NSA spying and other government threats to communications privacy.

For decades, James Joyce's modernism has overshadowed his Irishness, as his self-imposed exile and association with the high modernism of Europe's urban

centers has led critics to see him almost exclusively as a cosmopolitan figure. In Joyce's *Ghosts*, Luke Gibbons mounts a powerful argument that this view is mistaken: Joyce's Irishness is intrinsic to his modernism, informing his most distinctive literary experiments. Ireland, Gibbons shows, is not just a source of subject matter or content for Joyce, but of form itself. Joyce's stylistic innovations can be traced at least as much to the tragedies of Irish history as to the shock of European modernity, as he explores the incomplete project of inner life under colonialism. Joyce's language, Gibbons reveals, is haunted by ghosts, less concerned with the stream of consciousness than with a vernacular interior dialogue, the “shout in the street,” that gives room to outside

voices and shadowy presences, the disruptions of a late colonial culture in crisis. Showing us how memory under modernism breaks free of the nightmare of history, and how in doing so it gives birth to new forms, Gibbons forces us to think anew about Joyce's achievement and its foundations.

Tens of thousands of mechanical engineers are engaged in the design, building, upgrading, and optimization of various material handling facilities. The peculiarity of material handling is that there are numerous technical solutions to any problem. The engineer's personal selection of the optimal solution is as critical as the technical component. Michael Rivkin, Ph.D., draws on his decades of experience in design, construction, upgrading, optimization, troubleshooting, and maintenance throughout the world, to highlight topics such as:

- physical principles of various material handling systems;
- considerations in selecting technically efficient and environmentally friendly equipment;
- best practices in upgrading

and optimizing existing bulk material handling facilities; • strategies to select proper equipment in the early phases of a new project. Filled with graphs, charts, and case studies, the book also includes bulleted summaries to help mechanical engineers without a special background in material handling find optimal solutions to everyday problems.

National Petroleum News

In 2013, the film *American Hustle* was released. Its 1979 ABSCAM-inspired plot created renewed public interest in Larry Pressler, the South Dakota senator who was the only public official to turn down the illegal FBI bribe. He immediately reported the incident to the FBI. When Senator Pressler was told Walter Cronkite referred to him on the evening news as a "hero" he stated, "I do not

consider myself a hero... what have we come to if turning down a bribe is 'heroic'?" Capitalizing on the public's renewed interest, Pressler, who was disillusioned by the partisan two-party system, chose to get back in the ring. It had been eighteen years since he left office, but with an open Senate seat in 2014, Pressler felt a calling urging him to run. Despite serving his twenty-two years in office as a Republican, Pressler ran this time as an Independent—he was tired of the partisan bickering in Washington and was unwilling to submit to either party's special interests. This book tells the journey of this unexpected candidacy and instills hope that with some much-needed effort, we can achieve a political renaissance. About the Author Senator Larry Pressler is a

former member of the U.S. House of Representatives (1975-1979) and the U.S. Senate (1979-1997). He is a Rhodes Scholar, a Harvard Law School graduate, a Vietnam combat veteran, a Fulbright professor, and a member of the U.S. Supreme Court Bar.
