She thinks more highly of snow and ice than she does of love. She lives in a world of numbers, science and memories--a dark, exotic stranger in a strange land. And now Smilla Jaspersen is convinced she has uncovered a shattering crime... It happened in the Copenhagen snow. A six-year-old boy, a Greenlander like Smilla, fell to his death from the top of his apartment building. While the boy's body is still warm, the police pronounce his death an accident. But Smilla knows her young neighbor didn't fall from the roof on his own. Soon she is following a path of clues as clear to her as footsteps in the snow. For her dead neighbor, and for herself, she must embark on a

harrowing journey of lies, revelation and violence that will take her back to the world of ice and snow from which she comes, where an explosive secret waits beneath the ice....

A penetrating take on how our planet would respond without the relentless pressure of the human presence

Norway Tebbo National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the

second half of the twentieth century.”—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don’t be put off by the academic title of Julian Jaynes’s *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he

unfolds his case with the utmost intellectual rigor.”—The New York Times “When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike, *The New Yorker* “He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior.”—*American Journal of Psychiatry* *The Long Way to a Small, Angry Planet* Phrasebook Although you can get by in Denmark without speaking the language,

A former Marine sniper and a newly orphaned boy race across the Norwegian wilderness, fleeing demons both real and imagined. Sheldon Horowitz-widowed, impatient, impertinent-has grudgingly agreed to leave New York and move in with his granddaughter, Rhea, and her new husband, Lars, in Norway-a country of blue and ice, not the place for a former Marine sniper in the Korean War turned watch repairman. Not until now, anyway.

Home alone one morning, Sheldon witnesses a dispute between the woman who lives upstairs and an aggressive stranger. When events turn dire, Sheldon seizes and shields the neighbor's young son from the violence, and they flee the scene. As Sheldon and the boy look for a safe haven in an alien world, past and present weave together, forcing them ever forward to a wrenching moment of truth.

From the bestselling author of *Kafka on the Shore*: A magnificent coming-of-age story steeped in nostalgia, “a masterly novel” (The New York Times Book Review) blending the music, the mood, and the ethos that were the sixties with a young man’s hopeless and heroic first love. Now with a new introduction by the author. Toru, a serious young college student in Tokyo, is devoted to Naoko, a beautiful and introspective young woman, but their mutual passion is marked by the tragic death of their best friend years before. As Naoko retreats further into her own world, Toru finds himself drawn to a fiercely

independent and sexually liberated young woman.
