As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde."

A Humble Philosophy for Great Success "Get an education, get off Petain Street, and amount to something." These are the words that Ruthi Postow Birch's father said to her when she was a little girl living on a red-dirt road in Pritchard, Alabama, a town that straddled the poverty line. And that is exactly what she did. How to Build a Piano Bench is Ruthi's humorous and heart-warming story about growing up in southern Alabama, the life lessons she learned there, and how she applied that knowledge to build a successful business in Washington, DC. Full of anecdotes and advice on how to make both your strengths and weaknesses work to your advantage, this wonderful story will inspire and delight anyone who has ever had a dream to be something bigger than what they are.

High-stakes educational testing is a global phenomenon which is increasing in both scale and importance. Assessments are high-stakes when there

are serious consequences for one or more stakeholders. Historically, tests have largely been used for selection or for providing a 'licence to practise', making them high-stakes for the test takers. Testing is now also used for the purposes of improving standards of teaching and learning and of holding schools accountable for their students' results. These tests then become high-stakes for teachers and schools, especially when they have to meet externally imposed targets. More recent has been the emergence of international comparative testing, which has become high-stakes for governments and policy makers as their education systems are judged in relation to the performances of other countries. In this book we draw on research which examines each of these uses of high-stakes testing. The articles evaluate the impact of such assessments and explore the issues of value and fairness which they raise. To underline the international appeal of high-stakes testing the studies are drawn from Australia, Africa, the Caribbean, Europe, former Soviet republics and North America. Collectively they illustrate the power of high-stakes assessment in shaping, for better or for worse, policy making and schooling. This book was originally published as a special issue of *Assessment in Education: Principles, Policy & Practice*.
