Jewish-Muslim Interactions Frances Lincoln  
In 1992, shortly after the publication of the first edition of *Relevance: communication and cognition*, David Trotter wrote: "Relevance theory is not only the most elegant version of pragmatics currently available, but the most uncompromising in its view that inference cannot be assimilated to a code model of communication. It asks questions which literary criticism has never been able to ask, let alone answer". Thirty years on, new questions continue to be asked (and

answered) in linguistic pragmatics, cognitive science, literary theory (as foreseen by Trotter), experimental psychology, affective science, communication studies etc. The theory also appears in quite unexpected places: recent applications of relevance theory include the analysis of internet-mediated discourse, clinical practice and even museum curation. First and foremost, however, relevance theory is an inferential model of communication and cognition which is theoretically and empirically testable. The approach still has a huge amount of potential in psychology and beyond, potential this Research Topic seeks to tap into.

*Manual of Romance Languages in Africa*  
Routledge

With more than two thousand languages spread over its territory, multilingualism is a common reality in Africa. The main official languages of most African countries are Indo-European, in many instances Romance. As they were primarily brought to Africa in the era of colonization, the areas discussed in this volume are thirty-five states that were once ruled by Belgium, France, Italy, Portugal, or Spain, and the African regions still belonging to three of them. Twenty-six states are presented in relation to French, four to Italian, six to Portuguese, and two to Spanish. They are considered in

separate chapters according to their sociolinguistic situation, linguistic history, external language policy, linguistic characteristics, and internal language policy. The result is a comprehensive overview of the Romance languages in modern-day Africa. It follows a coherent structure, offers linguistic and sociolinguistic information, and illustrates language contact situations, power relations, as well as the cross-fertilization and mutual enrichment emerging from the interplay of languages and cultures in Africa.

Henri Meschonnic was a linguist, poet, translator of the Bible and one of the most original French thinkers of his generation. He strove throughout his career to reform the understanding of language and all that depends on it. His work has had a shaping influence on a generation of scholars and here, for the first time, a selection of these are made available in English for a new generation of linguists and philosophers of language. This Reader, featuring fourteen texts covering the core concepts and topics of Meschonnic's theory, will enrich, enhance and challenge your understanding of language. It explores his key ideas on poetics, the poem, rhythm, discourse and his critique of the sign. Meschonnic's vast oeuvre was continuously preoccupied with the question of a poetics of society; he

constantly connected the theory of language to its practice in various fields and interrogated what that means for society. In exploring this fundamental question, this book is central to the study and philosophy of language, with rich repercussions in fields such as translation studies, poetics and literary studies, and in redefining notions such as rhythm, modernity, the poem and the subject.

Knowledge of Life Today presents the thoughts of Jean Gayon, a major philosopher of science in France who is recognized across the Atlantic, especially for his work in philosophy and the history of life sciences. The book is structured around Gayon's personal answers to questions put forward by Victor Petit. This approach combines scientific rigor and risk-taking in answers that go back to the fundamentals of the subject. As well as the relationship between philosophy and the history of science, Gayon discusses the main questions of the history and philosophy of biology that marked his intellectual journey: Darwin, evolutionary biology, genetics and molecular biology,

human evolution, and various aspects of the relationship between biology and society in contemporary times (racism, eugenics, biotechnology, biomedicine, etc.).

Cynthia J. Brown explains why the advent of print in the late medieval period brought about changes in relationships among poets, patrons, and printers which led to a new conception of authorship. Examining such paratextual elements of manuscripts as title pages, colophons, and illustrations as well as such literary strategies as experimentation with narrative voice, Brown traces authors' attempts to underscore their narrative presence in their works and to displace patrons from their role as sponsors and protectors of the book. Her accounts of the struggles of poets, including Jean Lemaire, Jean Bouchet, Jean Molinet, and Pierre Gringore, over the design, printing, and sale of their books demonstrate how authors secured the status of literary proprietor during the transition from the culture of script and courtly patronage to that of print capitalism.

Is there a future for the law? In this book, Florian Grisel addresses one of the most fascinating questions raised by social scientists in the past few decades. Since the 1980s, socio-legal scholars have argued that governance based on social norms (or "private governance") can offer an alternative to regulation by the law. On this account, private governance could be

socially efficient and even optimal compared with other modes of governance. The Limits of Private Governance supplements this optimistic analysis of private governance by assessing the long-term evolution of a private order in the fishery of Marseille. In the last eight centuries, the fishers of Marseille have regulated their community without apparent means of legal support from the French state. In the early 15th century, they even created an organisation called the Prud'homie de Pêche in order to regulate their fishery. Based on archival evidence, interviews and ethnographic data, Grisel examines the evolution of the Prud'homie de Pêche and argues that the strong social norms in which it is embedded are not only powerful tools of governance, but also forces of inertia that have constrained its regulatory action. The lessons drawn from this book will appeal to academics, policy-makers and members of the general public who have an interest in the governance of our modern societies.

Profound analysis of French comics through a postcolonial lens Postcolonialism and migration are major themes in contemporary French comics and have roots in the Algerian War (1954–62), antiracist struggle, and mass migration to France. This volume studies comics from the end of the formal dismantling of French colonial empire in 1962 up to the present. French cartoonists of ethnic-minority and immigrant heritage are a major focus, including Zeina Abirached (Lebanon), Yvan Alagbé (Benin), Baru (Italy), Enki Bilal (former Yugoslavia), Farid Boudjellal (Algeria and Armenia), José Jover (Spain), Larbi Mechkour (Algeria), and Roland Monpierre (Guadeloupe). The author analyzes comics representing a gamut of perspectives on immigration and postcolonial ethnic minorities, ranging from staunch defense to violent rejection. Individual chapters are dedicated to specific artists, artistic collectives, comics, or themes, including avant-gardism, undocumented migrants in comics, and

racism in far-right comics.

"Why should we take into account the history of reception in biblical methods? It is because as exegetes we have no choice. Recognizing our dependence on interpretations of the past is not a new method, but it is the very way we understand texts. Régis Burnet shows how this allows us to put our current interpretations into perspective, but also to dialogue with those of the past." --

The later twelfth and thirteenth centuries were a pivotal period for the development of European government and governance.

A mentality emerged that trusted to procedures of accountability as a means of controlling officers' conduct. The mentality was not inherently new, but it became qualitatively more complex and quantitatively more widespread in this period, across European countries, and across different sorts of officer. The officers exposed to these methods were not just 'state' ones, but also seignorial, ecclesiastical, and university-college officers, as well as urban-communal ones. This study surveys these officers and the practices used to regulate them in England. It places them not only within a British context but also a wide European one and explores how administration, law, politics, and norms tried to control the insolence of office. The devices for institutionalising accountability analysed here reflected an extraordinarily creative response in England, and beyond, to the problem of complex government: inquests, audits, accounts, scrutiny panels, syndication. Many of them have shaped the way in which we think about accountability today. Some remain with us. So too do their practical problems. How can one delegate control effectively? How does

accountability relate to responsibility? What relationship does accountability have with justice? This study offers answers for these questions in the Middle Ages, and is the first of its kind dedicated to an examination of this important topic in this period.

Evoking the sensory richness and ambitions of the beloved French artist's work through a multifaceted exploration of

his art, career, and legacy Cezanne presents a new examination of the work of Paul Cezanne (1839-1906) across media and genres, surveying his career from the varied perspectives of art historians, conservation scientists, and a roster of renowned contemporary painters, including Etel Adnan, Phyllida Barlow, Paul Chan, Julia Fish, Ellen Gallagher, Lubaina Himid, Kerry James Marshall, Rodney McMillian, Laura Owens, and Luc Tuymans. Featuring wide-ranging essays and a series of maps tracing Cezanne's travels across the French landscape, this lavishly illustrated publication highlights the artist's favorite motifs, influence on his peers, and pivotal role in the development of modern art, in addition to presenting state-of-the-art technical analysis of his pigments and methods. It offers a fresh look at the ways in which Cezanne, driven by what he described as "strong sensations," sought to develop a visual language that could fully translate his intense feelings into paintings. In doing so, he opened up possibilities that were embraced and elaborated by artists in his time and into the present. Distributed for the Art Institute of Chicago Exhibition

The Earth's oceans are currently undergoing unprecedented changes: rivers

have suffered a severe reduction in their sediment transport, and as a result, sediment input to the oceans has dropped lower than ever before. These inputs have varied over millennia as a result of both natural occurrences and human actions, such as the building of dams and the extraction of materials from riverbeds. *Sedimentary Crisis at the Global Scale 1* examines how river basins have been affected by the sedimentary crises of various historical epochs. By studying global balances, it provides insights into the profound disruption of the solid transport of fluvial bodies. The book also explores studies of various rivers, from the Amazon, which remains relatively unaffected, to dying rivers such as the Colorado and the Nile.
