Maja Zehfuss' book

offers a fundamental critique of constructivism, focusing on the work of Wendt, Onuf and Kratochwil. Using Germany's shift towards participation in

international military operations as an illustration, she demonstrates why each version of constructivism fails in its own project and comes apart on the basis of its own assumptions. Inspired by Derridean thought, this book highlights the political consequences of constructivist representations of reality. Each critique concludes that constructivist notions of key concepts are impossible, and that this is not merely a question of theoretical inconsistency, but of politics. The book is premised on the notion that the 'empirical' and the 'theoretical' are less separate than is acknowledged in international relations, and must be read as intertwined. Zehfuss

examines the scholars' role in international relations, worrying that, by looking to constructivism as the future, they will be severely curtailing their ability to act responsibly in this area.

The central theme of this volume is the work of Sabahattin Ali, the Turkish author and translator from German into Turkish who achieved posthumous success with his novel *Kürk Mantolu Madonna* (The Madonna in the Fur Coat). Our contributors analyze this novel, which takes place largely in Germany, and several other texts by Ali in the context of world literature, (cultural) translation, and intertextuality. Their

articles go far beyond the intercultural love affair that has typically dominated the discussion of Madonna. Other articles consider Zafer Şenocak's essay collection *Deutschsein* and transcultural learning through picture books. An interview with Selim Özdoğan rounds out the issue.

The present anthology stems from the perception of a widespread and manifest uneasiness concerning the business of military intervention in our times. Indeed, the West is for quite some time engaged in a deep introspection about his military intervention policies in the years to come and reflects about this.

What will Western military intervention policies look like in the future; what kind of military intervention policies is wanted and what kind of military intervention policies is financially, politically and socio-culturally possible and militarily feasible? The hypothesis pursued in this volume states that, in the foreseeable future, we may see a different kind of military intervention policy and intervention posture of the West that will lead to different military interventions. It may be argued that we are witnessing the dawn of a new era, the era of military post-interventionism.

"Wildlife trafficking

threatens the existence of many plant and animal species and accelerates the destruction of wildlife, forests, and other natural resources. It contributes to environmental degradation, destroys unique natural habitats, and deprives many countries and their populations of scarce renewable resources. Nevertheless, preventing and suppressing the illegal trade in wildlife, animal parts, and plants is presently not a priority in many countries and it remains overlooked and poorly researched. The chapters included in this volume address causes, characteristics, and actors of wildlife trafficking, analyse detection methods,

and explore different international and national legal frameworks." This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. This second book in a trilogy of high adventure and alternate history combines rousing pulp action with steampunk style, bringing epic political themes to life within a story of heartbreaking romance, sacrifice, and heroism. Princess Adele struggles with a life of marriage and obligation as her Equatorian Empire and

their American Republic allies stand on the brink of war against the vampire clans of the north. However, the alliance's horrific strategy for total victory drives Adele to abandon her duty and embark on a desperate quest to keep her nation from staining its hands with genocide. Reunited with her great love, the mysterious adventurer known to the world as the Greyfriar, Adele is pursued by her own people as well as her vengeful husband, Senator Clark. With the human alliance in disarray, Prince Cesare, lord of the British vampire clan, seizes the initiative and strikes at the very heart of Equatoria. As Adele labors to bring order to her world, she learns more about the

strange powers she exhibited in the north. Her teacher, Mamoru, leads a secret cabal of geomancers who believe Adele is the one who can touch the vast power of the Earth that surges through ley lines and wells up at the rifts where the lines meet. These energies are the key to defeating the enemy of mankind. If Princess Adele could ever bring this power under her command, she could be death to vampires. But such a victory would also cost the life of Adele's beloved Greyfriar. From the Trade Paperback edition.

 The epic Vampire Empire trilogy rushes to a heart-wrenching

conclusion of honor and love, hatred and vengeance, sacrifice and loss. A war to the death. Empress Adele has launched a grand crusade against the vampire clans of the north. Prince Gareth, the vampire lord of Scotland, serves the Equatorian cause, fighting in the bloody trenches of France in his guise as the dashing Greyfriar. But the human armies are pinned down, battered by harsh weather and merciless attacks from vampire packs. To even the odds, Adele unleashes the power of her geomancy, a fearsome weapon capable of slaughtering vampires in vast numbers. However, the power she expends threatens her own life even as she questions the morality of such a

weapon. As the war turns ever bloodier and Adele is threatened by betrayal, Gareth faces a terrible choice. Their only hope is a desperate strike against the lord of the vampire clans-- Gareth's brother, Cesare. It is a gamble that could win the war or signal the final days of the Greyfriar.

"The most important book at the borderland of psychology and politics that I have ever read."—Martin E. P. Seligman, Zellerbach Family Professor of Psychology at that University of Pennsylvania and author of *Learned Optimism* Why are we devastated by a word of criticism even when it's mixed with lavish praise? Because our brains are wired to focus on the bad. This negativity effect explains things great and small: why countries blunder into disastrous wars, why couples divorce, why people flub job interviews, how schools fail students,

why football coaches stupidly punt on fourth down. All day long, the power of bad governs people's moods, drives marketing campaigns, and dominates news and politics. Eminent social scientist Roy F. Baumeister stumbled unexpectedly upon this fundamental aspect of human nature. To find out why financial losses mattered more to people than financial gains, Baumeister looked for situations in which good events made a bigger impact than bad ones. But his team couldn't find any. Their research showed that bad is relentlessly stronger than good, and their paper has become one of the most-cited in the scientific literature. Our brain's negativity bias makes evolutionary sense because it kept

our ancestors alert to fatal dangers, but it distorts our perspective in today's media environment. The steady barrage of bad news and crismongering makes us feel helpless and leaves us needlessly fearful and angry. We ignore our many blessings, preferring to heed—and vote for—the voices telling us the world is going to hell. But once we recognize our negativity bias, the rational brain can overcome the power of bad when it's harmful and employ that power when it's beneficial. In fact, bad breaks and bad feelings create the most powerful incentives to become smarter and stronger. Properly understood, bad can be put to perfectly good use. As

noted science journalist John Tierney and Baumeister show in this wide-ranging book, we can adopt proven strategies to avoid the pitfalls that doom relationships, careers, businesses, and nations. Instead of despairing at what's wrong in your life and in the world, you can see how much is going right—and how to make it still better. *Western Grassfields (Cameroun Republic)* Springer

This acclaimed autobiography by one of the twentieth century's greatest satirical artists is as much a graphic portrait of Germany in chaos after the Treaty of Versailles as it is a memoir of a remarkable artist's development. Grosz's account of a world gone mad is as acute and provocative as the art that depicts it, and this translation of a work long out of print restores the spontaneity, humor, and energy of the author's German text. It also includes a chapter on Grosz's

experience in the Soviet Union—omitted from the original English-language edition—as well as more writings about his twenty-year self-imposed exile in America, and a fable written in English.

Dialogue Analysis: Units, relations and strategies beyond the sentence Psychology Press

This edition provides an English translation of and detailed commentary on the second book of epigrams published by the Latin poet Marcus Valerius Martialis. The past ten years have seen a resurgence of interest in Martial's writings. But contemporary readers are in particular need of assistance when approaching these epigrams, and until

now there has been no modern commentary dedicated to Book II. This new commentary carefully illuminates the allusions to people, places, things, and cultural practices of late first-century Rome that pervade Martial's poetry. It analyzes the epigrammatist's poems as literary creations, treating such topics as the structure of the individual poems and of the book as a whole, and the influence of earlier texts on Martial's language and themes.

This volume contains the most important contributions by distinguished historians who have thoroughly demolished this Wehrmacht myth. The picture that emerges from this

collection is a depressing one and raises many questions about why "ordinary men" got involved as perpetrators and bystanders in an unprecedented program of extermination of "racially inferior" men, women, and children in Eastern Europe and the Soviet Union during the Second World War."--
