The Vietnam War Zondervan

It's the end of everything in contemporary America. A future without power. But what will survive? Mr Burns asks how the stories we tell make us the people we are, explodes the boundaries between pop and high culture and, when society has crumbled, imagines the future for America's most famous family.

Bartman: The Hero's Handbook Harper Collins

A Pulitzer Prize-winning history of the mistreatment of black Americans. In this 'precise and eloquent work' - as described in its Pulitzer Prize citation - Douglas A. Blackmon brings to light one of the most shameful chapters in American history - an 'Age of Neoslavery' that thrived in the aftermath of the Civil War through the dawn of World War II. Using a vast record of original documents and personal narratives, Blackmon unearths the lost stories of slaves and their descendants who journeyed into freedom after the Emancipation Proclamation and then back into the shadow of involuntary servitude thereafter. By turns moving, sobering and shocking, this unprecedented account reveals these stories, the companies that profited the most from neoslavery, and the insidious legacy of racism that reverberates today.

A "downright brilliant" (The New York Times) comedy by one of American theater's most original new voices.

The Golden Lad James H. Burns Associates

Winner of the Man Booker Prize "Everything about this novel rings true. . . . Original, funny, disarmingly oblique and unique."—The Guardian In an unnamed city, middle sister stands out for the wrong reasons. She reads while walking, for one. And she has been taking French night classes downtown. So when a local paramilitary known as the milkman begins pursuing her, she suddenly becomes "interesting," the last thing she ever wanted to be. Despite middle sister's attempts to avoid him—and to keep her mother from finding out about her maybe-boyfriend—rumors spread and the threat of violence lingers. Milkman is a story of the way inaction can have enormous repercussions, in a time when the wrong flag, wrong religion, or even a sunset can be subversive. Told with ferocious energy and sly, wicked humor, Milkman establishes Anna Burns as one of the most consequential voices of our day.

Olive, Mabel & Me: Life and Adventures with Two Very Good Dogs Putnam Adult

The story of Olive and Mabel, Labrador retrievers who rose to internet fame as the subjects of Andrew Cotter's BBC sports parodies. When sporting events were put on hold in March 2020, commentator Andrew Cotter shifted to working from home. The one-on-one competitors? His two Labrador retrievers, Olive and Mabel. In the hilarious videos that ensued, the dogs engage in various contests, from bone-snatching and breakfast-eating to crushing it on the dog walk, while Cotter narrates to hilarious effect. The scene of Mabel, simply standing still in a fetid pond was one of the most popular. Why? Because this is how dogs live, and Cotter captured it with humor and joy. It's why the series has been viewed more than 50 million times, entertaining dog owners, sports fans and celebrities around the world. Olive and Mabel are more than online celebrities, however, as revealed in this charming narrative. Filled with stories about how Cotter fell in love with his dogs, his passion for hiking with them through the glens and over the peaks of his native Scotland, and the ongoing relationship between Olive and Mabel (particularly the "competitive fire" lit during these days of quarantine), the memoir is by turns side-splittingly funny and thoughtfully tender. It's sure to resonate with all dog lovers.

Equal parts true crime, twentieth-century history, and science thriller, The Poisoner's Handbook is "a vicious, page-turning story that reads more like Raymond Chandler than Madame Curie." —The New York Observer "The Poisoner's Handbook breathes deadly life into the Roaring Twenties." —Financial Times "Reads like science fiction, complete with suspense, mystery and foolhardy guys in lab coats

tipping test tubes of mysterious chemicals into their own mouths." —NPR: What We're Reading A fascinating Jazz Age tale of chemistry and detection, poison and murder, The Poisoner's Handbook is a page-turning account of a forgotten era. In early twentieth-century New York, poisons offered an easy path to the perfect crime. Science had no place in the Tammany Hall-controlled coroner's office, and corruption ran rampant. However, with the appointment of chief medical examiner Charles Norris in 1918, the poison game changed forever. Together with toxicologist Alexander Gettler, the duo set the justice system on fire with their trailblazing scientific detective work, triumphing over seemingly unbeatable odds to become the pioneers of forensic chemistry and the gatekeepers of justice. In 2014, PBS's AMERICAN EXPERIENCE released a film based on The Poisoner's Handbook.

An exploration of how plant behavior and adaptation offer valuable insights for human thriving. We know that plants are important. They maintain the atmosphere by absorbing carbon dioxide and producing oxygen. They nourish other living organisms and supply psychological benefits to humans as well, improving our moods and beautifying the landscape around us. But plants don't just passively provide. They also take action. Beronda L. Montgomery explores the vigorous, creative lives of organisms often treated as static and predictable. In fact, plants are masters of adaptation. They "know" what and who they are, and they use this knowledge to make a way in the world. Plants experience a kind of sensation that does not require eyes or ears. They distinguish kin, friend, and foe, and they are able to respond to ecological competition despite lacking the capacity of fight-or-flight. Plants are even capable of transformative behaviors that allow them to maximize their chances of survival in a dynamic and sometimes unfriendly environment. Lessons from Plants enters into the depth of botanic experience and shows how we might improve human society by better

appreciating not just what plants give us but also how they achieve their own purposes. What would it mean to learn from these organisms, to become more aware of our environments and to adapt to our own worlds by calling on perception and awareness? Montgomery's meditative study puts before us a question with the power to reframe the way we live: What would a plant do?

After a long absence, Matt returns in all his absurdly conflicted, tortured glory. In the tradition of Bukowski and R. Crumb, his tale turns on his disgust with himself and all of humanity, and, like the

greats, Matt entertains as he cringes. His paradoxically clean and cheerful art is as likable as his persona is unlikable in this tale of avarice, obsession and masturbation. The episodic story begins in a bookstore, where Matt swoops in on a book he knows his friend, fellow cartoonist Seth, would love; Matt buys the book and then sells it to Seth at an obscene markup. The action moves on to Matt's latest porn purchases, then stops by a coffee shop, where the author chews over his shortcomings with a third member of their cartoonist gang, Chester. Interposed are memories of childhood and scenes from Matt's room in a boarding house, where his laziness and disgust with his fellow humans lead him to urinate in the largest jars he can find in order to avoid using the communal bathroom. The title indicates that Matt's well aware of his entrenched personal issues - but this self-awareness never translates to any kind of epiphany or behavioral change.
