Global
Healthcare
and medical
services have
seen rapid
development
in various
areas of the

world,
including Asia
and Eastern
Europe. These
territories are
now becoming
a medical hub
for many

surrounding countries. Medical tourism is the practice of traveling to international regions for treatment that isn't available locally. This subject has gained significant attention throughout the tourism industry, as researchers and professionals are searching for specific advancements of medical care and hospital development in numerous countries. Growth of the Medical

Tourism Industry and Its Impact on Society: Emerging Research and Opportunities is a collection of innovative research on the methods and advancement of medical travel for treatment in various global regions and provides insights for the growth prospects of the medical tourism business. While highlighting topics including destination branding, community

impact, and hospital management, this book is ideally designed for medical executives, hospital directors, researchers, policymakers, academicians, practitioners, scholars, and students seeking current research on tourism practices within the medical field. **Rizum** Xlibris Corporation This book contains the proceedings of the International Conference on Law, Social

Science, Economics, and Education (ICLSSEE 2022) on 16 April 2022 in Indonesia. This conference was held in collaboration between Nusantara Training and Research (NTR) with Borobudur University Jakarta, 17 Agustus 1945 University (UNTAG), and the Research and Development Agency of the Ministry of Home Affairs. The papers from the conference were collected

in a proceedings book entitled: Proceedings of The International Conference on Law, Social Science, Economics, and Education (ICLSSEE 2022). The presentation of such a conference covering multi-disciplines will contribute a lot of inspiring inputs and new knowledge on current trending in Law, Social Science, Economics, and Education. Thus, this will

contribute to the next young generation's researchers to produce innovative research findings. Hopefully, the scientific attitude and skills through research will promote the development of knowledge generated through research from various scholars in various regions. Finally, we would like to express our greatest gratitude to all the steering committee colleagues for

their cooperation in administering and arranging the conference. Hopefully, this seminar and conference will be continued in the coming years with many more insightful articles from inspiring research. We would also like to thank the invited speakers for their invaluable contribution and for sharing their vision in their talks. We hope to meet you again at the next

conference of ICLSSEE. *Divine Spiritual Doctor* Funstory 2011 Updated Reprint. Updated Annually. y dinner given to Professor S.D. Gross by his medical friends in commemoration of his fifty-first year in the profession, April 10, 1879 McFarland A Milwaukee Journal Sentinel Best Book of 2021 A poignant and funny exploration of authenticity in work and life by a woman doctor. In 2017, Dr. Suzanne Koven published an essay describing the challenges faced by female

physicians, including her own personal struggle with "imposter syndrome"—a long-held secret belief that she was not smart enough or good enough to be a “real” doctor. Accessed by thousands of readers around the world, Koven’s “Letter to a Young Female Physician” has evolved into a deeply felt reflection on her career in medicine. Koven tells candid and illuminating stories about her pregnancy

during a grueling residency in the AIDS era; the illnesses of her child and aging parents during which her roles as a doctor, mother, and daughter converged, and sometimes collided; the sexism, pay inequity, and harassment that women in medicine encounter; and the twilight of her career during the COVID-19 pandemic. As she traces the arc of her life, Koven finds inspiration in

literature and faces the near-universal challenges of burnout, body image, and balancing work with marriage and parenthood. Shining with warmth, clarity, and wisdom, Letter to a Young Female Physician reveals a woman forging her authentic identity in a modern landscape that is as overwhelming and confusing as it is exhilarating in its possibilities. Koven offers

an indelible account, by turns humorous and profound, from a doctor, mother, wife, daughter, teacher, and writer who sheds light on our desire to find meaning, and on a way to be our own imperfect selves in the world.

 IT is a great advantage to have been born one of a large family group of healthy, active children,

surrounded by wholesome influences. The natural and healthy discipline which children exercise upon one another, the variety of tastes and talents, the cheerful companionship, even the rivalries, misunderstandings, and reconciliations where free play is given to natural disposition, under wise but not too rigid oversight, form an excellent discipline for after-life. Being the

third daughter in a family of nine brothers and sisters, who grew up to adult life with strong ties of natural affection, I enjoyed this advantage. My earliest recollections are connected with the house in Bristol, No. 1 Wilson Street, near Portman Square, to which the family removed from Counterslip, where I was born, when I was about three years old. My childish remembrances are chiefly

associated with my elder sisters, for being born between two baby brothers, who both died in infancy, I naturally followed my sisters' lead, and was allowed to be their playmate. Our Wilson Street home had the advantage of possessing a garden behind it, containing fine trees; and also a large walled garden opposite to it, with fruit trees and many flowers and shrubs, which afforded us endless delight and

helped to create an early love of Nature. I cannot recall the sequel of incidents in this period of my life, for being so young when we moved to Wilson Street, the recollections of those early years are confused; but some things stand out, distinctly impressed on the memory. My eldest sister had become possessed of a small telescope, and gazing through one of the garret

windows, we thought we could spy the Duchess of Beaufort's woods over the tops of the houses. There was a parapet running along the front of the house, and we were seized with a desire for a more extensive view through the precious telescope than the garret window afforded, so a petition for liberty to go on to the roof was sent to papa in our names by my lively eldest sister. *Better*

of the truth. Global Migration, Gender, and Health Professional Credentials Lulu.com A Fateful Meeting A year and a half ago, I was sitting at a conference listening to Ed Noffsinger speak, and suddenly had the most profound “Aha” moment of my professional career. Here was someone presenting a practical and tested solution to some of the most challenging

problems currently plaguing the US healthcare system, problems such as poor access to primary and specialty care; the uncontrollable and rising costs of healthcare; our nation’s relatively poor quality outcomes; and finally, the sense of frustration, disempowerment, loneliness, and disenfranchisement that patients and their families too often experience. Dr.

Noffsinger’s solution seemed deceptively simple—shared medical appointments (SMAs) that afford the highest quality healthcare to be delivered in the highest quality care experience—a group setting. Experience collected over a decade and involving more than 100,000 patient visits throughout the United States, Canada, and parts of Europe has demonstrated that SMAs, when used in

primary care as well as in the medical and surgical subspecialties, lead to increased access to care, enhanced quality of care, and improved patient satisfaction. For physicians, the efficiency gains and team support from their participation in SMAs translate into much needed relief and improved career satisfaction.

Bringing together diverse approaches and case studies of international health worker migration, Global Migration, Gender, and Health Professional Credentials critically reimagines how we conceptualize the transfer of value embodied in internationally educated health professionals (IEHPs). This volume provides key insights into

the economic and feminist concepts of global value transmission, the complexity of health worker migration, and the gendered and intersectional intricacies involved in the workplace integration of immigrant health care workers. The contributions to this edited collection uncover the multitude of actors who play a role in creating, transmitting, transforming, and utilizing the value

embedded in international health migrants. National Health Program MIT Press This essential resource provides readers with the plans and real examples to market and grow a successful practice. The guide is filled with practical marketing tips and strategies based around the five components of a successful practice. **Dare to Care** University of Toronto Press Dare to Care is a book

about the magic of medicine and life. Patients long for caring and connection when they are ill, and the doctors who come to this profession full of care and compassion often leave feeling drained and diluted as human beings because they forget who they are. In this book, you will be reminded that essential harmony and well-being is your natural state, and what you have been looking

for in any doctor you have sought. It offers an invitation to join a new bandwidth of caring, intuition, holism, and love, to ride the waves of living beyond the norm.-- from the foreword by Dr. Srini Pillay, Harvard Medical School. Dare to Care is a wonderful book: full of wisdom, insight, and compassion. I warmly recommend it to all doctors, but especially those in the early years of

training, to be read before too much of the "hidden curriculum" has hardened their outlook on the profession. – Peter Sullivan, M.D. Emeritus Professor Pediatrics, University of Oxford Medical School Dare to Care is a heartwarming book that uses letters from Dr. Bonhoeffer to his goddaughter, a resident physician. Through these letters, Dr. Bonhoeffer imparts his wisdom, experience

and, most important, his compassion not only to his goddaughter but to each of us. Whether you're a medical student or seasoned physician, this book will remind you of why you became a physician. – James Doty, MD Professor of Neurosurgery, Stanford University School of Medicine A great book! It gives us – medics and patients – a simple truth that everyone knows, but

almost nobody bothers about in actual practice: Healing is not only about scientific facts and medical technology (which are important enough); it is also about love. This book contains more wisdom than a bookshelf of recent publications in philosophy. – Olaf Müller, PhD Professor of Philosophy of Science and Nature, Humboldt University, Berlin This book is so much deeper than just a

dialogue between a physician and a medical student; it cuts right to both the essence of healing and what it means to be human. – Thom Hartmann
Nationally syndicated radio host In Dare to Care, the authors astutely describe the exquisite art of medicine. Physician burnout and disillusionment is often the result of extreme focus on the business and science of medicine,

often at the exclusion of the sweetness of the physician-patient relationship. The art of medicine does indeed require us to become daring enough to care. This book is a must-read for all medical professionals. – Kavitha Chinnaiyan, MD Professor of Medicine, Oakland University, Michigan Author of The Heart of Wellness, Glorious Alchemy, and Shakti Rising A bare-all, honest and

lovingly written book that serves as a reminder to all of us of the purpose of medicine. Through the vivid descriptions of many soul-searching experiences, Dr. Bonhoeffer is showing us how the journey of a medical doctor is intertwined with life. This is a journey of love at its core, where passion, service, honesty to oneself and others, humility, devotion, commitment,

and intense reflection are necessary complements. Very much like life itself. It takes courage to share one's journey, and Dr. Bonhoeffer does so with grace and elegance. - Flor M. Munoz, MD, MSc Associate Professor of Pediatrics Baylor College of Medicine, Houston, Texas Dare to Care is a compassionate, heartfelt, love-filled narrative about the true vocation and practice of medicine. A

much-needed book to be read on this mechanized and corrupt medical model. – Carlos Warter, MD, PhD Psychiatrist, Guest Lecturer, University of California San Diego Author of "Recovery of the Sacred", "Who Do You Think You Are? The Healing Power of Your Sacred Self," and six other books
