Seismic Design for Buildings Washington, D.C. : U.S. Army Corps of Engineers, Engineer Research and Development Center

Lonely Planet: The world's leading travel guide publisher Discover 200 of the best places to ride a bike in this beautifully illustrated hardback. From family-friendly, sightseeing urban rides to epic adventures off the beaten track. Destinations range from France and Italy, for the world's great bike races, to the wilds of Mongolia and Patagonia. These journeys will inspire - whether you are an experienced cyclist or just getting started. The book is organised by continent. In the Americas we join a family bikepacking trip in Ecuador; we pedal the Natchez Trace Parkway and stop at legendary music spots; we ride the Pacific Coast Highway in Oregon and California; go mountain biking in Moab and Canada; and explore the cities of Buenos Aires and New York by bicycle. European rides include easy-going trips around Lake Constance, along the Danube and the Loire, and coast-to-coast routes; routes in Tuscany, Spain and Corsica; and professional journeys up Mt Ventoux and around the Tour of Flanders. In Asia, we venture through Vietnam's valleys; complete the Mae Hong Son circuit in northern Thailand; cross the Indian Himalayas; and pedal through Bhutan. And in Australia and New Zealand we take in Tasmania and Queensland by mountain bike; cycle into Victoria's high country and around Adelaide on road bikes; and try some of New Zealand's celebrated cycle trails. Each ride is illustrated with stunning photography and a map. A toolkit of practical details - where to start and finish, how to get there, where to stay and more - helps riders plan their own trips. There are also suggestions for three more similar rides around the world for each story. Each piece shows how cycling is a fantastic way to get to know a place, a people and their culture. About Lonely Planet: Started in 1973, Lonely Planet has become the world's leading travel guide publisher with guidebooks to every destination on the planet, gift and lifestyle books and stationery, as well as an award-winning website, magazines, a suite of mobile and digital travel products, and a dedicated traveller community. Lonely Planet's mission is to enable curious travellers to experience the world and to truly get to the heart of the places they find themselves in. TripAdvisor Travelers' Choice Awards 2012, 2013, 2014, and 2015 winner in Favorite Travel Guide category 'Lonely Planet guides are, quite simply, like no other.' - New York Times 'Lonely Planet. It's on everyone's bookshelves; it's in every traveller's hands. It's on mobile phones. It's on the Internet. It's everywhere, and it's telling entire generations of people how to travel the world.' - Fairfax Media (Australia) Important Notice: The digital edition of this book may not contain all of the images found in the physical edition.

This open access book focuses on Switzerland-based medium-sized companies with a longstanding export tradition and a proven dominance in global niche markets. Based upon in-depth documentation and analysis of 36 Swiss companies over their entire history, an expert team of authors presents several parallels in the pathways and success factors which allowed these firms to become dominant and operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions. The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success. "Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive. Gina Domanig, Managing Partner, Emerald Technology Ventures, Zurich

Deceptive Conducts Before the Patent Office John Wiley & Sons

ICOLD Bulletin 177 'Roller-Compacted Concrete Dams' presents the state-of-the-art on roller-compacted concrete technology for dams, incorporating the advances of the RCC technology for dams over the last 15 years since the previous Bulletin on the topic was released in 2003. Hence, the present ICOLD Bulletin 177 supersedes ICOLD Bulletin 126 ('Roller-compacted concrete dams - State of the art and case histories', published in 2003) and ICOLD Bulletin 75 ('Roller-Compacted Concrete for Gravity Dams' published in 1989). While roller-compacted concrete technology could have still been considered a new technology in 2003, it is now true to say that construction by roller-compaction has become the standard approach for large concrete gravity dams. This Bulletin addresses all aspects of the planning, design, construction and performance of RCC in dams. Mixture proportioning and quality control are discussed and a comprehensive listing of references is included. Many aspects of RCC in dams have become better understood since the publication of

Bulletin No 126 and the present Bulletin contains less information on the particular approaches applied in different countries, but includes more comprehensive information particularly in relation to design, mixture proportioning and construction. With greater understanding, it has further been possible to highlight more definitively the requirements of successful RCC dams, as well as the pitfalls and difficulties that can be associated with RCC dam design and construction. Le Bulletin CIGB 177, intitulé « Barrages en Béton Compacté au Rouleau » présente les dernières avancées en matière de technologie du béton compacté au rouleau pour les barrages intégrant les progrès de la technologie BCR pour les barrages au cours des 15 dernières années, depuis que le dernier bulletin sur le sujet a été publié en 2003. Par conséquent, le bulletin 177 remplace le bulletin 126 (« Barrages en béton compacté au rouleau - Technique actuelle et exemples », publié en 2003) et le bulletin 75 (« Béton compacté au rouleau pour barrages-poids - Technique actuelle » publié en 1989). Alors que la technologie du BCR pourrait encore être considérée comme une nouvelle technologie en 2003, il est maintenant vrai de dire que la construction par le compactage par rouleaux est devenue l'approche standard pour les grands barrage-poids en béton. Ce bulletin aborde tous les aspects de la planification, de la conception, de la construction et de la performance du BCR dans les barrages. Le dosage du mélange et le contrôle de la qualité sont discutés et une liste exhaustive des références est incluse. De nombreux aspects du BCR dans les barrages sont mieux compris depuis la publication du Bulletin no 126. Le présent bulletin contient moins d'informations sur les approches particulières appliquées dans différents pays, mais comprend des informations plus complètes notamment en ce qui concerne la conception, le dosage du mélange et la construction. Avec une plus grande compréhension, il a été possible de mettre en évidence les exigences des barrages en BCR réussis, ainsi que les pièges et les difficultés qui peuvent être associés à la conception et la construction du barrage en BCR.

Patent Management Springer Science & Business Media

This book summarizes the technical advances in recent decades and the various theories on rock excavation raised by scholars from different countries, including China and Russia. It not only focuses on rock blasting but also illustrates a number of non-blasting methods, such as mechanical excavation in detail. The book consists of 3 parts: Basic Knowledge, Surface Excavation and Underground Excavation. It presents a variety of technical methods and data from diverse sources in the book, making it a valuable theoretical and practical reference resource for engineers, researchers and postgraduates alike.

Masterpieces of Swiss Entrepreneurship Random House

This classic manual for structural steelwork design was first published in 1956. Since then, it has sold many thousands of copies worldwide. The fifth edition is the first major revision for 20 years and is the first edition to be fully based on limit state design, now used as the primary design method, and on the UK code of practice, BS 5950. It provides, in a single volume, all you need to know about structural steel design.

Steel Designers' Manual Fifth Edition: The Steel Construction Institute CRC Press

This book provides an overview of the common concepts and building blocks of patent management. It addresses executives in the areas of innovation, R & D, patent and intellectual property management as well as academics and students. The authors give valuable information on the

characteristics of patent and intellectual property management, based on the collaboration with companies and organizations from Europe, China, Japan, Argentina, Brazil, India, Canada and the US. A reference for managers who want to bring information technology innovation with a clear intellectual property strategy to the market. A very readable book. Thomas Landolt, Managing Director, IBM A really comprehensive, all-in book about Patents - strategy, value, management and commercialization. And not forgetting what they are for - foster innovation. Dr. Joerg Thomaier, Head of IP Bayer Group

X-Ray Protection John Wiley & Sons

This book is a printed edition of the Special Issue "Sustainable Business Models" that was published in Sustainability

Sign Installation Guide CRC Press

"Wood is suitable for use in multi-storey building construction with barely any restrictions. This is new and requires creative rethinking of tried and tested practices in wood construction: classical categories can be replaced by mixed construction methods as necessary within a project, which yields completely new possibilities in designing wood structures. The Manual provides architects, engineers and wood specialists with the essential expertise on the new systematic and construction methodology, from the design to prefabrication to the implementation on site. It lays the grounds for mutual understanding among everyone involved in the project, to facilitate the necessary cooperation in the integral planning and construction process." --Publisher.

Method of Organ Playing Transportation Research Board National Research

The series of International Symposia on Mining with Backfill explores both the theoretical and practical aspects of the application of mine fill, with many case studies from both underground and open-pit mines. Minefill attendees and the Proceedings book audience include mining practitioners, engineering students, operating and regulatory professionals, consultants, academics, researchers, and interested individuals and groups. The papers presented at Minefill symposia regularly offer the novelties and most modern technical solutions in technology, equipment, and research. In that way, the papers submitted for the Minefill Symposia represent the highest quality and level in the conference domain. For the 2020-2021 edition organizers hope that the papers presented in this publication will also be received with interest by readers around the world, providing inspiration and valuable examples for industry and R&D research.

Regional Industrial Buying Guide Detail

What escaped at Three Mile Island was not only radiation, but, more importantly for the nuclear power industry, public confidence in technology and technocracy, report Cantelon and Williams in their detailed account of the response of the Department of Energy to America's worst civilian nuclear power accident. What happened at Three Mile Island was a technological failure of monstrous proportions. Yet, the authors contend, the serious extent of the accident was caused by human error: technocrats blundered, lost control of technology, and, refusing to admit it, gave confusing, inconsistent, and jargon-laden explanations. There was a welter of information and misinformation. To sift out the truth that would enable them to write the history of this contemporary event, Cantelon and Williams relied on unpublished archival materials including logs of scientists and government officials on oral interviews with participants, and on reports of other government

agencies. The result is a significant history, one that shows how scientists and politicians responded to the unbelievable and unexpected as they tried to deal with a highly technical event in the glare of television lights and under the inquisitive and fearful eyes of the public. The danger was never real, yet for the nation and certainly for the immediate community around Three Mile Island, risk perceived was risk endured. Many of the residents of what became a war zone will never be the same, though radiation never touched them. Imagination and unconscious fears were far more important than any accurate perception of risk after a Nuclear Regulatory Commission official used "the term "meltdown "at a Friday afternoon news conference."

Epic Bike Rides of the World Springer

The Fraunhofer Competence Center Knowledge Management presents in this second edition its updated and extended research results. In doing so it describes best practices in knowledge management from leading companies and shows how to integrate such activities into the daily business tasks and processes, how to motivate people and which capabilities and skills are required. It concludes with an overview of the leading knowledge management projects in several European countries.

Crisis Contained Medical Physics Publishing Corporation

Provides guidelines for obtaining high-quality mammographic images while exposing patients to reasonable amounts of radiation. Appropriate physics measurements, responsibilities, and proper as well as time-efficient measurement techniques are discussed.

Bridge Design and Performance and Composite Materials Routledge

Thirty-five years of organ teaching and years of research as a musicologist have made Gleason's guide one of the most reputable and well-documented of its kind on the market today, providing future organists with the musical and technical foundation necessary for mastering the fine art of organ playing. Reflecting the latest principles of techniques and interpretation, it offers clear, basic instruction, providing users with a solid foundation and practical start to a lifetime profession in organ playing. Supporting technical practice with important and applicable background musical information, it includes a new section "An Outline of Study for the Beginning Organist" which shows users how to use the book in the most efficient manner to achieve their particular career goal. Also available in Braille for use in schools for the blind. Ideal resource manual for organ faculty and those interested in a background study of organ playing.

Dada Lonely Planet

As existing buildings age, nearly half of all construction activity in Britain is related to maintenance, refurbishment and conversions. Building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry. Given its importance to sustainable construction, the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future, especially in the developed parts of the world. Building Adaptation, Second Edition is intended as a primer on the physical changes that can affect older properties. It demonstrates the general principles, techniques, and processes needed when existing buildings must undergo alteration, conversion, extension, improvement, or refurbishment. The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work. The book quickly established itself as one of the core texts for building surveying students and

others on undergraduate and postgraduate built environment courses. This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings. It deals with any work to a building over and above maintenance to change its capacity, function or performance.

Title List of Documents Made Publicly Available Springer Science & Business Media

This book is the Proceedings of a State-of-the-Art Workshop on Connections and the Behaviour, Strength and Design of Steel Structures held at Laboratoire de Mécanique et Technologie, Ecole Normale, Cachan France from 25th to 27th May 1987. It contains the papers presented at the above proceedings and is split into eight main sections covering: Local Analysis of Joints, Mathematical Models, Classification, Frame Analysis, Frame Stability and Simplified Methods, Design Requirements, Data Base Organisation, Research and Development Needs. With papers from 50 international contributors this text will provide essential reading for all those involved with steel structures.

Kompass MDPI

The authors of the international bestseller Business Model Generation explain how to create value propositions customers can't resist Value Proposition Design helps you tackle the core challenge of every business — creating compelling products and services customers want to buy. This highly practical book, paired with its online companion, will teach you the processes and tools you need to create products that sell. Using the same stunning visual format as the authors' global bestseller, Business Model Generation, this sequel explains how to use the "Value Proposition Canvas" to design, test, create, and manage products and services customers actually want. Value Proposition Design is for anyone who has been frustrated by new product meetings based on hunches and intuitions; it's for anyone who has watched an expensive new product launch fail in the market. The book will help you understand the patterns of great value propositions, get closer to customers, and avoid wasting time with ideas that won't work. You'll learn the simple process of designing and testing value propositions, that perfectly match customers' needs and desires. In addition the book gives you exclusive access to an online companion on Strategyzer.com. You will be able to assess your work, learn from peers, and download pdfs, checklists, and more. Value Proposition Design is an essential companion to the "Business Model Canvas" from Business Model Generation, a tool embraced globally by startups and large corporations such as MasterCard, 3M, Coca Cola, GE, Fujitsu, LEGO, Colgate-Palmolive, and many more. Value Proposition Design gives you a proven methodology for success, with value propositions that sell, embedded in profitable business models."

New Corporate Governance Springer Nature

In an increasingly harmonized global patent landscape, few issues still distinguish the US patent system as much as its strict and often criticized duty of candor and its inequitable conduct doctrine. The EPO and most other countries around the world impose less burdensome disclosure duties upon patent applicants. What is there to learn from the experience in the US? Have these tools resulted in any benefit worth considering? Yet regardless of the disclosure duties imposed upon patent applicants, a deceptive conduct before the Patent Office could lead to unwarranted exclusive rights and have a negative impact on competition. Should antitrust law intervene? Is it a case of sham

litigation? This work attempts to answer those questions through a comparative analysis, examining the law and case law in the US and in the EU from both a patent and a competition law perspective and seeking a workable theory of harm.

Heroes of the Valley Springer Science & Business Media

Halli loves the old stories from when the valley was a wild and dangerous place when the legendary heroes stood together to defeat the ancient enemy, the bloodthirsty Trows. Nowadays heroics seem a thing of the past. But when a practical joke rekindles an old blood feud, Halli spots a chance for a quest of his own.

Sustainable Business Models Routledge

The second edition of *Benefits Management* has been updated with current examples, further insights from experience and recent research. It shows how the enduring challenges achieving business value from information systems and technology projects can be addressed successfully. The approach, which is synthesized from best practices, sound theories and proven techniques from a range of management disciplines, is exemplified from the authors' extensive experience of working with a wide range of organizations. The book includes examples from a wide variety of projects including non-IT projects. The book is written in an accessible style, ideal for practicing managers, and includes check lists and templates for using the processes, tools and techniques and real-life case studies of their application and impacts. The book now also includes: International survey results that reinforce the importance of the topic, the key management issues and evidence

of how the more successful organizations' practices are closely aligned with those described in the book. A *Benefits Management Maturity* diagnostic which enables organizations to understand the reasons for their current investment success levels and then how to increase them. Discussion of the role and contribution *Project Management Offices (PMOs)*: how they can improve the delivery of value IT projects. Further practical advice and guidance on *Program and Portfolio Management*, including findings from the authors' recent research in several large organizations.

Value Proposition Design Springer Science & Business Media

Beginning with the fundamentals of carpentry work within a domestic construction setting, this book outlines which tools are required, and examines their care and proper use before covering the interpretation of technical drawings. It goes on to explain a wide range of first-fixing operations prior to plastering, and second-fixing operations after plastering. Each chapter covers the subject in great detail, with step-by-step illustrations and text to provide the reader with a complete picture of the sequence of work required to carry out each job. *Goring's Manual of First and Second Fixing Carpentry* has been updated to take recent developments in the building trades into account, and is also fully up to date with current industry best practice. Printed in full colour throughout, new chapter has been incorporated to address the sharpening of traditional saws. The breadth of coverage and easily accessible 'how-to' approach makes this book an ideal resource for apprentices taking NVQs and those following Construction Awards within the Wood Occupations from City & Guilds/Construction Skills. The technical detail and practical focus ensures that this book will be a vital purchase for all students, and an essential reference for any experienced carpenter or joiner.
