Grammar Galaxy: Blue Star (Volume 5) is a complete language arts curriculum for elementary students (sixth graders or students who have completed Red Star

or its equivalent). Short, comical stories teach concepts in a memorable way. Students discover the havoc that ensues when the evil Gremlin tampers with the English language. He has a bleak mood and sarcastic tone set for the month. Parallel writing structure is banned. The Onomatopoeia Union goes on strike and none of these words can be used. The royal English children invite students to become fellow grammar guardians in order to save the galaxy from crises like these. Teachers or students read the text themselves. Vocabulary words are defined in the text. Discussion questions follow each lesson to check for understanding. Students then complete a corresponding mission in the mission manual that reinforces the concepts. Teachers provide as much help as

necessary. Grammar Galaxy: Blue Star, the fifth in a series of language arts texts for first to eighth graders, teaches: - literary concepts -vocabulary -spelling strategies -grammar -composition and speaking Grammar Galaxy: Blue Star is a great choice for homeschoolers, teachers, and parents: -Whose student is at the 6th grade level or above or has mastered Red Star skills -Who want their student to have excellent reading, writing, and speaking skills -Who want their student to spend less time doing seatwork and more time reading and writing

Position Paper Olivia & Hill Press Grammar is the starting point of the syllabus. The problem-solving approach to grammar helps students to work out for themselves the meaning and use of

structures. Practice activities help students use the grammar in everyday situations. Motivating topics draw on students' own experiences and develop their interest in the world around them. Integrated skills work presents students with a variety of activities that develop their confidence and fluency in speaking, reading, writing and listening. The variety of texts, discussions and dialogues is supported by practical tasks that help students to use and understand the new language. A systematic vocabulary syllabus combined with learning-to-learn skills encourage students to develop their own strategies for remembering new words. A lively photo-story in the first two levels presents informal language and a cultural reference as it follows the

everyday lives of a group of British teenagers. The two upper levels contain a series of free-standing short stories which develop extensive reading skills. Practical 'Learn to learn' features help students to develop their study skills, record new vocabulary and organize their language learning. You can start the course either with Pacesetter Starter, which is for beginners, or Pacesetter Elementary, which is suitable for those who have achieved a basic level of English. A helpful review section at the end of each unit summarizes the main learning points and provides a reference for revision work. Three consolidation units in each level revise key grammar points, vocabulary and dialogues through controlled and freer activities. The projects at the end of these units

provide an opportunity for students to produce more substantial and personal pieces of work.

Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The *Well-Trained Mind* will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the

trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," when the building blocks of information are absorbed through memorization and rules; the middle school "logic stage," in which the student begins to think more analytically; and the high-school "rhetoric stage," where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of

parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. The Well-

Trained Mind will give you the tools you'll need to teach your child with confidence and success.

English Grammar OUP Oxford Presents involving, contemporary themes integrated within a grammar

syllabus aligned with the CEFR and Cambridge English (Key, Preliminary and First) plus Trinity (ISE 0, I and II) exams. Teaching English Language Learners K-12 Multilingual Matters What English Teachers Need to Know, a set of companion texts designed for pre-service teachers and teachers new to the field of ELT, addresses the key question: What do English language teachers need to know and be able to do in order for their students to learn English? These texts work for teachers across different contexts (countries where English is the dominant language, one of the official languages, or taught as a foreign language); different levels (elementary/primary, secondary, college or university, or adult education); and different learning purposes (general

English, workplace English, English for academic purposes, or English for specific purposes). Volume I, on understanding learning, provides the background information that teachers need to know and be able to use in their classroom. Volume II, on facilitating learning, covers the three main facets of teaching: planning, instructing, and assessing. Volume III, on designing curriculum, covers the contexts for, processes in, and types of ELT curricula—linguistic based, content-based, learner-centered, and learning-centered. Throughout the three volumes, the focus is on outcomes, that is, student learning. Features • Situated in current research in the field of English language teaching and other disciplines that inform it • Sample data, including

classroom vignettes • Three kinds of activities/tasks: Reflect, Explore, and Expand

The role of English in the global arena has prompted official language-in-education policy makers to adopt language education policies to enable its citizens to be proficient in English and to access knowledge. Local educational contexts in different countries have implemented English education in their own ways with different pedagogical goals, motivations, features and pedagogies. While much of the research cited in English language planning policy has focused on macro level language policy and planning, there is an increasing interest in micro planning, in particular teacher agency in policy response. Individual teacher agency is a

multifaceted amalgam, not only of teachers' individual histories, professional training, personal values and instructional beliefs, but also of how these interact with local interpretations and appropriations of policy. *Teacher Agency and Policy Response in English Language Teaching* examines the agency of the teacher in negotiating educational reforms and policy changes at the local and national levels. Chapters in the book include: English language teaching in China: teacher agency in response to curricular innovations Incorporating academic skills into EFL curriculum: teacher agency in response to global mobility challenge Teacher agency, the native/nonnative dichotomy, and "English Classes in English" in Japanese high Schools Teacher-designed
