Match-fixing has become a widespread international problem in recent years. It includes everything from bribery of players, to putting undue influences on the owners of the soccer clubs, managers, coaches and others who have the ability to affect the final scores. In addition, match-fixing spills over into the arena of illegal betting (in person and online), which creates a host of additional organized crime opportunities, including human trafficking, prostitution, drugs, extortion and even terrorism. This timely volume brings together international contributions with an aim is to increase awareness of the problems associated with match-fixing and the degree to which key agents in sport, particularly young people, are vulnerable. The contributions are based on INTERPOL's Global Experts Meeting in Singapore, in November 2012, which brought together key speakers to discuss issues surrounding match-fixing and how to combat corruption in football through channels of education. The purpose of this meeting was to identify ways that academia can play a role in developing and implementing training modules and academic courses, including certification procedures, to prevent match-fixing and develop lines of study at all educational levels. This unique work reflects the gravity of the situation around the world together with possible solutions.

From small-town life to the national stage, from the boardroom to Capitol Hill, athletic contests help define what we mean in America by success. And by keeping women from playing with the boys on the grounds that they are inherently inferior to men, society relegates them to second-class status in American life. In this forcefully argued book, Eileen McDonagh and Laura Pappano show in vivid detail how women have been unfairly excluded from participating in sports on an equal footing with men. Using dozens of colorful examples from the world of contemporary American athletics--girls and women trying to break through in high school football, ice hockey, wrestling, and baseball, to name just a few--the authors show that sex differences are not sufficient to warrant exclusion in most sports, that success usually entails more than brute strength, and that the special rules for women in many sports do not simply reflect the "differences" between the sexes, but actively create and reinforce them. For instance, if women's bodies give them a physiological advantage in endurance sports like the ultra-marathon and distance swimming, why do so many Olympic events--from swimming to skiing to running to bike racing--have shorter races for women than men? Likewise, why are women's singles games in badminton limited to 11 points while men's singles go to 15? Surely female badminton players can endure four more points. Such rules merely reinforce a "difference" for social--not competitive--purposes. An original and provocative argument to level the athletic playing field, *Playing with the Boys* issues a clarion call for sex-sensible policies in sports as another important step toward the equality of men and women in our society.
