British television, stage and film actor Tom Hiddleston has a gift for playing the villain. Still only in his thirties, he has become one of Britain's great acting exports and has brought both the big and small screen to life for audiences around the world. First emerging on British television and stage - winning the Lawrence Olivier Award in 2008 and appearing in Othello opposite Ewan Macgregor - Hiddleston's breakthrough came when he was cast as Loki in the 2011 Thor film, and again in The Avengers (2012) and the 2013 blockbuster Thor: The Dark World, a role that cemented him as a star. He has since worked with legends of stage and screen, including Woody Allen and Steven Spielberg, and recently won a Golden Globe for his role in the BBC adaptation of John Le Carre's The Night Manager. In this book, Sarah Marshall traces Tom Hiddleston's career to date, from his early introduction to theatre as a child, through to his role at the heart of the blockbuster Marvel Universe and leaves few readers doubting the incredible talent of this modern star.

[Traditional Japanese Crest Designs](#) Abrams

An indispensable reference for design professionals on selecting and using materials in new ways to make their designs ever more efficient and effective Today's technological advancements have resulted in traditional materials being used in increasingly innovative ways; designers are able to push the materials they use to their limits. Understanding these materials helps designers make inspired, practical decisions with confidence. The Materials Sourcebook for Design Professionals provides comprehensive, accurate information about the basic materials with which designers work on a daily basis, as well as a complete breakdown of new and exciting developments in high-tech materials. This inspiring and useful book is organized into six main sections on all the major design material groups: Metal, Plastic, Wood, Plant, Animal, and Mineral. Each section is broken down into chapters examining individual types of material within each larger group. Nearly one hundred material types are featured, each one supported by examples of how it can be used in a variety of industries, an outline of its most desirable properties, and details about its form and texture. With 450 vibrant illustrations and a clear and accessible layout, this long-term reference tool covers everything designers need to know about the materials they use habitually so they can continue to use them better.

Family crests (mon) have been a Japanese tradition since the eleventh century, when they decorated the costumes and carriages of courtiers. Later, they were used to identify warriors on the battlefield, as heraldic decorations on formal costumes, and as ornament on the kimonos of the common people. Small, compact, and graceful, with a strong sense of style, crest designs are ideal for spot illustrations, as logos, or for any graphic purpose requiring the classic simplicity, purity, and strength of Japanese design. This volume presents a total of 540 permission-free motifs, carefully selected for graphic impact and usefulness from several thousand crests known to exist. Featured are a wide variety of stylized designs depicting plants, animals, natural phenomena, geometric shapes, and manufactured objects. Among the subjects included in this selection are such traditional Japanese motifs as bamboo, crane, lightning, cherry blossom, peony, plum blossom, wave, rice, circle, and hollyhock. Immensely useful, this volume of permission-free designs is not only an invaluable source of graphic material for artists, designers, and craftspeople, but a fascinating picture book of Japanese culture.

This stylishly illustrated book looks back at the future of air travel and is as sleek and elegant as the Concorde aircraft it celebrates. When the first commercial Concordes zoomed off the runways in Paris and London in the late 1960s, crossing the Atlantic in just under three hours, they established a new standard for luxury flight. Powered by 38,000 pounds of thrust and easily recognizable with its delta wing and drooping nose, the Concorde jet embodied the pinnacle of aviation technology and industrial design. It quickly became the preferred mode of transatlantic flight for superstars and business moguls alike. Opening with a lively history of the jet and how it changed travel, the book focuses on the look and feel of the Concorde.

Photos of the jet's evolving interiors show how the original, starkly designed cabin gave way to luxury seats and interiors designed by the likes of Sir Terence Conran and Andrée Putman. Filled with fascinating historical and technical background, and drawn from the author's personal collection of more than one thousand Concorde-related objects, this elegant book offers rarely seen historical photography and firsthand contributions from the people who helped create the Concorde experience from take-off to landing and beyond.

Throughout history, patterns have come in countless permutations of motif, colour-way and scale. Yet what all have in common is the regularity of repetition, that insistent rhythm that animates a flat surface with a sense of movement and vitality and gives it depth. Evident in the arrangement of petals on a flower head, the branching growth of stems and vines, the spirals of a seashell - pattern is inherent in the natural world that surrounds us. Powerful and transformative, pattern has an irrepressible joie de vivre. With more than 1,500 illustrations of patterns from all ages and cultures, Pattern Design is a visual feast. This comprehensive compendium is arranged thematically according to type, with chapters on Flora, Fauna, Pictorial, Geometric and Abstract designs. These broad categories are supplemented by in-depth features highlighting the work of key designers from the rich history of pattern-making - such as William Morris, Sonia Delaunay, Charles and Ray Eames, Lucienne Day and Orla Kiely - along with sections detailing the characteristic motifs of key period styles from Baroque to Art Deco.

Cooking 4 Change is the brainchild of celebrated New Zealand artist Dick Frizzell, his business partner Christian Kasper and TV host Erin Simpson. They asked a wide range of New Zealand celebrities to share their all-time favourite dishes in order to raise money for longstanding local charities Paw Justice, Leukaemia and Blood Cancer New Zealand, Starship Foundation and Auckland City Mission. What resulted is a diverse selection of recipes and intimate cooking stories from a raft of our favourite personalities who want to make a difference. The recipes and stories are accompanied by sumptuous photography, mostly taken inside each celebrity's own kitchen. In true New Zealand style, Cooking 4 Change showcases the amazing results Kiwis can achieve when we all work together and give back to some of our hardest-working charities.

You may have noticed that most car design books tend to focus on exterior design, as this is what most people think of as Car Design. However, with a growing demand in the industry for interior designers, I hope that this book will encourage (transportation design) students and (car) designers to take a much needed closer look at this equally important aspect of car design. I have always enjoyed teaching and being able to incorporate my industry experience to deliver pithier lessons. Through these books, I wanted to expand on this experience to reach a larger audience of not only students, but also those just curious about car design, case studies or perhaps another designer's point of view. As this is a rather hefty topic, I have split this book into 3 Volumes: Volume 1 has a brief history section looking back at a few of my favorite heritage car interiors and what shaped them, as well as the basics of research, sketching, and rendering. Volume 2 covers five Case Studies from SEAT DESIGN, V-Vehicle Company, Qoros Automotive and a couple of projects from Nissan Design America. This covers the concepts for these interiors and how they started and developed, the concept sketches and the thought process behind them. Volume 3 is geared at students and professionals and runs through the design process. "Lets design a car interior" mimics a University design project, this spans from writing a project brief through research, ideation and execution.
