This book is about the tumultuous and even passionate relationship between New Education and Educational Sciences, which are regarded as an inseparable «couple», intrinsically linked and surprisingly fruitful. Yet they remain irreconcilable and are mutually contradictory in a number of their elements and characteristics. Do Educational Sciences offer a scientific base or ideological support for New Education? Do the numerous new educational initiatives and reforms provide a «laboratory» for Educational Sciences or alternatives to the new scientific paradigms? Is this at the risk of their merging? And what is the price of these tensions? Specialists in the history of Educational Sciences and New Education from various geographical, cultural and disciplinary horizons explore the complex links between this powerful reforming movement and the nascent disciplinary field

that emerged during the first half of the 20th century. Cet ouvrage analyse les relations tumultueuses - passionnelles même - de l'Education nouvelle et des Sciences de l'éducation: un couple indissociable - intrinsèquement lié et d'une étonnante fécondité - autant qu'inconciliable, nombre de leurs présupposés et caractéristiques se contredisant mutuellement. Les Sciences de l'éducation offrent-elles la base scientifique ou l'appui idéologique de l'Education nouvelle ? Les nombreuses expériences et réformes éducatives constituent-elles des laboratoires des Sciences de l'éducation ou des alternatives aux nouveaux paradigmes scientifiques ? Au risque de leur fusion ? Au prix de quelles tensions ? Des spécialistes de l'histoire des Sciences de l'éducation et de l'Education nouvelle d'horizons géographiques, culturels et disciplinaires divers explorent les rapports complexes entre ce puissant mouvement réformiste et le champ disciplinaire naissant durant la première moitié du 20e siècle.

Henry O. Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill, New Jersey, USA The Fourth International Congress on Mathematics Education was held in Berkeley, California, USA, August 10-16, 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries; at least half

of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders; approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses; they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo-Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress; illness prevented his planned attendance but he sent a brief presentation entitled, "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations, and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

The 1981 Supplement adds more than 3000 entries to the approximately 10,500 listed in the original volume and in the 1965 and 1971 Supplements. Like its predecessors, this volume provides a full list of the secondary sources related to Canadian higher education - books, articles, theses, dissertations, and reports published from 1971 to 1980. The reporting, arrangement of entries, and overall organization of the material remains the same as in the 1971 Supplement.

We task fewer industries to think about the future than we ask

from education. In societies where constant change is the norm, schools today must prepare students to be successful in environments and contexts that may differ greatly from what we experience today. But, are we really thinking about the future? With contributions from four continents, this book reveals a 'snapshot' of some of our best thinking for building new education futures. Diverse experiences, visions, and ideas are shared to help spark new thinking among educators and policymakers, provoke conversation, and facilitate new ideas for meeting human development needs in a rapidly transforming world. New York State Education Department Bulletin Hunter, Rose In 2010 the Education Network organized an event that examined the state of school infrastructure in the region and the financial role of the private sector. Infrastructure and Learning in the Twenty-First Century was held in Santiago, Chile, on October 26 and 27, 2010. This book contains the presentations made at the conference, edited and, in some cases, revised for publication. The chapters of the book follow the conference agenda, which focused on designing, financing, building, and maintaining school buildings.

Histoires de Kanatha - Histories of Kanatha WestBow Press Light of the World School--known by its Spanish name, Escuela Luz del Mundo (ELM)--was initiated in the fall of 2007 with eighteen eager sixth graders in a renovated halfway house. Located on a corner infamous in Albuquerque, New Mexico, for drug dealing and prostitution in the city's most economically and socially challenged neighborhood, ELM was an independent, progressive Christian middle school. There are two primary purposes for the book: (1) to describe unique features of ELM that were grounded in a theoretical framework created from the "highly effective school study" as a means to highlight how to improve public schools and (2) to draw attention to the need for making education for every student the nation's top priority.

Para evitar la cautividad cultural, los fundamentos de la educaci—n cristiana deben ser repensados por cada generaci—n. De no hacerlo, dice el autor, los educadores cristianos Çcorren el riesgo de perpetuar ideas y prçcticas anticuadas, ajenas al evangelioÈ. ÇAl explorar con criterio los diversos fundamentos que han predominado y predominan en el pensamiento evangŽlicoÈ, continœa el autor, Çlos educadores pueden enfrentar mejor las necesidades de hoy y los retos del futuroÈ. En Cuestiones fundamentales de la educaci—n cristiana, el autor mismo se entrega a este proceso de evaluaci—n cr'tica, con importantes resultados. El autor llama a los educadores evangŽlicos a Çreafirmar las verdades b'licasÈ, que constituyen la Çautoridad esencial para nuestra teor'a y prçcticaÈ, y a Çincorporar las verdades de otras disciplinasÈ, proceso que tiene que estar Çsujeto a la continua autoridad de la Palabra de DiosÈ.

This bibliography is the first of a series of studies about higher education in Canada sponsored by the committee on the History of Higher Education in Canada established by the National Conference of Canadian Universities. Among its nearly 4,000 entries are included the books, pamphlets, theses, dissertations, and articles in journals and magazines which supply the context and commentary on the history of Canadian higher education. Part I of the Bibliography provides the context; our universities do not exist in a vacuum—they are part of the economic, political, religious and social life of the community. Part I, therefore, includes a section on Canadian Culture, listing histories of Canada and its provinces, of its religious and social institutions, of its art, its economy, racial groups, relations with other countries. In order to study higher education in relation to other levels of education, another section lists works concerned with educational developments and problems at all levels. Part II lists the works bearing directly on higher education in Canada, and includes sections on History and Organization, Curriculum and Teaching, The Professor, The Student. Entries are arranged in chronological order in all sections in order to present the progressive development of each topic, and a full Index enables easy reference by author. No distinction has been drawn between English- and French-language publications: Chemistry and Chimie are one subject. The relative proportion of English and French entries in a section is often significant as indicating differences in

the frequency and importance of particular fields of study in our colleges.
