This collection of short stories, some semi-autobiographical, by Marie Luise Kaschnitz (1901-74),

the eminent German novelist and poet, reflects many of the themes to be found throughout her fiction, such as the dread of moral anarchy which leaves nothing in its wake, and the shaping of individual destinies by loneliness, insecurity and fear. Usually told from a woman's viewpoint, her works feature strong female characters whose inner strength enable them to overcome their fears and accept their fates with stoic determination. Kaschnitz's chief concern is the human condition, giving her work a continuing relevance; she confronts such universal issues as growing old, growing up and the loss of religious faith as well as those which have a more contemporary resonance, including the social problems of working parents and adoption.

In this important book Niklas Luhmann - one of the leading social thinkers of the late 20th century - analyses the emergence of 'love' as the basis of personal relationships in modern societies. He argues that, while family systems remained intact in the transition from traditional to modern societies, a semantics for love developed to accommodate extra-marital relationships; this semantics was then transferred back into marriage and eventually transformed marriage itself. Drawing on a diverse range of historical and literary sources, Luhmann retraces the emergence and evolution of the special semantics of passionate love that has come to form the basis of modern forms of intimacy and personal relationships. This classic book by Luhmann has been widely recognized as a work of major importance. It is an outstanding contribution to social theory and it provides an original and illuminating perspective on the nature of modern marriage and sexuality.

"One of those rare biographical novels that bring a whole world to life in a way that lingers in memory." —Jay Parini, author of *Borges and Me* This absorbing, sensitive novel portrays a famed author in a moment of crisis: an aging Hugo von Hofmannsthal returns to a summer resort outside of Salzburg that he visited as a child. But in the spa town where he once thrilled to the joys of youth, he now feels unproductive and uninspired, adrift in the modern world born after World War One. Over ten days in 1924 in a ramshackle inn that has been renamed the Grand Hotel, Hofmannsthal fruitlessly attempts to complete a play he's long been wrestling with. The writer is plagued by feelings of loneliness and failure that echo in a buzz of inner monologues, imaginary conversations and nostalgic memories of relationships with glittering cultural figures. *Palace of Flies* conjures up an individual state of distress and disruption at a time of fundamental societal transformation that speaks eloquently to our own age.

Representations of gender in learning materials convey an implicit message to students about attitudes towards culturally appropriate gender roles for women and men. This collection takes a linguistic approach to exploring theories about gender representation within the sphere of education and textbooks, and their effects on readers and students within an international context. In the opening section, contributors discuss theories of representation and effect, challenging the conventional Althusserian model of interpellation, and acknowledging the challenges of applying Western feminist models within an international context. Following chapters provide detailed analyses focusing on a number of different countries: Australia, Japan, Brazil, Finland, Russia, Hong Kong, Nigeria, Germany, Qatar, Tanzania, and Poland. Through linguistic analysis of vocabulary associated with women and men, content analysis of what women and men say in textbooks, and discourse analysis of the types of linguistic moves associated with women and men, contributors evaluate the extent to which gendered representations in textbooks perpetuate stereotypical gender roles, what the impact may be on learners, and the ways that both teachers and learners interact and engage with these texts.

"This book made me happy in the first five pages." —AJ Jacobs, author of *The Year of Living Biblically: One Man's Humble Quest to Follow the Bible as Literally as Possible* Award-winning author Gretchen Rubin is back with a bang, with *The Happiness Project*. The author of the bestselling *40 Ways to Look at Winston Churchill* has produced a work that is "a cross between the Dalai Lama's *The Art of Happiness* and Elizabeth Gilbert's *Eat, Pray, Love*." (Sonya Lyubomirsky, author of *The How of Happiness: A Scientific Approach to Getting the Life You Want*) In the vein of Julie and Julia, *The Happiness Project* describes one person's year-long attempt to discover what leads to true contentment. Drawing at once on cutting-edge science, classical philosophy, and real-world applicability, Rubin has written an engaging, eminently relatable chronicle of transformation.

This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an

appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks; however no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set timetable for the publication of the whole series. Each volume will be a self-contained work, complete in itself. The order in which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervene where questions of delineation between individual volumes are concerned. It is felt that this (*modus operandi*) is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.

Education systems in developed countries have come to prioritise the raising of standards, while also pursuing some degree of social inclusion and inclusive schooling. However, these policies represent different and often conflicting values and approaches to education. Central to these moves has been the specific thrust to include more students with disabilities and special educational needs within general rather than specialist education. The basic dilemma is whether to recognise or not to recognise differences because either way there are negative implications associated with stigma, devaluation, rejection or denial of relevant opportunities. The dilemmas of difference relevant to children with disabilities are about: identification - whether to identify and how or not ; curriculum - how much of a common curriculum is relevant to them ; placement - to what extent they learn in ordinary/general schools and classes or not. Dilemmas of Difference, Inclusion and Disability integrates recent empirical research and includes an international case study that examines the perspectives of education practitioners and policy makers in specific school systems in the UK, USA and the Netherlands.

This book starts from three observations. First, the use of humour is a complex, puzzling, and idiosyncratically human form of behaviour (and hence is of scientific interest). Second, there is currently no theory of how humour works. Third, one useful step towards a theory of humour is to analyze humorous items in precise detail, in order to understand their mechanisms. The author begins by considering how to study jokes rigorously: the assumptions to make, the guidelines to follow and the pitfalls to avoid. A critique of other work on humour is also provided. This introduces some important concepts, and also demonstrates the lack of agreement about what a theory of humour should look like. The language devices used in various jokes, such as puns or humour based on misinterpretation, are analysed in detail. The central part of the book develops, and demonstrates, proposals for how best to analyze the workings of simple jokes. Finally, the author makes some general suggestions about the language devices that seem to be central to the construction of jokes. The Linguistic Analysis of Jokes will be invaluable for researchers and advanced students of humour research, linguistics and cognitive science.
