This volume discusses how diplomacy’s contribution to the effectiveness of foreign policy has been undervalued in the United States by governments, the foreign policy community, and academics. Chapters raise awareness of the importance of American diplomacy, what it can and can’t achieve, and how it may be strengthened in the interests of international peace and security.

Berlinwalks/Four Intimate Walking Tours of Berlin's Most Historic Neighborhoods, With Maps, Photos, and a Select List of Restaurants, Hotels, and More Routledge

"The rapid and radical transformations of the Nazi Era challenged the ways German Jews experienced space and time, two of the most fundamental characteristics of human existence. In Space and Time under Persecution, Guy Miron documents how German Jews came to terms with the harsh challenges of persecution-from social exclusion, economic decline, and relocation to confiscation of their homes, forced labor, and deportation to death in the east-by rethinking their experiences in spatial and temporal terms. Miron first explores the strategies and practices German Jews used to accommodate their shrinking access to public space, in turn reinventing traditional Jewish space and ideas of home. He then turns to how German Jews redesigned the annual calendar, came to terms with the ever-growing need to wait for nearly everything, and developed new interpretations of the past. Miron's insightful analysis reveals how these tactics expressed both the continuous attachment of Jews to key elements of German bourgeois life as well as their struggle to maintain Jewish agency and express Jewish defiance under Nazi persecution"--

The two volumes of The Oxford Handbook of Mobile Music Studies consolidate an area of scholarly inquiry that addresses how mechanical, electrical, and digital technologies and their corresponding economies of scale have rendered music and sound increasingly mobile-portable, fungible, and ubiquitous. At once a marketing term, a common mode of everyday-life performance, and an instigator of experimental aesthetics, "mobile music" opens up a space for studying the momentous transformations in the production, distribution, consumption, and experience of music and sound that took place between the late nineteenth and the early twenty-first centuries. Taken together, the two volumes cover a large swath of the world-the US, the UK, Japan, Brazil, Germany, Turkey, Mexico, France, China, Jamaica, Iraq, the Philippines, India, Sweden-and a similarly broad array of the musical and nonmusical sounds suffusing the soundscapes of mobility. Volume 2 investigates the ramifications of mobile music technologies on musical/sonic performance and aesthetics. Two core arguments are that "mobility" is not the same thing as actual "movement" and that artistic production cannot be absolutely sundered from the performances of quotidian life. The volume's chapters investigate the mobilization of frequency range by sirens and miniature speakers; sound vehicles such as boom cars, ice cream trucks, and trains; the gestural choreographies of soundwalk pieces and mundane interactions with digital media; dance music practices in laptop and iPod Djing; the imagery of iPod commercials; production practices in Turkish political music and black popular music; the aesthetics of handheld video games and chiptune music; and the mobile device as a new musical instrument and resource for musical ensembles.

Victims and Perpetrators: 1933-1945 Camden House

Since Unification and the end of the Cold War, Berlin has witnessed a series of uncommonly intense social, political, and cultural transformations.

While positioning itself as a creative center populated by young and cosmopolitan global citizens, the “New Berlin” is at the same time a rich site of historical memory, defined inescapably by its past even as it articulates German and European hopes for the future. Cultural Topographies of the New Berlin presents a fascinating cross-section of life in Germany’s largest city, revealing the complex ways in which globalization, ethnicity, economics, memory, and national identity inflect how its urban spaces are inhabited and depicted.

BERLIN INSIGHT POCKET. Prestel Pub

This volume examines the politics of history and memory in Germany today through a review and analysis of seminal developments in the current discourse on 1933 - 1945. An interdisciplinary work, this book examines questions of representing the past from the perspective of literary studies, social psychology, film studies, history, and cultural studies. Themes include transgenerational memory and remembrance, the air war and German literature, commemoration and silences, transnational reconciliation, and historical consciousness in the German present. The collected essays make clear that as the current discourse contributes toward an historically informed, differentiated understanding of individuals’ roles in the Third Reich and World War Two, victim and perpetrator identities cannot be defined as exclusive from one another. The discourse emphasizes personal over collective experience and answers questions of responsibility and guilt on the individual level.

Maps for the Future Walter de Gruyter GmbH & Co KG

Berlin is a city that visionary architects, city planners, social revolutionaries, and ruling kaisers have all tried to reshape. As a result, it is sheathed in layers of modern history, each providing a chapter in the city's story of constant change. Its rich atmosphere of energy made it the intellectual hub of early twentieth-century Europe: its lively theaters, cafes, and bawdy street life drew visitors from around the world. The four intimate walking tours in this book reveal Berlin's breathtaking history as a small medieval commercial town; as the capital of a nineteenth-century Prussia; as the modern dreamscape of the Weimar Republic; as the "new Rome" of the Third Reich; as a divided city, and now, as the capital of a reunited Germany. Readers will be taken through Merlin Mitte, site of the Brandenburger Tor and the dismantled Wall; past the old stones and new synagogues of the Jewish Quarter; among the working-class neighborhood of Prenzlauer Berg; and into the politically vibrant Kreuzberg. Berlinwalks also explores the city's cultural development through the creations of its artists, architects, and novelists, among them Bertolt Brecht, Christopher Isherwood, and Kathe Kollwitz. The book also features maps, more than forty black-and-white photographs, general advice and information, and a select list of restaurants, hotels, and shops. Like the other volumes in this series, Berlinwalks is written for people who want to learn when they travel, not just see.

This study of contemporary German poetry represents the first attempt to examine comprehensively and at some length the lyric response to the unification period. It sets out to investigate, by means of close textual analysis, whether the German 'Wende' was also a turning-point for poetry, exploring how GDR poets responded both to the revolutionary events of 1989 and subsequently to the new, united Germany. An introductory chapter considers what is distinct about poetry as a genre, especially under censorship or amid historic change, as well as outlining the post-unification

'Literaturstreit'. The following chapter offers a survey of the poet's role in the GDR from 1949 until 1989. Two central chapters then gather the poetry of the 'Wende' and unification as a corpus of work and characterize it, through the elucidation of recurring themes, motifs and techniques. The volume strikes a balance between giving a general overview of poetry written in 1989-1996 and focusing on individual poets whose work is particularly compelling. After identifying broad trends across a wide range of individual poems, collections and anthologies, single chapters therefore examine in greater depth the work of Volker Braun and Durs Grünbein. The concluding chapter addresses the issue of a separate GDR literature. Finally, an extensive, structured bibliography is provided, covering the poetry, literary criticism and cultural history of the period.

Insight Pocket Guide University of Toronto Press

This book examines the controversial younger generation of poets who were 'born into' the established socialist state of the German Democratic Republic. Introducing an extraordinary decade of GDR poetry, it focuses on the ways in which this experience is translated into the metaphorical and linguistic structures of their texts, and the ways in which they set about breaking the literary and political boundaries which were imposed upon them, radicalizing notions of the subject, of history, of language, of the poetic enterprise itself. The volume also assesses what will remain - after the fall of the Wall, and the revelations of the 'Stasi' files - of this radical poetic project. This unique study examines the poetry of some fifty writers from both the official and the underground publishing scenes, offering them up as a case-study in the vexed negotiations between aesthetics, ethics, and politics, and as a contribution to the rewriting of German literary history after 1945.

Queer Lives across the Wall examines the everyday lives of queer Berliners between 1945 and 1970, tracing private and public queer life from the end of the Nazi regime through the gay and lesbian liberation movements of the 1970s. Andrea Rottmann explores how certain spaces - including homes, bars, streets, parks, and prisons - facilitated and restricted queer lives in the overwhelmingly conservative climate that characterized both German postwar states. With a theoretical toolkit informed by feminist, queer, and spatial theories, the book goes beyond previous histories that focus on state surveillance and the persecution of male homosexuality.
