A controversial psychological examination of how soldiers' willingness to kill has been encouraged and exploited to the detriment of contemporary civilian society. Psychologist and US Army Ranger Dave Grossman writes that the vast majority of soldiers are loath to pull the trigger in battle. Unfortunately, modern armies, using Pavlovian and operant conditioning, have developed sophisticated ways of overcoming this instinctive aversion. The mental cost for members of the military, as witnessed by the increase in post-traumatic stress, is devastating. The sociological cost for the rest of us is even worse: Contemporary civilian society, particularly the media, replicates the army's conditioning techniques and, Grossman argues, is responsible for the rising rate of murder and violence, especially among the young. Drawing from interviews, personal accounts, and academic studies, *On Killing* is an important look at the techniques the military uses to overcome the powerful reluctance to kill, of how killing affects the soldier, and of the societal implications of escalating violence.

"This laugh-out-loud hilarious book is mandatory reading for parents, and should be taught in schools as the "cautionary tale" portion of Sex Ed. Run don't walk to buy it, and if you're a baby

with lethal parents, crawl don't roll." --Rob Kutner (writer, *The Daily Show*, *Conan*, *The Future According To Me*) "Unlike babies themselves, copies of Jacob Sager Weinstein's book can be bought and sold on the open market. Buy two and bring joy and laughter to the lives of a copy-less couple." --Jose Arroyo (writer, *Conan*) "The "s-a-g-e" in Jacob's middle moniker indicates exactly that. He is a whimsically wise and hysterically funny fellow whom any child (or book buying adult) would be wise to listen to." --Dennis Miller "If you don't buy this book and then your baby dies, how are you going to feel? Pretty bad, I imagine." --Larry Doyle (writer, *I Love You Beth Cooper*; *Go, Mutants!*; *The Simpsons*) Have you ever read a parenting book that left you feeling inadequate and/or terrified? In other words, have you ever read any parenting book whatsoever? If so, you need *How Not To Kill Your Baby*, a hilarious parody of every fear-mongering, crazy-making pregnancy and parenting manual you've ever cringed over. Just consider the following advice: \* "As you know if you have ever seen someone give birth in a movie or television show, all newborns emerge with adorable round faces, pudgy limbs, and twinkling eyes. If, by contrast, the nurse hands you a tiny, squawling creature with the face of an old man and skin covered in goo, hand it back immediately. There has clearly been some sort of mixup with a nearby ward for senile midgets." \* "It's essential that you keep careful track of your baby's every bodily function. That way, when she is president of the United States and a paranoid-minded conspiracy movement springs up denying her eligibility for the position, you will have documentary proof that she did, in fact, poop on U.S. soil at 8:23AM on February 23." \* "When choosing a nursery school, make sure to visit first, and ask the teachers about their educational philosophies. Then ask about their criminal records. If they insist they have none, you may need to keep asking, perhaps while shining a bright light in their face. Also, take their fingerprints, then follow them home from a discreet distance and go through their trash. Oh, and don't forget to thank them for their dedication to helping the young!" \* "It is easy to adjust your parenting techniques as your children grow: simply do and say the exact same things, but raise your voice by one decibel for every year of your child's age." *How Not To Kill Your Baby* is printed on child-safe, 100% piranha-free paper, and bound without the use of exploding staples. You'll get no such promise from *What To Expect When You're Expecting*.

How Not To Kill Your Baby is the book for you... unless you're some kind of baby-hating creep who wants to parent all wrong.

From the physician behind the wildly popular NutritionFacts website, *How Not to Die* reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In *How Not to Die*, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen—a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

Li Xuelian, married to Qin Yuhe, is pregnant with their second child. Happy news? Not in China, with its one-child policy. It is a crime. What is she to do? Her only option is divorcing before the

second child is born. "Once the baby has entered into the household registry, we'll marry again. The baby will be born after the divorce, so we'll each have one child when we marry again. No law says couples with one child can't marry." Perfect! Except that after the divorce, Qin marries . . . another woman who is expecting a baby. Mad with rage, Li runs to the judge begging him to declare the divorce a sham so she may remarry and truly divorce the fool! Liu's politically charged plot reads like an absurd and hilarious comedy, softening what moves from a harsh indictment of China's one-child law to a head-on critique of China's corrupt system. *I Did Not Kill My Husband* is storytelling and satire of the highest order, sharp-edged and ironic. #### *39 Ways Not to Kill Your Best Friend* Simon and Schuster

In this fascinating, informative, and entertaining collection, internationally acclaimed, award-winning author Colm Tóibín turns his attention to the intricacies of family relationships in literature and writing. In pieces that range from the importance of aunts (and the death of parents) in the English nineteenth-century novel to the relationship between fathers and sons in the writing of James Baldwin and Barack Obama, Colm Tóibín illuminates not only the intimate connections between writers and their families but also, with wit and rare tenderness, articulates

the great joy of reading their work. In the piece on the Notebooks of Tennessee Williams, Tóibín reveals an artist "alone and deeply fearful and unusually selfish" and one profoundly tormented by his sister's mental illness. Through the relationship between W.B. Yeats and his father, or Thomas Mann and his children, or J.M. Synge and his mother, Tóibín examines a world of family relations, richly comic or savage in its implications. In Roddy Doyle's writing on his parents we see an Ireland reinvented. From the dreams and nightmares of John Cheever's journals Tóibín makes flesh this darkly comic misanthrope and his relationship to his wife and his children. The majority of these pieces were previously published in the *Londron Review of Books*, the *New York Review Review of Books*, and the *Dublin Review*. Three of the thirteen pieces have never appeared before.

The adherents of Islam and Christianity comprise half of the world's population, or 3.5 billion people. Tension between them exists throughout the world and is increasing here in North America. In *How Not to Kill a Muslim*, Dr. Joshua Graves provides a practical subversive theological framework for a strategic posture of peaceful engagement between Christians and Muslims. Based upon both academic and personal experience (Josh grew up in Metro Detroit), this book will provide progressive Christians with a clear understanding of Jesus' radical message of inclusivity and love. There is no one who is not a neighbor. There is no them. There's only us. Our future depends upon this becoming true in our cities, synagogues, churches, and mosques. In pluralistic societies such as those of Canada and the United States, the true test of Christianity is what it offers those who are not Christian.

The last time Clancy Martin tried to kill himself was in his basement with a dog leash. He didn't write a note. *How Not to Kill Yourself* is an affirmation of life by someone who has tried to end it multiple times. It's about standing in your bathroom every morning, gearing yourself up to die. It's about choosing to go on living anyway. In an unflinching account of his darkest moments, Clancy Martin makes the case against suicide, drawing on the work of philosophers from Seneca to Jean Améry. Through critical inquiry and practical steps, we might yet answer our existential despair more freely - and with a little more creativity.
