The Picture of Dorian Gray Wayne State University Press
This book examines recent changes in media education and in young people's lives, and provides an accessible set of principles on which the media curriculum should be based, with a clear rationale for pedagogic practice. David Buckingham is one of the leading international experts in the field - he has more than twenty years' experience in media education as a teacher and researcher. This book takes account of recent changes both in the media and in young people's lives, and provides an accessible and cogent set of principles on which the media curriculum should be based. Introduces the aims and methods of media education or 'media literacy'. Includes descriptions of teaching strategies and summaries of relevant research on classroom practice. Covers issues relating to contemporary social, political and technological developments.

This book introduces formal grammar theories that play a role in current linguistic theorizing (Phrase Structure Grammar, Transformational Grammar/Government & Binding, Generalized Phrase Structure Grammar, Lexical Functional Grammar, Categorical Grammar, Head-Driven Phrase Structure Grammar, Construction Grammar, Tree Adjoining Grammar). The key assumptions are explained and it is shown how the respective theory treats arguments and adjuncts, the active/passive alternation, local reorderings, verb placement, and fronting of constituents over long distances. The analyses are explained with German as the object language. The second part of the book compares these approaches with respect to their predictions regarding language acquisition and psycholinguistic plausibility. The nativism hypothesis, which assumes that humans possess genetically determined innate language-specific knowledge, is critically examined and alternative models of language acquisition are discussed. The second part then addresses controversial issues of current theory building such as the question of flat or binary branching structures being more appropriate, the question whether constructions should be treated on the phrasal or the lexical level, and the question whether abstract, non-visible entities should play a role in syntactic analyses. It is shown that the analyses suggested in the respective frameworks are often translatable into each other. The book closes with a chapter showing how properties common to all languages or to certain classes of languages can be captured.

No one disputes how important it is, in today's world, to prepare students to understand mathematics as well as to use and communicate mathematics in their future lives. That task is very difficult, however. Refocusing curricula on fundamental concepts, producing new teaching materials, and designing teaching units based on 'mathematicians' common sense' (or on logic) have not resulted in a better understanding of mathematics by more students. The failure of such efforts has raised questions suggesting that what was missing at the outset of these proposals, designs, and productions was a more profound knowledge of the phenomena of learning and teaching mathematics in socially established and culturally, politically, and

economically justified institutions - namely, schools. Such knowledge cannot be built by mere juxtaposition of theories in disciplines such as psychology, sociology, and mathematics. Psychological theories focus on the individual learner. Theories of sociology of education look at the general laws of curriculum development, the specifics of pedagogic discourse as opposed to scientific discourse in general, the different possible pedagogic relations between the teacher and the taught, and other general problems in the interface between education and society. Mathematics, aside from its theoretical contents, can be looked at from historical and epistemological points of view, clarifying the genetic development of its concepts, methods, and theories. This view can shed some light on the meaning of mathematical concepts and on the difficulties students have in teaching approaches that disregard the genetic development of these concepts.

In the twenty years preceding the First World War, cinema rapidly developed from a fairground curiosity into a major industry and social institution, a source of information and entertainment for millions of people. Only recently have film scholars and historians begun to study these early years of cinema in their own right and not simply as first steps towards the classical narrative cinema we now associate with Hollywood. The essays in this collection trace the fascinating history of how the cinema developed its forms of storytelling and representation and how it evolved into a complex industry with Hollywood rapidly acquiring a dominant role. These issues can be seen to arise from new readings of the so-called pioneers - Melies, Lumiere, Porter, and Griffith - while also suggesting new perspectives on major European filmmakers of the 1910s and 20s. Editor Thomas Elsaesser complements the contributions from leading British, American, and European scholars with introductory essays of his own that provide a comprehensive overview of the field. The volume is the most authoritative survey to date of a key area of contemporary film research, invaluable to historians as well as to students of cinema.

The opening of the Louvre-Lens is an exceptional opportunity to rethink the centuries-old relationship between the collections in the Louvre Museum and its visitors. At the heart of this museum is the "Galerie du Temps", whose design was entrusted to Studio Adrien Gardère. It presents 205 exhibits from all the departments in the Louvre in a single space. Displayed in chronological order, these works have previously always been seen in separate exhibition spaces, being issued from different civilisations, schools or techniques. On this journey through different civilisations, the gallery allows visitors to compare universally recognized masterpieces, such as Gudea, Prince of Lagash, the statuette of Queen Tiye Beside King Amenhotep III, the Discophoros, the Angel's Head mosaic from the basilica in Torcello, Self-Portrait with a Friend by Raphael, the Bather by Falconet and Oedipus and the Sphinx by Ingres. This guide to the Louvre-Lens discusses and reproduces in their entirety the works exhibited in the "Galerie du Temps", allowing us to prolong and deepen our visual encounter with art and history.

Writings by Thomas Hirschhorn, collected for the first time, trace the development of the artist's ideas and artistic strategies. For the artist Thomas Hirschhorn, writing is a crucial tool at every stage of his artistic practice. From the first sketch of an idea to appeals to potential collaborators, from detailed documentation of projects to post-disassembly analysis, Hirschhorn's writings mark the trajectories of his work. This volume collects Hirschhorn's widely scattered texts, presenting many in English for the first time. In these writings, Hirschhorn discusses the full range of his art, from works on paper to the massive Presence and Production projects in public spaces. "Statements and Letters" address broad themes of aesthetic philosophy, politics, and art historical commitments. "Projects" consider specific artworks or exhibitions. "Interviews" capture the artist in dialogue with Benjamin Buchloh, Jacques Rancière, and others. Throughout, certain continuities emerge: Hirschhorn's commitment to quotidian materials; the centrality of political and economic thinking in his work; and his commitment to art in the public sphere. Taken together, the texts serve to trace the artist's ideas and artistic strategies over the past two decades. Critical Laboratory also reproduces, in color, 33 Ausstellungen im öffentlichen Raum 1998-1989, an out-of-print catalog of Hirschhorn's earliest works in public space.

In the late 1970s, while students at Cal Arts, Tony Oursler and Mike Kelley formed a band called first, polka Dot and the Spots, and finally, The Poetics. This little-known musical aggregation was proceeded perhaps only by The Weirdos (an early LA punk band with members from Cal Arts) as one of the first New Wave Art Rock bands of that period. Inspired by Laurie Anderson's class at Cal Arts, Kelley and Oursler's band was experimenting with ways to integrate visual arts with music. This limited edition package documents the brief life of The Poetics.

A companion volume to Walter Benjamin's (1892-1940) memoir "Berlin Childhood circa 1900, The "Berlin Chronicle" Notices" is now in a new translation by Carl Skoggard. The German-Jewish philosopher, theorist and critic Walter Benjamin began to ruminate on his comfortable Berlin childhood in 1932, not long before he would flee Germany for good to escape the Nazis. The resulting "Berlin Chronicle" notices--40 in all--do not result in a linear narrative but instead remain fragmentary recollections of Benjamin's young years, from his early childhood to the threshold of adulthood. More generally, they are a series of profound explorations of memory and of the ways memory relates to place. Rich in and of themselves, these notices greatly illuminate "Berlin Childhood circa 1900," written by Benjamin months later. This translation, in a charming pocket-sized format, comes with an extensive commentary, a historical map of Berlin and numerous illustrations.

Mathematics Education as a Research Domain: A Search for Identity Somogy Art Publishing

What's new in Translation Studies? In offering a critical assessment of recent developments in the young discipline, this book sets out to provide an answer, as seen from a European perspective today. Many "new" ideas actually go back well into the past, and the German Romantic Age proves to be the starting-point. The main focus lies however on the last 20 years, and, beginning with the cultural turn of the 1980s, the study traces what have turned out since then to be ground-breaking contributions (new paradigms) as against what was only a change in position on already established territory (shifting viewpoints). Topics of the 1990s include nonverbal communication, gender-based Translation Studies, stage translation, new fields of interpreting studies and the effects of new technologies and globalization (including the increasingly dominant role of English). The author's aim is to stimulate discussion and provoke further debate on the current profile and future perspectives of Translation Studies.

In September 1791, two years after the Revolution, French Jews were granted full rights of citizenship. Scholarship has traditionally focused on this turning point of emancipation while often overlooking much of what came before. In *Rites and Passages*, Jay R. Berkovitz argues that no serious treatment of Jewish emancipation can ignore the cultural history of the Jews during the ancien régime. It was during the late seventeenth and eighteenth centuries that several lasting paradigms emerged within the Jewish community—including the distinction between rural and urban communities, the formation of a strong lay leadership, heightened divisions between popular and elite religion, and the strain between local and regional identities. Each of these developments reflected the growing tension between tradition and modernity before the tumultuous events of the French Revolution. *Rites and Passages* emphasizes the resilience of religious tradition during periods of social and political turbulence. Viewing French Jewish history through the lens of ritual, Berkovitz describes the struggles of the French Jewish minority to maintain its cultural distinctiveness while also participating in the larger social and economic matrix. In the ancien régime, ritual systems were a formative element in the traditional worldview and served as a crucial repository of memories and values. After the Revolution, ritual signaled changes in the way Jews related to the state, French society, and French culture. In the cities especially, ritual assumed a performative function that dramatized the epoch-making changes of the day. The terms and concepts of the Jewish religious tradition thus remained central to the discourse of modernization

and played a powerful role in helping French Jews interpret the diverse meanings and implications of emancipation. Introducing new and previously unused primary sources, *Rites and Passages* offers a fresh perspective on the dynamic relationship between tradition and modernity.

A sequel to the bestseller *Maharaja*. A rare treasure of true stories that offer a deep insight into the glamorous and sensuous Lives of the Indian and European Maharanis of India. Intriguing as well as valuable. Maharani is at once a historical romance and a sociological document, as it vividly recounts a bygone era, an era perhaps never to return again. The author served Indian Maharajas for over 50 years accompanying them on their amorous trips to private retreats in India and abroad. He brilliantly recounts the extraordinary lives of the Maharanis of the richest Men the World has ever seen.
