Ce manuel s'inspire fortement des leçons théoriques et des travaux pratiques dispensés par les auteurs sur une période de quatre ans, dans le cadre du cours sur le droit du transport routier et maritime de marchandises à l'Université Pédagogique Nationale. Il s'appuie principalement sur l'acte uniforme AUCTMR de l'OHADA qui, depuis le 1er avril 2004, encadre le contrat de transport routier de marchandises dans l'espace OHADA. Cet ouvrage approfondit particulièrement le contrat de transport de marchandises et la responsabilité du transporteur, ainsi que tous les facteurs liés à l'expédition des marchandises. Il peut aussi constituer un support fondamental pour des recherches sur le transport aérien et maritime de marchandises en Master de droit privé et judiciaire. Le contrat de marchandises de l'OHADA étant consensuel, il prend effet dès que les parties expriment leur consentement, même lors d'une simple conversation téléphonique.

Bibliographic Guide to Refrigeration 1965-1968 is a bibliographic guide to all the documents abstracted in the International Institute of Refrigeration Bulletin during the period 1965-1968. The references include nearly 7,000 reports, articles, and communications, classified according to subjects, and followed by a listing of books. This book is divided into 10 parts and begins with a

listing of references on thermodynamics, heat transfer, and other basic physical phenomena relating to refrigeration, including desiccation and measurements of temperature, humidity, and pressure. The next sections are devoted to the physics of low temperatures and cryogenics; production and distribution of cold; refrigerating plants (mainly in the food domain); and refrigerated transport and packaging. Other references deal with air conditioning and heat pumps; and industrial, biological, medical, and agricultural applications of refrigeration. The final section focuses on standards and regulations, economics and statistics, and education and trade activities in the refrigeration industry. This guide is intended to assist researchers, engineers, manufacturers, and operators who are in either constant or occasional contact with the refrigeration domain.
