The Lost World is a novel by Sir Arthur Conan Doyle concerning an expedition to a plateau in the Amazon basin of South America where prehistoric animals, dinosaurs and other extinct creatures still survive. The character of Professor Challenger was introduced in this book. The novel also describes a war between Native Americans and a vicious tribe of ape-like creatures. Edward Malone, a reporter for the Daily Gazette, goes to his news editor, McArdle, to get a dangerous and adventurous mission to impress the woman he loves, Gladys Hungerton. He is sent to interview

Professor George Edward Challenger, who has assaulted four or five other journalists, to determine if his claims about his trip to South America are true. After assaulting Malone, Challenger reveals his discovery of dinosaurs in South America. After having been ridiculed for years, he invites Malone on a trip to prove his story.

Jurassic Park Bantam
Ben Cartwright, former soldier, home to mourn the loss of his father stumbles upon cryptic letters from the past between the author, Arthur Conan Doyle and his great, great grandfather who vanished while exploring the Amazon jungle in 1908. Amazingly, these letters lead Ben to believe that

his ancestor's expedition was the basis for Doyle's fantastical tale of a lost world inhabited by long extinct creatures. As Ben digs some more he finds clues to the whereabouts of a lost notebook that might contain a map to a place that is home to creatures that would rewrite everything known about history, biology and evolution. But other parties now know about the notebook, and will do anything to obtain it. For Ben and his friends, it becomes a race against time and against ruthless rivals. In the remotest corners of Venezuela, along winding river trails known only to lost tribes, and through near impenetrable jungle, Ben and his novice team find a forbidden place more terrifying and dangerous than anything they could ever have imagined.

The Lost World is a novel released in 1912 by Sir Arthur Conan Doyle concerning an expedition to a plateau in the Amazon basin of South America where prehistoric animals (dinosaurs and other extinct creatures) still survive. It was originally published serially in the popular Strand Magazine and

illustrated by New-Zealand-born artist Harry Rountree during the months of April-November 1912. The character of Professor Challenger was introduced in this book. The novel also describes a war between indigenous people and a vicious tribe of ape-like creatures. Follow Professor Challenger on his expedition to the Tepuyes plateau in South America where prehistoric animals and other extinct creatures still roam -- side by side with prehistoric men and vicious ape-like creatures! Edward Malone, a reporter for the Daily Gazette, goes to his news editor, McArdle, to procure a dangerous and adventurous mission to impress the woman he loves, Gladys Hungerton. He is sent to interview Professor George Edward Challenger, who has assaulted four or five other journalists, to determine if his claims about his trip to South America are true. After assaulting Malone, who earns Professor Challenger's respect when Malone refuses to press charges, Professor Challenger reveals his discovery of dinosaurs in South America. Having been ridiculed for years, he invites Malone on a trip

to prove his story, along with Professor Summerlee and Lord John Roxton, an adventurer who knows the Amazon and several years prior to the events of the book helped end slavery by robber barons in South America. They reach the plateau with the aid of Indian guides, who are superstitiously scared of the area. One of these Indians, Gomez, is the brother of a man that Roxton killed the last time he was in South America. When the expedition manages to get onto the plateau, Gomez destroys their bridge, trapping them. Their "devoted negro" Zambo remains at the base, but is unable to prevent the rest of the Indians from leaving.

More than a hundred years ago, Sir Arthur Conan Doyle wrote a novel called The Lost World with the exciting premise that dinosaurs and other prehistoric beasts still ruled in South America. Little did Conan Doyle know, there were

terrifying monsters in South America--they just happened to be extinct. In fact, South America has an incredible history as a land where many strange creatures evolved and died out. In his book *Giants of the Lost World: Dinosaurs and Other Extinct Monsters of South America*, Donald R. Prothero uncovers the real science and history behind this fascinating story. The largest animal ever discovered was the huge sauropod dinosaur *Argentinosaurus*, which was about 130 feet long and weighed up to 100 tons. The carnivorous predator *Giganotosaurus* weighed in at more than 8 tons and measured more than 47 feet long, dwarfing the *T. rex* in comparison. Gigantic anacondas broke reptile records; possums evolved into huge saber-toothed predators; and ground sloths grew larger than elephants in this strange, unknown land. Prothero presents the scientific details about each of these prehistoric beasts, provides a picture of the ancient landscapes they once roamed, and includes the stories of the individuals who first discovered their fossils for a captivating account of a lost world that is stranger

than fiction.

"A small change today can change our tomorrow. A small change 100 million years ago can change everything." No one really noticed when things started to change. Some animals vanished. Some new ones appeared. Then some things appeared that were monstrous. No one seemed to notice except Ben Cartwright and the other survivors of the hidden plateau in the

depths of the Amazon Jungle. Only they were aware of the growing threat to the human race. While Andy Martin lived out his dreams by venturing north to witness the birth of the American continent and navigate a prehistoric inland sea of the Late Cretaceous, whatever he was doing was rippling forward to change our world. Every day brought new threats in the form of creatures that should have long been extinct, or newly evolved monstrosities that were from mankind's worst nightmares. The comet, Primordia, was returning and time was up. They had to go back and find Andy and stop him before mankind vanished from the face of the Earth. In the thrilling 3rd installment of the blockbusting PRIMORDIA series, Greig Beck explores a frightening world where evolution has gone wild, while also taking us further into the prehistoric Cretaceous jungle and oceans, to a time in which mankind was never meant to exist.
