Build important Internet research skills while learning about pioneers.

**In Defense of a Liberal Education** Courier Dover Publications

"This book was created to give children opportunities to use mathematics to create art in the form of graphs"--Introduction

A History of Mathematics Little, Brown Books for Young Readers

Building serious math skills has never been so much fun!

**Mockingjay (Hunger Games, Book Three)** Ivan R. Dee Publisher

The dust bunnies are back for another round of rhyming fun. But this time a big MEAN dust bunny wants to play—and run and chase and grab! Can the four little dust bunnies get that bully to play nice? Jan Thomas's lovable critters shine again in this hilarious rhyme-filled book that starts with scares and ends with...smiles.

City Shapes Scholastic Inc.

Meet Bethany. Get inspired. Growing up in Hawaii, Bethany Hamilton loved to surf. But one day, she was in her favorite place, out on the waves, when a tiger shark suddenly attacked. Thirteen-year-old Bethany lost her left arm. As she fought to recover, Bethany wondered: Would she ever surf again? Follow Bethany as she got back on her board and fearlessly chased her surfing dreams. With the strength of her family and faith behind her, Bethany knew she could become not only a professional athlete, but a champion and a role model. This highly accessible and narrative biography includes full-color photos and educational info!

**Great Graph Art** Dorling Kindersley Ltd

Students will find these 40 reproducibles absolutely irresistible! Fantastic mazes, cross-number puzzles, riddle searches, and mini-mysteries are just some of the ways your students can have fun while learning and reinforcing basic math skills. Topics covered include odd and even numbers, place value, addition, subtraction, subtraction, and multiplication. For use with Grades 2-3.

*Red Leaf, Yellow Leaf* Houghton Mifflin Harcourt

CNN host and best-selling author Fareed Zakaria argues for a renewed commitment to the world's most valuable educational tradition. The liberal arts are under attack. The governors of Florida, Texas, and North Carolina have all pledged that they will not spend taxpayer money subsidizing the liberal arts, and they seem to have an unlikely ally in President Obama. While at a General Electric plant in early 2014, Obama remarked, "I promise you, folks can make a lot more, potentially, with skilled manufacturing or the trades than they might with an art history degree." These messages are hitting home: majors like English and history, once very popular and highly respected, are in steep decline. "I get it," writes Fareed Zakaria, recalling the atmosphere in India where he grew up, which was even more obsessed with getting a skills-based education. However, the CNN host and best-selling author explains why this widely held view is mistaken and shortsighted. Zakaria eloquently expounds on the virtues of a liberal arts education—how to write clearly, how to express yourself convincingly, and how to think analytically. He turns our leaders' vocational argument on its head. American routine manufacturing jobs continue to get automated or outsourced, and specific vocational knowledge is often outdated within a few years. Engineering is a great profession, but key value-added skills you will also need are creativity, lateral thinking, design, communication, storytelling, and, more than anything, the ability to continually learn and enjoy learning—precisely the gifts of a liberal education. Zakaria argues that technology is transforming education, opening up access to the best courses and classes in a vast variety of subjects for millions around the world. We are at the dawn of the greatest expansion of the idea of a liberal education in human history.

Marvelous Multiplication and Dazzling Division Teaching Resources

New York Times, Wall Street Journal, and USA Today Bestseller! Gold medal-winning Olympic gymnast and Dancing with the Stars champion Laurie Hernandez shares her story in her own words in this debut book for fans of all ages—with never-before-seen photos! At sixteen years old, Laurie Hernandez has already made many of her dreams come true—and yet it's only the beginning for this highly accomplished athlete. A Latina Jersey girl, Laurie saw her life take a dramatic turn last summer when she was chosen to be a part of the 2016 US Olympic gymnastics team. After winning gold in Rio as part of the Final Five, Laurie also earned an individual silver medal for her

performance on the balance beam. Nicknamed “the Human Emoji” for her wide-eyed and animated expressions, Laurie continued to dance her way into everyone’s hearts while competing on the hit reality TV show *Dancing with the Stars*, where she was the youngest-ever winner of the Mirrorball Trophy. Poignant and funny, Laurie’s story is about growing up with the dream of becoming an Olympian and what it took to win gold. She talks about her loving family, her rigorous training, her intense sacrifices, and her amazing triumphs. Be prepared to fall in love with and be mesmerized by America’s newest sweetheart all over again.

*At Home in the World* Wiley-Blackwell

\*A Kirkus Reviews Best Book of 2018!\* All Summer Long, a coming-of-age middle-grade graphic novel about summer and friendships, written and illustrated by the Eisner Award-winning and New York Times–bestselling Hope Larson. Thirteen-year-old Bina has a long summer ahead of her. She and her best friend, Austin, usually do everything together, but he's off to soccer camp for a month, and he's been acting kind of weird lately anyway. So it's up to Bina to see how much fun she can have on her own. At first it's a lot of guitar playing, boredom, and bad TV, but things look up when she finds an unlikely companion in Austin's older sister, who enjoys music just as much as Bina. But then Austin comes home from camp, and he's acting even weirder than when he left. How Bina and Austin rise above their growing pains and reestablish their friendship and respect for their differences makes for a touching and funny coming-of-age story.

**Here Comes the Big, Mean Dust Bunny!** Scholastic Inc.

This is a remarkable book about a man (perhaps the most important and original philosopher of our age), a society (the corrupt Austro-Hungarian Empire on the eve of dissolution), and a city (Vienna, with its fin-de siècle gaiety and corrosive melancholy). The central figure in this study of a crumbling society that gave birth to the modern world is Wittgenstein, the brilliant and gifted young thinker. With others, including Freud, Viktor Adler, and Arnold Schoenberg, he forged his ideas in a classical revolt against the stuffy, doomed, and moralistic lives of the old regime. As a portrait of Wittgenstein, the book is superbly realized; it is even better as a portrait of the age, with dazzling and unusual parallels to our own confused society. "Allan Janik and Stephen Toulmin have acted on a striking premise: an understanding of prewar Vienna, Wittgenstein's native city, will make it easier to comprehend both his work and our own problems....This is an independent work containing much that is challenging, new, and useful."--New York Times Book Review.

**Origami Math** W. W. Norton & Company

Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is

reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised “dead” drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of

the muqarnas and demonstrates by means of CAD drawings how one of the scroll’s patterns could be used to design a three-dimensional vault.
