Thoroughly revised and updated, this widely used text offers a concise introduction to the American legal system for students without a legal background. The book's coverage is cross-disciplinary, informed by the literature of law, business administration and the social sciences, especially public administration and policy. Its goal is to give non-lawyers in all these areas a lucid overview of the workings of the American legal system as it may affect individuals and organizations in their interactions with each other and the environment. Unlike longer, more expensive competing works, "The Dynamics of Law" presents its subject with

clarity and precision, and minimal use of legal terms. It offers clear explanations of how to brief a case and how statutes and regulations are codified in the United States. Study problems and review questions in each chapter, drawn from legal literature as well as general interest articles and books, are designed to stimulate classroom discussion.

This book is written for people who are tempted to leave the church because the message they have been hearing has come to seem intellectually unacceptable, morally objectionable, or spiritually deadening, maybe even all three. Often, these people see no alternative to the version of Christian faith that they now find difficult to accept. They have been told that rejecting anything they have

been taught means ceasing to be a Christian. What they have been told is wrong. But seeing new possibilities means reconsidering assumptions that are often taken for granted, and it can be difficult to imagine on your own a form of faith different from what you are used to. This book provides some help. It can be thought of as a guide for those who see the need to let go of some of what they have been taught, but don't know how to replace it with something better. Rethinking your faith can be scary. But giving up on what is unbelievable can help to clear the way for the kind of faith that is more believable and ultimately more satisfying. Changing your mind can be a way of saving your faith. *One Summer at Deer's Leap* Boxwood Manor Books

In this incisive account, scholar Horace Campbell investigates the political and

economic crises of the early twenty-first century through the prism of NATO's intervention in Libya. He traces the origins of the conflict, situates it in the broader context of the Arab Spring uprisings, and explains the expanded role of a post-Cold War NATO. This military organization, he argues, is the instrument through which the capitalist class of North America and Europe seeks to impose its political will on the rest of the world, however warped by the increasingly outmoded neoliberal form of capitalism. The intervention in Libya—characterized by bombing campaigns, military information operations, third party countries, and private contractors—exemplifies this new model. Campbell points out that while political elites in the West were quick to celebrate the intervention in Libya as a success, the NATO campaign caused many civilian deaths and destroyed the nation's infrastructure. Furthermore, the instability it unleashed in the forms of militias and terrorist groups have only begun to be reckoned with, as the United States learned when its embassy was attacked and personnel, including the ambassador, were killed. Campbell's lucid study is

essential reading for anyone seeking to understand this complex and weighty course of events.

**LIBERTY SHIP SURVIVOR: Why Ray Laenen is so Proud to be an American Liberty Ship Survivor** is the compelling tale of one man's journey from Belgian immigrant to proud and patriotic American citizen. Over 100 photographs support his incredible tales of courage, survival, faith, friendship and forgiveness. Remie "Ray" Laenen's parents brought him to America from Oevel, Belgium in 1927, in search of freedom and opportunity. The family settled on the East Side of Detroit. After graduating from St. Rose High School in 1944, Ray immediately went into the United States Army, where he would learn a life-defining lesson about the true cost of freedom. On February 6, 1945, Ray's life was changed forever. His Liberty Ship was sunk in the Indian Ocean by torpedoes from a German U-boat. He survived an

incredible twenty-two day ordeal in a crowded lifeboat, only to return to service more determined than ever to defend America's freedom. When the war ended, Ray went about the business of carving out his piece of the American Dream. Fifty years after the sinking of the SS Peter Silvester, Ray and his wife Norma traveled to Germany to meet and forgive the very men who had sunk his ship. This is the story of the making of an American Patriot. *Language of Instruction in Tanzania and South Africa (LOITASA)* HarperCollins UK

Great strides have been made in the art of foundation design during the last two decades. In situ testing, site improvement techniques, the use of geogrids in the design of retaining walls, modified ACI codes, and ground deformation modeling using finite elements are but a few of the developments that have significantly advanced foundation engineering in recent years. What has been lacking, however, is a comprehensive reference for foundation engineers that incorporates these state-of-the-art concepts and techniques. The *Foundation Engineering Handbook* fills that void. It presents both classical and state-of-the-art design and analysis techniques for earthen structures, and covers basic soil mechanics and soil and groundwater modeling concepts along with the latest research results. It addresses isolated and shallow footings, retaining structures, and modern methods of pile construction monitoring, as well as stability analysis and ground improvement methods. The handbook also covers reliability-based design and LRFD (Load Resistance Factor Design)-concepts not addressed in most foundation engineering

texts. Easy-to-follow numerical design examples illustrate each technique. Along with its unique, comprehensive coverage, the clear, concise discussions and logical organization of The Foundation Engineering Handbook make it the one quick reference every practitioner and student in the field needs.

This book covers research findings on the language and education situations in Tanzania and South Africa. It outlines the policies governing language of instruction for education in the two countries, and assesses the extent to which existing policies are being implemented. It presents the history of the development of language policies in the two countries and considers how they are actually working in practice at classroom level. The contributors further consider the economic viabilities of language policies, and the necessity to rationalise languages and dialects for education purposes.
