The long-awaited magnum opus from Haruki Murakami, in which this revered and bestselling author gives us his hypnotically addictive, mind-bending ode to George Orwell's 1984. The year is 1984. Aomame is riding in a taxi on the expressway, in a hurry to carry out an assignment. Her work is not the kind that can be discussed in public. When they get tied up in traffic, the taxi driver suggests a bizarre 'proposal' to her. Having no other choice she agrees, but as a result of her actions she starts to feel as though she is gradually becoming detached from the real world. She has been on a top secret mission, and her next job leads her to encounter the superhuman founder of a religious cult. Meanwhile, Tengo is leading a nondescript life but wishes to become a

writer. He inadvertently becomes involved in a strange disturbance that develops over a literary prize. While Aomame and Tengo impact on each other in various ways, at times by accident and at times intentionally, they come closer and closer to meeting. Eventually the two of them notice that they are indispensable to each other. Is it possible for them to ever meet in the real world?

For centuries, scientists and philosophers believed the universe was a stately; ordered mechanism - mathematical and musical. The smooth operation of the cosmos created a divine harmony (perfect, spiritual, eternal) which composers sought to capture and express. With *The Music of the Spheres*, readers will see how this scientific philosophy emerged, how it was shattered by changing views of the universe and the rise of Romanticism, and to what extent (if at all) it survives today. From Pythagoras to Newton, Bach to Beethoven, and on into the twentieth century, it is a spellbinding examination of the interwoven fates of science and music throughout history.

"You can become irresistibly attractive to women without changing who you are." So says Mark Manson, superstar blogger and author of the international bestseller, *The Subtle Art of Not Giving A F*ck*, a self help book that packs a punch. Mark brings the same approach to teaching men what they need to know about attracting women. In *Models* he shows us how much it sucks trying to attract women using the tricks and tactics recommended by other books. Instead, he says, men need to focus on seduction as an emotional process not a physical or social one. What matters is the intention, the motivation, the authenticity. To improve your dating life you must improve your emotional life - how you feel about yourself and how you

express yourself to others. Funny, irreverent and confronting, *Models* is a mature and honest guide on how a man can attract women by giving up the bullsh*t and becoming an honest broker. "A detailed guide to modern sexual ethics" Sydney Morning Herald "There's nothing subtle about Mark Manson. He's crude and vulgar and doesn't give a f*ck . . . He's as painfully honest as he is outrageously funny" Huffington Post

"This book is a breakthrough. It's beautifully written, perfectly timed and heralds a new way forward. I'm buying a dozen copies to share with friends and colleagues." -Seth Godin, Founder of altMBA and author of *The Practice* If you let go of hierarchy, chaos will reign...or so many leaders believe. But when leaders find the courage to distribute rather than hoard power, creativity multiplies, trust deepens, and inclusivity expands... and a new kind of order emerges. A few rare leaders have learned to embrace a new organizational shape and mindset: Constellations. Organizations designed as constellations are dynamic and flexible networks of distinct yet interwoven individuals. Each member of the team feels like a singular star and is also connected to others to form something greater. That is how Visa reimaged how we pay for things, how Wikipedia beat the richest company in the world and how Barack Obama and his grassroots team revolutionized political campaigning. These leaders did what most leaders dread - they gave away power. Barzun brilliantly layers lessons across history and industries with his own experiences as an internet entrepreneur, political organizer, and US ambassador to the United Kingdom and Sweden. *The Power of Giving Away Power* shows how the Constellation mindset shines in some of the most impactful organizations and innovations the world has ever known. And it encourages us all to recognize, as Barzun writes, "the power we can create by seeing the power in others" — and making the leap to lead. Together.

Practical Ways to Tap into and Use Your Highest Wisdom Each day, we are bombarded with data and opinions, and each day we must make choices that steer us toward our own best approach to life. And, according to Simone Wright, we often forget or don't understand how to use the best tool available: our intuition, which is our "first intelligence" that can cut through the chatter to inherent wisdom. She explains that intuition is an innate and universal biological and energetic function that can be used like a human GPS system to guide us toward effective action and peak performance. Riveting examples and powerful exercises demonstrate how we can use this "sixth sense" as naturally as any, in all areas of our lives.

The ethnomusicologist Frederick Moehn introduces a generation of Rio-based musicians who build on the música popular brasileira (MPB) of previous decades, but who have yet to receive scholarly attention. This generation, the "children of the dictatorship,"

reinvigorated Brazilian genres such as samba and maracatu through juxtaposition with international influences, including rock, techno, and funk. Moehn offers vivid depictions of Rio musicians as they creatively combine and reconcile local realities with global trends and exigencies.

A new field of inquiry and growing interdisciplinary area, men's studies, is just now beginning to develop its own distinctive methodologies and perspectives as demonstrated in the pages of *Theorizing Masculinities*. This first major compilation of new theoretical work on men begins by presenting ideas borrowed from the disciplines that have fostered the study of masculinities: sociology, psychoanalysis, ethnography, and inequality. The following chapters explore many issues central to the study of men such as power, ethnicity, feminism, and homophobia. The contributors also provide theoretical explanations of some of the institutions most closely identified with men, such as the military, sports, and the men's movement. The contributors to this volume come from disciplines as diverse as sociology, political science, industrial relations, philosophy, education, anthropology, gender studies, and literature. Together, they make this benchmark volume the guiding set of theories on masculinities. *Theorizing Masculinities* is a comprehensive volume that will appeal to a wide range of students and scholars, especially those interested in gender, sociology, social theory, family studies, counseling, and psychology.
