The advent of the digital era has raised questions on the future course of

library development. The challenge of maintaining a balance between their educational, cultural and service roles has presented libraries with new challenges - challenges which their rich and varied media holdings, modern technical infrastructure and information specialist competence well equip them to face. This fourth revised and updated English edition of "Portals to the Past and to the Future" by Jürgen Seefeldt and Ludger Syré, now in its fifth German edition, is

an in-depth state-of-the-art report on current German librarianship. Lavishly illustrated, the book traces the history of libraries in Germany, portrays the various types of library and cites many examples of the outstanding achievements of nationwide library cooperation in the Federal Republic of Germany. The reader will gain both a revealing insight into the cultural and educational policy underlying the German library system and an outline of the profession. Special

attention has been paid to current developments such as the preservation and presentation of the common cultural heritage and the emergence of the digital library. This book has been translated not only into English but also into Arabic, Italian, Japanese, Spanish, Russian and Turkish and is now the standard work on libraries and librarianship in Germany. Because of the interest it has generated internationally, it was decided to publish the German and English

versions of this new edition simultaneously. The book provides trainee librarians and non-librarians alike with a clear picture of the way in which libraries were able to cooperate in the aftermath of the Second World War to overcome the vagaries of the federal system and create an effective decentralized library network more than a match for the challenges of the third millennium.

### **The Mindful Hand**

Springer Nature  
What relation is there

between the existence of a work of art and that of a living being? Between the existence of an atom and that of a value like solidarity? These questions become our own each time a reality—whether it is a piece of music, someone we love, or a fictional character—is established and begins to take on an importance in our lives. Like William James or Gilles Deleuze, Souriau methodically defends the thesis of an existential pluralism. There are indeed different manners

of existing and even different degrees or intensities of existence: from pure phenomena to objectivized things, by way of the virtual and the “super-existent,” to which works of art and the intellect, and even morality, bear witness. Existence is polyphonic, and, as a result, the world is considerably enriched and enlarged. Beyond all that exists in the ordinary sense of the term, it is necessary to allow for all sorts of virtual and ephemeral states, transitional realms, and

barely begun realities, still in the making, all of which constitute so many “inter-worlds.”  
*A Casebook on Roman Property Law* Bloomsbury Publishing  
 Napoleon Bonaparte dominated the public life of Europe like no other individual before him. Not surprisingly, the story of the man himself has usually swamped the stories of his subjects. This book looks at the history of the Napoleonic Empire from an entirely new perspective – that of the ruled rather than the

ruler. Michael Broers concentrates on the experience of the people of Europe – particularly the vast majority of Napoleon's subjects who were neither French nor willing participants in the great events of the period – during the dynamic but short-lived career of Napoleon, when half of the European content fell under his rule.  
*Information Technology. Security Techniques. Code of Practice for Information Security Controls*  
 Routledge  
 Containing a selection of

texts on education prepared during the work of the International Commission on Education for the Twenty-first Century, this volume bears witness to some paradoxes faced by education: to reconcile divergent aims and trends, to embody both continuity and renewal, to encourage conformity and innovation. These papers are intended to complement existing literature to respond to questions that arose in the course of the Commission's work, and

to illuminate specific issues that cross disciplines.  
Going Green: Implementing Sustainable Strategies in Libraries Around the World  
Springer-Verlag  
Interpersonal Regulation of Learning and Motivation is the first book in the field to focus on major methodological advances in research on interpersonal regulation of learning and motivation. Interest in developing ways of capturing the dynamics of interpersonal regulation in real-life

learning interactions is growing rapidly. Understanding these dynamics is particularly timely given the increased use of collaborative learning activities in schools and university settings, as well as through face-to-face and computer supported collaborative learning (CSCL) environments. While groups and collections of individuals in social interaction are expected to bring their own motivations and goals to the learning situations, it is also

assumed that these are further shaped through interaction, as the group activity evolves. Research methodology publications in the field of learning, regulation and motivation are still dominated by a focus on the individual. The study of collaborative learning at both conceptual and methodological level has not incorporated the significance of social regulatory processes of learning and motivation. This is a new development in the field and one covered by this

book. The book contains numerous illustrations of innovative: Methodological approaches to study and interpret the dynamics of interpersonal regulation Data sources and data representations to capture scaffolded instruction Theory-based analytic methods to investigate interactions in real-life collaborative learning Coding systems and social software tools for gathering and analysing interactive data. Interpersonal Regulation of Learning

and Motivation brings together the work of scholars who have been studying interpersonal regulation of learning and motivation at the boundaries of the individual and the social, and who have made original methodological contributions to the study of interactive learning environments. In combination, their work provides a range of distinctive and original conceptual and methodological contributions to this under-examined and vital

field of research, making this an essential read for any researcher or student interested in collaborative learning and motivation.

### The Practical Theorist

UNESCO

The authoritative text on Hakomi methods, theory, and practice. Hakomi is an integrative method that combines Western psychology and body-centered techniques with mindfulness principles from Eastern psychology. This book, written and edited by members of the Hakomi Institute— the world's leading

professional training program for Hakomi practitioners—and by practitioners and teachers from across the globe, introduces all the processes and practices that therapists need in order to begin to use this method with clients. The authors detail Hakomi's unique integration of body psychotherapy, mindfulness, and the Eastern philosophical principle of non-violence, grounding leading-edge therapeutic technique in an attentiveness to the whole person and their

capacity for transformation.

### *The Leadership Code* Springer

This book presents thoughts on and experiences with the introduction of Theme-centered Interaction (TCI) into academia. TCI is a systematic didactic, 'living learning' approach originally developed by social psychologist and pedagogue Ruth C. Cohn. The book explains and introduces the method, attitude and theory of TCI to a broader, higher education audience and

relates it to such questions as: How does a teacher in academia achieve a lively and engaging atmosphere in their seminars? How do young academics as leaders-to-be learn how to act socially sustainably in groups? Using practical examples, the book shows how TCI can work in higher education to achieve participation and integration, reflectivity and humane connectedness of academic teachers and students, and professional development of senior

and junior academics. *Work Appropriation and Social Inequality* Universitätsverlag der TU Berlin  
This book provides the first English language account of the interview method known as the PCI. Offering a way of collecting knowledge by means of involving people actively in the research process, the interviewer takes the role of a well-informed traveller. With careful preparation and planning, the interviewer sets out with priorities and expectations, but the

story the interviewer tells about his journey depends on the people encountered along the road. Novice and experienced interview researchers across the social, educational and health sciences will find this an invaluable guide to conducting interviews. Andreas Witzel is senior researcher (retired) at the University of Bremen and former director of the Bremen Archive for Life Course Research. Herwig Reiter is senior researcher in the Department of Social Monitoring and

Methodology of the German Youth Institute in Munich.

Intersectionality Walter de Gruyter GmbH & Co KG

A classic work in the Marxist canon on political economy

Multidisciplinary Research on Teaching and Learning

Springer-Verlag

The public administration in Germany has been described as one of the

world's 'classic administrative systems'. It was on German soil that one of the prime examples of the efficient service structure in public affairs originally developed which is so characteristic of the modern state. In view of the cracks in recent German history the continuing efficiency of public administration is considered remarkable. In addition German scholars - from Max Weber to Fritz Morstein Marx - whose works have attracted attention from far beyond

the confines of Germany, have contributed to the establishment of basic academic principles for an international discussion of administrative phenomena. But even in Germany the negative aspects of state bureaucracies have not gone unobserved and criticism from abroad of our particular political system has not exactly spared our public administration either. In some places ideas may persist that no longer match the reality of state and administration in

today's Federal Republic of Germany.  
Bad Leadership Springer Science & Business Media Space has to be discussed once one focuses on the commons, the natural and cultural resources securing the well-being of a community. The question of availability of these resources includes asking for the place where they are accessible or where they are made accessible and thus always the question of the spatial organization of this society. This publication wants to provide a first

overview about historical types of commons, about contemporary theories on urban commons, and speculate about possible forms of future commoning. Die Beschäftigung mit den Gemeingütern, den elementaren natürlichen und kulturellen Ressourcen, die dem Wohle der Gemeinschaft dienen, fordert auch eine Auseinandersetzung mit Räumen. Denn die Frage nach der Verfügbarkeit von Ressourcen schließt die Frage nach dem Ort, an dem diese für die

Gemeinschaft zugänglich sind oder zugänglich gemacht werden, und damit immer auch die Frage nach der räumlichen Organisation dieser Gemeinschaft, ein. Diese Publikation gibt einen ersten Überblick über historische Typen von Allmenden, über die aktuelle Theoriebildung zum Thema des urbanen Gemeingutes und spekuliert über mögliche Formen von zukünftigem Commoning.

How is Saddam Hussein like Tony Blair? Or Kenneth Lay like Lou Gerstner? Answer: They are, or were, leaders. Many would argue that tyrants, corrupt CEOs, and other abusers of power and authority are not leaders at all--at least not as the word is currently used. But, according to Barbara Kellerman, this assumption is

dangerously naive. A provocative departure from conventional thinking, *Bad Leadership* compels us to see leadership in its entirety. Kellerman argues that the dark side of leadership--from rigidity and callousness to corruption and cruelty--is not an aberration. Rather, bad leadership is as ubiquitous as it is insidious--and so must be more carefully examined and better understood. Drawing on high-profile, contemporary examples--from Mary Meeker to

David Koresh, Bill Clinton to Radovan Karadzic, Al Dunlap to Leona Helmsley--Kellerman explores seven primary types of bad leadership and dissects why and how leaders cross the line from good to bad. The book also illuminates the critical role of followers, revealing how they collaborate with, and sometimes even cause, bad leadership. Daring and counterintuitive, *Bad Leadership* makes clear that we need to face the dark side to become better leaders and

followers ourselves. Barbara Kellerman is research director of the Center for Public Leadership and a lecturer in public policy at the Kennedy School of Government, Harvard University.

**Boundless cyber world?** Gower Publishing Company, Limited  
« Understanding today's Vocational Education and Training (VET) systems requires a comprehension of the rise and development, i.e. of the foundations of topical VET. This book is one of

the first publications providing a comparative view of this development in Europe. Apart from older roots, the evolution of VET systems are one trigger of the modernization of economy, society and education itself. The 28 contributions, including countries like Austria, Britain, Denmark, Finland, France, Germany, Switzerland, Italy, Lithuania, Norway, Spain, Sweden and Switzerland of renowned authors and experts in this field are organized in three

sections: Concepts which are discussing theoretical approaches towards this phenomenon. Cases which stress specific developments of VET in a certain country or region and Challenges which are contextualizing the historical perspective in a topical policy context. »--  
*Neuropsychotherapy*  
Walter de Gruyter GmbH & Co KG  
In post-industrial societies more and more people earn an income in creative knowledge work, a highly flexible labour market segment that

demands a geographically mobile workforce. Creative knowledge work is based on an understanding of language, culture and symbolic meanings. This can best be obtained through local and national embeddedness. Yet, this necessity for embeddedness stands in contrast to the demand in geographical mobility. How is this contradiction solved by individuals? What new forms of place attachment does this bring about? This book introduces a showcase of

25 multilocal creative knowledge workers, who live in different countries at the same time. It investigates how continuous mobility becomes part of their lifeworld, and how it changes their feelings of belonging and practices of place attachment. Applying an innovative methodological mix of social phenomenology, hermeneutics and mental mapping, this book takes a detailed look at biographies and the role of places in mobile lifeworlds. Plug&Play

Places brings forth the idea that places have to be understood as individual items, which are configured and then plugged into the 'system' of the own lifeworld. They can be 'played' without great effort once an individual needs to make use of them. This new type of place attachment is a form of subjective standardization of place, which complements the well-known models of objective standardization of places. Plug&Play Places is relevant for scientists who deal with

mobility and its impact on individual lifeworlds, with transnational multilocality and with flexibilized labour markets. Furthermore, the book provides a detailed qualitative perspective which can enrich the explanations of quantitative research in the same field. It is an interesting reading also for practitioners engaged in urban planning, housing and real estate development. Robert Nadler holds a doctoral degree in Urban and Local European Studies from

the University of Milan-Bicocca. He is a researcher at the Leibniz Institute for Regional Geography and published on creative industries, multilocality and labour mobility. *Funktionen und Folgen formaler Organisation* Campus Verlag This volume is a collection of subject-oriented studies on paid work. Each chapter refers to the social structures that form conditions for peoples' working contexts and interprets workers' and employees' narrations on

work. Work appropriation—a process of formation of subjectivity, in which workers and employees relate to the social status of their occupations and the use-value of their work in actively dealing with the work's content and conditions—serves as a comprehensive concept for each varying subject-oriented approach in the volume. 'Work Appropriation and Social Inequality' focuses on social inequality, understood as the distribution of life chances

that privilege some and discriminate others and reveals the unequal conditions for, and outcomes of, work appropriation. By analyzing work appropriation, it uses a broader concept than that of 'meaning of work' or 'meaningful work' as it includes the practice and processes of working. The volume's subject-oriented approach to work differs from the stream 'subjectivation' in going beyond individuals' desires for self-realization in work and to companies'

requirements of accessing emotional and personal dimensions of their workforce. The volume contains three parts: the first lays out basic approaches to work appropriation and social inequality, the second analyses current threats to work appropriation in the UK and Germany, and the third consists of a philosophical outlook on work in the Anthropocene. The book's impact lies in pushing forward the debate on how work appropriations are linked to unequal social

structures. It will therefore appeal to social scientists interested in social inequality, sociology of work and organization, as well as students and teachers at the undergraduate and graduate level in the areas of social sciences. *The Law of Accumulation and Breakdown of the Capitalist System* Edited by The Publishing House of the Royal Society. Neuropsychotherapy is intended to inspire further development and continual empirical updating of consistency

theory. It is essential for psychotherapists, psychotherapy researchers, clinical psychologists, psychiatrists, neuroscientists, and mental-health professionals. Profoundly important and innovative, this volume provides necessary know-how for professionals as it connects the findings of modern neuroscience to the insights of psychotherapy. Throughout the book, a new picture unfolds of the empirical grounds of

effective psychotherapeutic work. Author Klaus Grawe articulates a comprehensive model of psychological functioning-consistency theory-and bridges the gap between the neurosciences and the understanding of psychological disorders and their treatment. Neuropsychotherapy illustrates that psychotherapy can be even more effective when it is grounded in a neuroscientific approach. Cutting across disciplines

that are characteristically disparate, the book identifies the neural foundations of various disorders, suggests specific psychotherapeutic conclusions, and makes neuroscientific knowledge more accessible to psychotherapists. The book's discussion of consistency theory reveals the model is firmly connected to other psychological theoretical approaches, from control theory to cognitive-behavioral models to basic need theories.
