The second unit takes a brief look at the basics of cells and tissues to form a foundation for study of larger structures. The remainder of the workbook organizes speech and hearing anatomy into the functional categories of respiration, phonation, articulation, as well as the nervous and auditory systems. Each unit provides an extremely well-written, practical summary of the particular speech and hearing system, followed by learning objectives, specific questions students can answer in outline format, and finally, a self-test. This all-new Study Guide clarifies and simplifies a complex element of the introductory course and provides an ideal complementary learning and self-testing tool for students. To complement the workbook, the Instructor's Manual includes the answers to the workbook questions, and is available in both print and digital format.
