Jody Blake demonstrates in this book that although the impact of African-American music and dance in France was constant from 1900 to 1930, it was not unchanging. This was due in part to the stylistic development and diversity of African-American music and dance, from the prewar cakewalk and ragtime to the postwar Charleston and jazz. Successive groups of modernists, beginning with the Matisse and Picasso circle in the 1900s and concluding with the Surrealists and Purists in the 1920s, constructed different versions of la musique and la danse negre. Manifested in creative and critical works, these responses to African-American music and dance reflected the modernists' varying artistic agendas and historical climates.

**Brass Bands of the World: Militarism, Colonial Legacies, and Local Music Making** Hal Leonard Publishing Corporation Pynchon's Sound of Music is dedicated to cataloging, exploring, and interpreting the manifold manifestations of music in Thomas Pynchon's work. An original mix of close and distant readings, this monograph employs a variety of disciplines--from literary studies and musicology to philosophy, media theory, and history--to explain Pynchon through music and music through Pynchon. Encyclopedic and eclectic in its approach, Pynchon's Sound of Music discusses the author's use of instruments such as the kazoo, harmonica, and saxophone and embarks on close readings of the most salient and musically tantalizing passages. Zooming out to a bird's eye view, Christian Hånggi puts Pynchon's historical musical references and allusions into perspective to trace the trends and tendencies in the development of the

author's interest in music. A treasure trove for fans and an invaluable source for future scholarship, this book includes the Pynchon Playlist, a catalog of over 900 musical references in Pynchon's oeuvre, and an exhaustive index of more than 700 appearances of musical instruments.

"May be the best book ever written about jazz."—David Thomson, Los Angeles Times In eight poetically charged vignettes, Geoff Dyer skillfully evokes the music and the men who shaped modern jazz. Drawing on photos, anecdotes, and, most important, the way he hears the music, Dyer imaginatively reconstructs scenes from the embattled lives of some of the greats: Lester Young fading away in a hotel room; Charles Mingus storming down the streets of New York on a too-small bicycle; Thelonious Monk creating his own private language on the piano. However, music is the driving force of *But Beautiful*, and wildly metaphoric prose that mirrors the quirks, eccentricity, and brilliance of each musician's style.

The Cambridge Companion to the Saxophone, first published in 1999, tells the story of the saxophone, its history and technical development from Adolphe Sax (who invented it c. 1840) to the end of the twentieth century. It includes extensive accounts of the instrument's history in jazz, rock and classical music as well as providing practical performance guides. Discussion of the repertoire and soloists from 1850 to the present day includes accessible descriptions of contemporary techniques and trends, and moves into the electronic age with midi wind instruments. There is a discussion of the function of the saxophone in the orchestra, in 'light music' and in rock and pop studios, as well as of the saxophone quartet as an important chamber music medium. The contributors to this volume are some of the finest performers and experts on the saxophone.

Some time in the 1840s, Narcisse, a young French sailor is abandoned on the coast of Australia and given up for dead by his shipmates. Seventeen years later he is found living among aboriginal peoples, having apparently forgotten everything of his original identity, including his native French language. Octave de Vallombrun, a well-meaning geographer, takes him under his wing and sets out to bring Narcisse, now known as the "white savage" back to civilisation and to find out what happened during those seventeen years. Observing Narcisse's struggle to adjust to the ways of the white man, Octave too begins to question his assumptions about what it means to be civilised, and to see in a new light the man known as the "white savage".

Bands structured around western wind instruments are among the most widespread instrumental ensembles in the world. Although these ensembles draw upon European military traditions that spread globally through colonialism, militarism and missionary work, local musicians have adapted the brass band prototype to their home settings, and today these ensembles are found in religious processions and funerals, military manoeuvres and parades, and popular music genres throughout the world. Based on their expertise in ethnographic and archival research, the contributors to this volume present a series of essays that examine wind band cultures from a range of disciplinary perspectives, allowing for a comparison of band cultures across geographic and historical fields. The themes addressed encompass the military heritage of band cultures; local appropriations of the military prototype; links between bands and their local communities; the spheres of local band activities and the modes of sociability within them; and the role of bands in trajectories toward professional musicianship. This book will appeal to readers with an interest in ethnomusicology, colonial and post-colonial studies, community music practices, as well as anyone who has played with or listened to their local band.
