Accounting Information Systems: Understanding Business Processes is the second edition of the only locally authored textbook available to students who are required to study a subject on accounting

information systems. Due to the converging role of accounting and information systems in business, students are required to possess a firm understanding of accounting information systems and how they impact upon various core business processes. As today's business world is governed by the recommendations of Sarbanes-Oxley and the accounting profession rebuilds its confidence with various stakeholders, the need for quality information and robust accounting information systems is paramount to an organisation's ability to manage operations, make investment decisions, strategically plan, grow the business, and report accurately about financial performance. **FEATURES** AIS in Focus - highlights a range of AIS issues and profiles how real companies implement and utilise various AIS tools. Self-test Activities - multiple choice questions test student knowledge and understanding of the concepts presented in the chapter. Discussion Questions and Problems - expanded in the new edition to provide students with even more scenarios to test their knowledge of the chapter content. NEW TO THIS EDITION New chapters on systems life development cycle, fraud and computer crime and auditing of accounting information systems. 2 new chapters on transaction cycles - production cycle and human resources and payroll. New content relating to the heightened focus on corporate accountability and governance. Expanded coverage on internal controls relating to corporate and IT governance, COSO framework for internal controls and COBIT 4.0 framework and control issues at various stages in data processing. Various updates on ecommerce developments and their impact on AIS.

MANAGEMENT ACCOUNTING: MULTIPLE CHOICE QUESTIONS & ANSWERS Wiley

Simkin & Norman's 12th Edition of *Concepts of Accounting Information Systems* builds upon previous issues with more in-depth focus on topical issues essential to accountants such as Sarbanes-Oxley, Cobit Version 4, XBRL, and of risk and governance in a much more concise, user-friendly way. More Case in Point sections highlight how the concepts are applied in the field and additional multiple choice questions have been added at the end of the chapters to help reinforce the material. An enhanced and updated database chapter also provides hands-on instruction in Microsoft Access.

Bachelor Thesis from the year 2020 in the subject Pedagogy - School System, Educational and School Politics, grade: 14.2, , course: Adventist University of Central Africa, language: English, abstract: The main objective of this study is to examine the impact of accounting information system on effectiveness of secondary schools specifically in Gisenyi Adventist Secondary School. The study was carried out in Gisenyi Adventist Secondary School and both descriptive and multiple regression were used in the course of the study. The sample size of 30 was obtained from known population where the researcher approached them with questionnaires and asked them randomly to answer the prepared questions. The data collected from the respondents were recorded and analyzed using SPSS version 20 and the results were interpreted through frequencies, mean, standard deviation and multiple regression. School effectiveness refers to the extent to which schools are able to accomplish their pre-determined objectives. School effectiveness transcends beyond students passing final examinations. According to School effectiveness has become an area of major concern for educational research from the sixties onwards in the United States. These studies have tended to focus on secondary school effectiveness till 1980. We aimed at studying a variety of effectiveness criteria. As in some other effectiveness studies, we explicitly studied not only student achievement, but also noncognitive outcomes. The mathematics and the language achievement was measured by means of curriculum relevant multiple choice tests at the start of the secondary school and at the end of the first, the second, the fourth, and the sixth grade. The questionnaire with regard to the noncognitive outcomes was also administered several times during the students' secondary school career.
