Despite the fact that Scouting has touched the lives of a quarter of a billion boys and girls and their leaders around the world in the past century, its history has been largely ignored. Scouting Frontiers: Youth and the Scout Movement's First Century is the first book to discuss the history and principal themes of the Boy Scout and Girl Guide movements on an international scale. Inspired by presentations at the ground-breaking 2008 Johns Hopkins University symposium, "Scouting: A Centennial History," the authors examine the world's greatest youth movement through the diverse experiences of its members and their organizations. From Muslim Scouts in Wales to French Scouts in Syria to Girl Guides in colonial Kenya, Scouting has responded to the challenges of international expansion and transformed itself to address cultural, political and social diversity. Scouting Frontiers focuses particularly on the intersections between Scouting's origins and its transformations over the last century as it faced frontiers of nation, empire, religion, race, class, and gender.

Scouts Ultimate Activity Guide Cambridge Scholars Publishing
Fieldbook divided into three sections: Preparing for outings; Outdoor adventures; Appreciating our environment.

Handbook for Scout Masters, Boy Scouts of America Australian Geographic

Cub Scout Leaders Handbook INTEGRALDMS

The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i

detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.
