Over fifty joyous years, David Adam has exercised a rich and profoundly influential ministry. From his earliest days, he was encouraged to use his eyes to absorb what was around him. He writes: 'I lived in a land of open fields, moorland, and beaches: a land of castles, of history, of heroes, saints and story . . . a radiant world . . . full of the mystery of existence.' Leaving school at 15 to work at the local coal mine, he became increasingly aware of the need to have a purpose in life. The Society of the Sacred Mission at Kelham (regarded as 'the Commando course of the Church of England') was his tough training ground, and thereafter he embarked on a 23 year ministry in Danby in the North York Moors. During this time *The Edge of Glory: Prayers in the Celtic Tradition* was published. Many more bestselling volumes were to follow during the exhilarating, exhausting and unforgettable thirteen years he served as Vicar of the Holy Island of Lindisfarne. Though autobiographical, the aim of *The Wonder of the Beyond* is primarily to help us enter a more wonder full world; to open our eyes, ears and hearts to what is about us; to become more truly aware of the glory of God in our midst.

In the realm of political discourse there is a distinct gap in understanding between Russia and the West. To an outsider, the ideas that animate the actions of Russia's ruling elite, opposition, and civil society - from the motivations driving Russia's political actors to the class structure and international and domestic constraints that shape Russia's political thinking - remain shrouded in mystery. Contrary to the view that a bleak discursive uniformity reigns in Vladimir Putin's Russia, *Political Ideologies in Contemporary Russia* shows that the country is engaging in serious theoretical debates across a wide spectrum of modern ideologies including liberalism, nationalism, feminism, and multiculturalism. Elena Chebankova argues that the nation is fragmented and the state seeks to balance the various ideological movements to ensure that none dominates. She shows that each of the main ideological trends is far from uniform, but the major opposition is between liberalism and traditionalism. The pluralistic picture she describes contests many current portrayals of Russia as an authoritarian or even totalitarian state. Offering an alternative to the Western lens through which to view global politics, *Political Ideologies in Contemporary Russia* is a major contribution to our understanding of this world power.

The father of Minnesota ornithology, whose life story opens a window on a lost world of nature and conservation in the state’s early days Imagine a Minneapolis so small that, on calm days, the roar of St. Anthony Falls could be heard in town, a time when passenger pigeons roosted in neighborhood oak trees. Now picture a dapper professor conducting his ornithology class (the university’s first) by streetcar to Lake Harriet for a morning of bird-watching. The students were mostly young women—in sunhats, sailor tops, and long skirts, with binoculars strung around their necks. The professor was Thomas Sadler Roberts (1858–1946), a doctor for three decades, a bird lover virtually from birth, the father of Minnesota ornithology, and the man who, perhaps more than any other, promoted the study of the state’s natural history. A *Love Affair with Birds* is the first full biography of this key figure in Minnesota’s past. Roberts came to Minnesota as a boy and began keeping detailed accounts of Minneapolis’s birds. These journals, which became the basis for his landmark work *The Birds of Minnesota*, also inform this book, affording a view of the state’s

rich avian life in its early days—and of a young man whose passion for birds and practice of medicine in a young Minneapolis eventually dovetailed in his launching of the beloved Bell Museum of Natural History. Bird enthusiast, doctor, author, curator, educator, conservationist: every chapter in Roberts’s life is also a chapter in the state’s history, and in his story acclaimed author Sue Leaf—an avid bird enthusiast and nature lover herself—captures a true Minnesota character and his time.

This hauntingly lovely tale parallels the journey of two people with that of a young dog. The victim of a puppy mill has seized an auspicious moment to escape his cage. Similarly, a gifted artist, Mariana Falla, has fled the constraints of the communist regime in Cuba shortly after the revolution. Daniel Sullivan, once a dedicated veterinarian, likewise has broken free from a web of despair. Having discovered that someone deliberately set fire to his clinic, he has lost faith in humanity. The author delves into the mind and heart of the small dog. She puts into words his imagined thoughts and feelings during his lonely trek through a deep and ever-winding ravine and his climb up into the daunting Adirondack Mountains. Despite the bitter cold and blasting Nordic wind, there is a magic weaved through nature, a beauty which guides and leads as the story unfolds. The same principle acts upon Mariana and Daniel as they together search for the lost dog. They are not without guides, however. Virginia Goia, a middle-aged woman who manages the village animal shelter, befriends them. She encourages Mariana in her search for the lost dog, and she supports the latter's efforts to close down the puppy mill. Also, Virginia listens to Daniel's heart and inspires hope in him. The runaway dog has a guide as well. A little dog suddenly enters his life. This stranger is radiant, as though of fairy dust, and is elusive.

A New York Times bestselling book! Allen and Linda Anderson adopted a traumatized one-year-old cocker spaniel who had been abandoned. Soon, the troubled dog they named “Leaf” turned their home into a war zone. Although Leaf and Allen were forging a friendship with visits to dog parks and bonding time, Leaf’s emotional issues overwhelmed the couple. Shortly after Leaf’s arrival,

Allen, who had spent eight years as a big city police officer and survived so many close calls that Linda called him “Miracle Man,” received a diagnosis from his doctor that made him think his luck had finally run out. Allen had an unruptured brain aneurysm that could be fatal, and the surgery to repair it might leave him debilitated. Having seen his father live for years with the effects of a massive stroke, he dreaded that the worst fate might not be death. What Allen didn’t know is that he and Leaf, like comrades facing the ultimate battle, would be there for each other with the miracle of this man and this dog coming together at exactly the right time.

"I was filled with a pining desire to see Christ's own words in the Bible. . . . I got along to the window where my Bible was and I opened it and . . . every leaf, line, and letter smiled in my face." —The Spiritual Travels of Nathan Cole, 1765 From its earliest days, Christians in the movement known as evangelicalism have had "a particular regard for the Bible," to borrow a phrase from David Bebbington, the historian who framed its most influential definition. But this "biblicism" has taken many different forms from the 1730s to the 2020s. How has the eternal Word of God been received across various races, age groups, genders, nations, and eras? This collection of historical studies focuses on evangelicals' defining uses—and abuses—of Scripture, from Great Britain to the Global South, from the high pulpit to the Sunday School classroom, from private devotions to public causes. In its essence, science is a way of looking at and thinking about the world. In *The Life of a Leaf*, Steven Vogel illuminates this approach, using the humble leaf as a model. Whether plant or

person, every organism must contend with its immediate physical environment, a world that both limits what organisms can do and offers innumerable opportunities for evolving fascinating ways of challenging those limits. Here, Vogel explains these interactions, examining through the example of the leaf the extraordinary designs that enable life to adapt to its physical world. In Vogel's account, the leaf serves as a biological everyman, an ordinary and ubiquitous living thing that nonetheless speaks volumes about our environment as well as its own. Thus in exploring the leaf's world, Vogel simultaneously explores our own. The Ways and Power of Love was originally published in 1954 when Pitirim Sorokin was in the twilight of his career and leading the Harvard Research Center in Creative Altruism. His elaborate scientific analysis of love with regard to its higher and lower forms, its causes and effects, its human and cosmic significance, and its core features constitutes the first study on this topic in world literature to date. Sorokin was the one absolutely essential twentieth-century pioneer in the study of love at the interface of science and religion. Bringing *The Ways and Power of Love* back into print allows a new generation of readers to appreciate Sorokin's genius and to move forward with his endeavor at a time when civilization itself continues to be threatened by a marked inability to live up to the ideal of love for all humankind. It is certainly right to hope, with Sorokin, that progress in knowledge about love can move humanity forward to a better future. Turning the sciences toward the study of love is no easy task, but it can and must be done.
