## DEVAN WHITAKER

### Hunger and Fury Routledge

These two volumes cover the entire period of Macedonia's written history. Volume 1 moves from the Temenid kingdom in the Fifth Century BC, through Hellenistic, Roman, Byzantine, Bulgarian and Serbian rule, to the overthrow of Christian rule by the Ottoman Turks. Many of the highlights in ancient Macedonian history were created by King Philip II and his son Alexander, and by the struggles of the Antigonid regime to withstand the ambitions of the Romans. High points in the Byzantine rule were achieved under Emperor Justinian in the 6th Century, and again under Basil II in the 11th. Geography made Macedonia a transit territory for the Crusades, but their passage was marked nevertheless by wanton brutality. By the beginning of the 13th Century, Byzantine power had passed its apogee, and it suffered the sack of Constantinople by the Fourth Crusade. The ensuing establishment of the Latin Empire exposed Macedonia to repeated rounds of devastation by Latin, Bulgarian and Greek warlords. Despite the recovery of Constantinople by Michael Palaeologus, the much-weakened Byzantine Empire could no longer withstand its foes. Despite the transient displacement of Greek power by Serbian rule, Macedonia was destined to succumb to the Ottomans. The emphasis in Volume 1 is weighted geographically towards Aegean Macedonia - northwestern Greece - where the ancient kingdom was rooted. Vardar Macedonia - the lands that now comprise the Macedonian Republic - only emerged as a civilised historical entity during the Middle Ages. This voyage through history not only documents the Macedonian past, but also discovers its cultural heritage. This includes the mosaics and sculptures of the Alexandrine era, and its Christian churches, for Christianity left its indelible mark on Macedonian civilisation. The book follows the emergence of early Christianity from the time of St. Paul, but gives emphasis to the artistic culture of late antiquity. A further chapter is devoted to

Orthodox mysticism and its fourteenth century role in the creation of the secret churches in the lakes of Ohrid and Prespa.

Another charts the strange history of Athos, Macedonia's Holy Mountain peninsula, in its formative period.

*The Holocaust and European Societies* Fairleigh Dickinson Univ Press

This book explores the Holocaust as a social process. Although the mass murder of European Jews was essentially the result of political-ideological decisions made by the Nazi state leadership, the events of the Holocaust were also part of a social dynamic. All European societies experienced developments that led to the social exclusion, persecution and murder of the continent's Jews. This volume therefore questions Raul Hilberg's category of the 'bystander'. In societies where the political order expects citizens to endorse the exclusion of particular groups in the population, there cannot be any completely uninvolved bystanders. Instead, this book examines the multifarious forms of social action and behaviour connected with the Holocaust. It focuses on institutions and persons, helpers, co-perpetrators, facilitators and spectators, beneficiaries and profiteers, as well as Jewish victims and Jewish organisations trying to cope with the dynamics of exclusion and persecution.

**Macedonia** Routledge

This book addresses a range of real-world issues including industrial activity, energy management, education, business and health. Today, technology is a part of virtually every human activity, and is used to support, monitor and manage equipment, facilities, commodities, industry, business, and individuals' health, among others. As technology evolves, new applications, methods and techniques arise, while at the same time citizens' expectations from technology continue to grow. In order to meet the nearly insatiable demand for new applications, better performance and higher reliability, trustworthiness, security, and power consumption efficiency, engineers must deliver smart innovations, i.e., must develop the best techniques, technologies and services in a way that respects human beings and the environment. With that goal in mind, the key topics addressed in this book are: smart technologies and artificial intelligence, green energy systems, aerospace engineering/robotics and IT, information security and mobile engineering, IT in bio-medical engineering and smart agronomy, smart marketing, management and tourism policy, technology and education, and hydrogen and fuel-cell energy technologies.

*Denying Ethnic Identity* Oxford University Press

Less than two decades after the Yugoslav Wars ended, the edifice of parliamentary government in the Western Balkans is crumbling. This collapse sets into sharp relief the unreformed authoritarian tendencies of the region's entrenched elites, many of whom have held power since the early 1990s, and the hollowness of the West's "democratization" agenda. There is a widely held assumption that institutional collapse will precipitate a new bout of ethnic conflict, but Mujanovic argues instead that the Balkans are on the cusp of a historic socio-political transformation. Drawing on a wide variety of sources, with a unique focus on local activist accounts, he argues that a period of genuine democratic transition is finally dawning, led by grassroots social movements, from Zagreb to Skopje. Rather than pursuing ethnic strife, these new Balkan revolutionaries are confronting the "ethnic entrepreneurs" cemented in power by the West in its efforts to stabilise the region since the mid-1990s. This compellingly argued book harnesses the explanatory power of the striking graffiti scrawled on the walls of the ransacked Bosnian presidency during violent anti-government protests in 2014: 'if you sow hunger, you will reap fury'.

**Proceedings of the Annual Meeting of the Berkeley Linguistics Society** John Benjamins Publishing

Bulgaria and Serbia during socialism are outlined from many different points of view in this volume. Beyond local and personal trajectories the authors illuminate more general and comparative questions. Was there anything like a "socialist anthropology", common to all three countries? Did Soviet and/or Marxist influences, in the discipline and in society in general, penetrate so deeply as to form an unavoidable common denominator of anthropological practice? The answers turn out to be complex and subtle. While unifying ideological forces were very strong in the 1950s, diversity increased thereafter. Anthropology was entangled with national ideology in all three countries, but the evidence nonetheless calls for "polyphonic" interpretations.

*A History of the Gypsies of Eastern Europe and Russia* John Wiley & Sons

In recent news coverage of the dramatic political events in Eastern Europe, Gypsies have been a favourite sidebar topic. Some of the stories have been truly horrifying, others are written condescendingly and to

amuse; but what has become clear is how little we really know about this people. In a concerted effort to uncover the modern history of the Rom in Eastern Europe, the authors examine the Gypsy experience in Albania, Czechoslovakia, Hungary, Romania and Yugoslavia, with special attention to the Nazi Holocaust as well as to the record of the forced settlement and education programmes instituted by communist regimes.

This description of the structure of Old Church Slavonic is intended to present fully the important data about the language, without citing all the minutiae of attested variant spellings. The facts have been treated from the point of view of structural linguistics, but pedagogical clarity has taken precedence over the

conciseness required for elegant formal description.

This comparative investigation is focused on the comparison of contents, themes, topics, motives, but also symbolism, stereotype situations, patterns of behavior etc. of sung and narrated oral text in South-east Europe. Great importance was given to bibliography, usually difficult to compile in a time-consuming process; a separate part at the end of the volume is dedicated to a bibliographie résonée, arranged according to countries and genres; this will facilitate further and more specific research in special fields of interest. This book offers for the first time a comparative survey of nearly all genres of the traditional oral folklore of Southeast Europe, independent from language, ethnic grouping, national borders, religion and confessions; in this way the high degree of homogeneity of the highly

developed traditional oral culture in the historical Balkans is documented as well as the high numbers of variants and versions and the superb literary quality of these orally transmitted lingual manifestations, in some cases equal to the written literature of the region. Die komparative Untersuchung beschäftigt sich mit dem Vergleich von Inhalten, Thematiken und Motiven, von gesungenen und gesprochenen Oraltexten in Südosteuropa, aber auch symbolischen Konstellationen, stereotype Situationen, Verhaltensweisen, die alle zusammen charakteristische Teile der traditionellen Kulturtopologie des Balkanraums bilden. Besondere Sorgfalt wird auf die schwierig und zeitraubend zu erfassenden Bibliographie gelegt; ein eigener Abschnitt am Bandende bringt eine ausführlich kommentierte kritische Bibliographie, nach Ländern und Gattungen geordnet, die weiterführende spezifischere Forschungsvorhaben erleichtern soll. Mit dieser Monographie wird erstmals eine

vergleichende Gesamtübersicht über die südosteuropäische Folklore geboten, unabhängig von Sprachzugehörigkeiten, Ethnien, Staatsgrenzen, Religionen und Glaubensgemeinschaften, und damit der hohe Grad an Homogenität der traditionellen Oralkultur dieses historischen Kommunikationsraums nachgewiesen, ebenso wie die hohe Variantenanzahl und literarische Qualität dieser mündlichen Sprachmanifestationen, die der schriftlichen Literatur durchaus ebenbürtig sind
