fresh, plant-
based dishes
people want

to eat right now: Smoked Farro with Wild Mushrooms and Halloumi, Swiss Chard Slab Pie with Smoked Peppercorn Crust, and Smoked Chickpeas with Spinach and Saffron Yogurt. And because firing up dinner is best enjoyed with an adult beverage, this complete guide also helps you set up your bar for modern smoke-kissed cocktails. [The Best of Food & Wine](#) Abrams "This is a

teeth-chattering, eyes bulging, shuddering-and-shaking, chills-at-the-back-of-your-neck ghost story. I loved it!"—R.L. Stine, author of the Goosebumps series For fans of Small Spaces and the Goosebumps series by R.L. Stine comes a chilling ghost story based on real Chicago history about a malevolent spirit, an unlucky girl, and a haunting mystery that will tie the two together.

Claire has absolutely no interest in the paranormal. She's a scientist, which is why she can't think of anything worse than having to help out her dad on one of his ghost-themed Chicago bus tours. She thinks she's made it through when she sees a boy with a sad face and dark eyes at the back of the bus. There's something off about his presence, especially because when she checks at the end of the

<p>tour...he's gone. Claire tries to brush it off, she must be imagining things, letting her dad's ghost stories get the best of her. But then the scratching starts. Voices whisper to her in the dark. The number 396 appears everywhere she turns. And the boy with the dark eyes starts following her. Claire is being haunted. The boy from the bus wants something...and Claire needs to find out what before it's too</p>	<p>late. Pick up Scritch Scratch if you are looking for: A book for middle school students, 5th grade to 9th grade A story with a strong female protagonist that explores bravery, friendship, and family Mystery books for kids 9-12 Chilling ghost stories and ghost books for kids (perfect for Halloween!) Historical mysteries and Chicago history books for kids <u>Noise and Military Service</u></p>	<p>National Academies Press The Institute of Medicine carried out a study mandated by Congress and sponsored by the Department of Veterans Affairs to provide an assessment of several issues related to noise-induced hearing loss and tinnitus associated with service in the Armed Forces since World War II. The resulting book, Noise and Military Service: Implications for Hearing</p>
--	--	---

Loss and Tinnitus, presents findings on the presence of hazardous noise in military settings, levels of noise exposure necessary to cause hearing loss or tinnitus, risk factors for noise-induced hearing loss and tinnitus, the timing of the effects of noise exposure on hearing, and the adequacy of military hearing conservation programs and audiometric testing. The book stresses

the importance of conducting hearing tests (audiograms) at the beginning and end of military service for all military personnel and recommends several steps aimed at improving the military services' prevention of and surveillance for hearing loss and tinnitus. The book also identifies research needs, emphasizing topics specifically related to military

service.

Why the Left Loses Readme Publishing
Tom Siegert is The Suburban FootballerTom was a below average junior player and his career has been in free fall ever since. It is the final round of the season and once again he finds himself in the familiar position of warming the interchange bench. It's freezing cold, rain is tumbling down and his head is thumping with his worst hangover since last

week. As he sits, wishing he was anywhere but playing a game of footy, he wonders why he does it to himself. Should this be his final season or should he go around one last time?

The Prisoners' Dilemma John

Wiley & Sons
I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother

died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Try and Stop

Me Wings Press
One girl's mission to find life in space leads to an out-of-this-world adventure perfect for the astronaut-in-training in your life. Una loves imagining a

life in space. Life on Earth is just so-so. But how will she get there? Can she complete her mission to discover life in space? Oh! And did she remember to feed her goldfish? From award-winning creator Philip Bunting, Give Me Some Space is a delightful story that expertly merges nonfiction facts with imaginative play. Readers will love blasting off with Una, and learning along the way!

Introduction to UAV Systems
Sourcebooks, Inc.
Around the world, parties of the left and center-left have been struggling, losing ground to right-wing parties and various forms of reactionary populism. This book brings together a range of leading academics and experts on social democratic politics and policy to offer an international, comparative view of the changing political

landscape. Using case studies from the United Kingdom, Germany, Spain, France, Australia and New Zealand contributors argue that despite different local and specific contexts, the mainstream center-left is beset by a range of common challenges. Analysis focuses on institutional and structural factors, the role of key individuals, and the atrophy of progressive ideas as

interconnected reasons for the current struggles of the center-left.

Men and Rubber Ten Speed Press

Unmanned aerial vehicles (UAVs) have been widely adopted in the military world over the last decade and the

success of these military applications is increasingly driving efforts to establish unmanned aircraft in non-military roles.

Introduction to UAV Systems, 4th edition provides a comprehensive introduction to all of the elements of a complete Unmanned Aircraft System (UAS). It addresses the air vehicle, mission planning and control, several types of mission payloads, data links and how

<p>they interact with mission performance, and launch and recovery concepts. This book provides enough information to encourage a student to learn more; to provide a specialist with a basic appreciation of the technical issues that drive other parts of the system and interact with their specialty; or to help a programmer understand system-level tradeoffs and</p>	<p>know what questions to ask. Key features: Comprehensive overview of all elements of a UAS and of how they interact. Introduces the underlying concepts of key subsystems. Emphasizes system-integration issues and how they relate to subsystem design choices. Practical discussion of issues informed by lessons learned in UAV programs. Introduction to</p>	<p>UAV Systems, 4th edition is written both for newcomers to the subject and for experienced members of the UAV community who desire a comprehensive overview at the system level. As well as being a primary text for an introductory course on UAS or a supplementary text in a course that goes into more depth in one of the individual technologies involved in a</p>

Draplin Design Co.

Honey Bear Books

A funny, colorful, fascinating tour through the work and life of one of today's most influential graphic designers.

Esquire. Ford Motors. Burton Snowboards. The Obama Administration

. While all of these brands are vastly different, they share at least one thing in common: a teeny little bit of Aaron James Draplin. Draplin is one of the new school of influential graphic designers who combine the power of design, social media, entrepreneurs hip, and DIY aesthetic to create a successful business and way of life. Pretty Much Everything is a mid-career survey of work, case

studies, inspiration, road stories, lists, maps, how-tos, and advice. It includes examples of his work—posters, record covers, logos—and presents the process behind his design with projects like Field Notes and the “Things We Love” State Posters. Draplin also offers valuable advice and hilarious commentary that illustrates how much more goes into design than just what

appears on the page. With Draplin's humor and pointed observations on the contemporary design scene, *Pretty Much Everything* is the complete package.

Thien carbazon e-Methyl Kids Book Press
This book describes the evolving CBRN risk landscape and highlights advances in the "core" CBRN technologies, including when combined with (improvised) explosive devices (CBRNe

threats). It analyses how associated technologies create new safety and security risks, challenging certain assumptions that underlie current control regimes. The book also shows how technologies can be enablers for more effective strategies to mitigate these risks. 21st-century safety and security risks emanating from chemical, biological, radiological and nuclear

materials – whether resulting from natural events, accidents or malevolent use – are increasingly shaped by technologies that enable their development, production or use in ways that differ from the past. Artificial intelligence, the use of cyberspace, the revolution in the life sciences, new manufacturing methods, new platforms and equipment for agent delivery, hypersonic

weapons systems, information tools utilised in hybrid warfare – these and other technologies are reshaping the global security environment and CBRN landscape. They are leading to a growing potential for highly targeted violence, and they can lead to greater instability and vulnerability worldwide. At the same time, technology offers solutions to

manage CBRN risks. Examples are faster detection, more accurate characterisation of the nature and origin of CBRN agents, new forensic investigation methods, or new medical treatments for victims of CBRN incidents. New educational concepts help to foster a culture of responsibility in science and technology and strengthen governance. New training methods help develop

practical skills to manage CBRN risks more effectively. The book concludes that there is a growing need for a holistic framework towards CBRN risk mitigation. Traditional arms control mechanisms such as global, regional or bilateral treaties and export controls are still needed, as they provide a necessary legal and institutional framework. But laws and

technology denial alone will not suffice, and institutional mechanisms can at times be weak. Given the pace of technological progress and the diffusion of critical knowledge, tools and materials, policymakers must accept that CBRN risks cannot be eliminated altogether. Instead, society has to learn to manage these risks and develop resilience against them. This requires a

“softer”, broadly based multi-stakeholder approach involving governments, industry, the research and development communities, educators, and civil society. Furthermore, educating policymakers that cutting-edge technologies may seriously affect global strategic stability could create incentives for developing a more creative and contemporary arms control strategy that

fosters cooperation rather than incremental polarisation. Scattered Shadows Harry N. Abrams “The Cold War . . . was a fight to the death,” notes Thomas C. Reed, “fought with bayonets, napalm, and high-tech weaponry of every sort—save one. It was not fought with nuclear weapons.” With global powers now engaged in cataclysmic encounters, there is no more

important time for this essential, epic account of the past half century, the tense years when the world trembled At the Abyss. Written by an author who rose from military officer to administration insider, this is a vivid, unvarnished view of America's fight against Communism, from the end of WWII to the closing of the Strategic Air Command, a work as full of human interest as

history, rich characters as bloody conflict. Among the unforgettable figures who devised weaponry, dictated policy, or deviously spied and subverted: Whittaker Chambers—the translator whose book, *Witness*, started the hunt for bigger game: Communists in our government; Lavrenti Beria—the head of the Soviet nuclear weapons program who apparently

killed Joseph Stalin; Col. Ed Hall—the leader of America's advanced missile system, whose own brother was a Soviet spy; Adm. James Stockwell—the prisoner of war and eventual vice presidential candidate who kept his terrible secret from the Vietnamese for eight long years; Nancy Reagan—the “Queen of Hearts,” who was both loving wife and instigator of palace intrigue in her

husband's White House. From Eisenhower's decision to beat the Russians at their own game, to the "Missile Gap" of the Kennedy Era, to Reagan's vow to "lean on the Soviets until they go broke"—all the pivotal events of the period are portrayed in new and stunning detail with information only someone on the front lines and in backrooms could know. Yet At the Abyss is more

than a riveting and comprehensive recounting. It is a cautionary tale for our time, a revelation of how, "those years . . . came to be known as the Cold War, not World War III." **Scritch Scratch** Cambridge University Press Over the last two decades, and in the wake of increases in recorded crime and other social changes, British criminal justice policy

has become increasingly politicised as an index of governments' competence. New and worrying developments, such as the inexorable rise of the US prison population and the rising force of penal severity, seem unstoppable in the face of popular anxiety about crime. But is this inevitable? Nicola Lacey argues that harsh 'penal populism' is not the inevitable fate of all contemporary

democracies. Notwithstanding a degree of convergence, globalisation has left many of the key institutional differences between national systems intact, and these help to explain the striking differences in the capacity for penal tolerance in otherwise relatively similar societies. Only by understanding the institutional preconditions for a tolerant criminal justice system

can we think clearly about the possible options for reform within particular systems. *The Essential Whole Earth Catalog* Health Canada's Pest Management Regulatory Agency (PMRA), under the authority of the Pest Control Products Act and Regulations, has granted conditional registration for the sale and use of Thiencarbazon e-methyl Technical Herbicide, Velocity

Herbicide and AE1162464 WG63 Herbicide, containing the technical grade active ingredient thiencarbazon e, to control specific weeds in corn and wheat (spring and durum). This overview describes the key points of the evaluation, while the Science Evaluation provides detailed technical information on the human health, environmental and value assessments of

<p>Thiencarbazon e-methyl Technical Herbicide, Velocity Herbicide and AE1162464 WG63 Herbicide.-- Document.</p> <p>Twelve Years a Slave</p> <p>Small Animal Regional Anesthesia and Analgesia is an up-to- date, complete resource for performing local anesthetic techniques in small animals. This practical, clinically oriented reference presents step- by-step</p>	<p>procedures for performing common locoregional blocks and is organized logically by body system. The first book to draw information on this topic into one resource, Small Animal Regional Anesthesia and Analgesia is equally useful as a comprehensiv e reference and as a quick source of information with checklists and pictures to assist with performing various blocks in practice. Beginning with</p>	<p>introductory sections offering an overview of general considerations for patient preparation and pharmacology , the heart of the book is devoted to detailed instructions for performing regional anesthetic techniques, including reviews of the literature, useful illustrations, diagrams, and clinical tips.
