Gujarat Files is the account of an eight-month long undercover investigation by journalist Rana Ayyub into the Gujarat riots, fake encounters and the murder of state Home Minister Haren Pandya that brings to the fore startling revelations. Posing as Maithili Tyagi, a filmmaker from the American Film Institute Conservatory, Rana met bureaucrats and top cops in Gujarat who held pivotal positions in the state between 2001 and 2010. The transcripts of the sting operation reveal the complicity of the state and its officials in crimes against humanity. With sensational disclosures about cases that run parallel to Narendra Modi and Amit Shah's ascent to power and their journey from Gujarat to New Delhi, the book tells you the hushed truth of the state in the words of those who developed amnesia while speaking before commissions of enquiry, but held nothing back in the secretly taped videos which form the basis of this remarkable read.

Where women are created for the pleasure of men, beauty is the first duty of every girl. In Louise O'Neill's world of Only Every Yours women are no longer born naturally, girls (called "eves") are raised in Schools and trained in the arts of pleasing men until they come of age. Freida and Isabel are best friends. Now, aged sixteen and in their final year, they expect to be selected as companions--wives to powerful men. All they have to do is ensure they stay in the top ten beautiful girls in their year. The alternatives--life as a concubine, or a chastity (teaching endless generations of girls)--are too horrible to contemplate. But as the intensity of final year takes hold, the pressure to be perfect mounts. Isabel starts to self-destruct, putting her beauty--her only asset--in peril. And then into this sealed female environment, the boys arrive, eager to choose a bride. "The Covid-19 pandemic disrupted the education of an estimated 90 percent of the world's school-aged children. [This report] is based on over 470 interviews with students, parents, and teachers in 60 countries between April 2020 and April 2021. It documents how Covid-related school closures did not affect all children equally, as governments failed to provide all children with the opportunity, tools, or access needed to keep learning during

the pandemic. Students from groups already facing discrimination and exclusion from education even before the pandemic were disproportionately adversely affected. Governments' long-term failures to remedy discrimination and inequalities in their education systems, and often to ensure basic government services, such as affordable, reliable electricity in homes, or facilitate affordable internet access, meant schools entered the pandemic ill-prepared to deliver remote education to all students equally. Children from low-income families were more likely to be excluded from online learning because they did not have reliable electricity or sufficient access to the internet or devices. Historically under-resourced schools particularly struggled to reach their students."--Page 4 of cover.

The Exciplex contains the proceedings of the International Exciplex Conference held at the University of Western Ontario, on May 28-31, 1974. The papers explore various aspects of exciplex behavior and cover topics ranging from singlet- and triplet-state exciplexes to the photophysics of aromatic excimers. Electron-transfer reactions in multicomponent systems are also considered, along with intramolecular triplet-state charge-transfer interactions in aminoketones. Comprised of 15 chapters, this book opens with an overview of the photochemistry of excimers and exciplexes, followed by a discussion on singlet- and triplet-state exciplexes and the photophysics of aromatic excimers. Experimental results on intersystem crossing and ionic recombination processes are then presented, and electronic structures as well as dynamical behavior of some exciplex systems are described. The next chapters focus on excimers of hydrogen and acetone; complexes of dipolar excited states and small polar molecules; electron transfer and exciplex formation from triplet states of anthracene and metalloporphyrins; and exciplexes in electrogenerated chemiluminescence. The final chapter is devoted to intramolecular triplet-state charge-transfer interactions in aminoketones. This monograph will be of interest to chemists and physicists. *A Dictionary of the Principal Languages Spoken in the Bengal Presidency, Viz.
