*Control of Human Behavior, Mental Processes, and Consciousness* Springer  
Who is Albert Bandura and how did he revolutionise the field of psychology with his theory on self-efficacy? What is the impact of this theory in the modern world? Immerse yourself in an exploration of Albert Bandura's fascinating life and ideas. Discover how Bandura, one of the giants of psychology, redefined our understanding of human potential with the concept of self-efficacy. Through detailed analyses of his pioneering research and the fundamental principles of his theory, as well as practical exercises and insights for self-reflection, this book offers a comprehensive overview of Bandura's contribution to psychology. From his personal growth journey to his groundbreaking studies on social learning, you will explore how Bandura analysed how we face life's challenges to develop confidence in our abilities. Be prepared to discover how the concept of self-efficacy can transform your life by developing confidence and personal effectiveness, an essential resource for anyone wishing to explore the power of the human mind in the modern world.

*Self-Efficacy Beliefs of Adolescents* Springer Science & Business Media  
Resilience in Children, Adolescents, and Adults: Translating Research into Practice recognizes the growing need to strengthen the links between theory, assessment, interventions, and outcomes to give resilience a stronger empirical base, resulting in more effective interventions and strength-enhancing practice. This comprehensive volume clarifies core constructs of resilience and links these definitions to effective assessment. Leading researchers and clinicians examine effective scales, questionnaires, and other evaluative tools as well as instructive studies on cultural considerations in resilience, resilience in the context of disaster, and age-appropriate interventions. Key coverage addresses diverse approaches and applications in multiple areas across the lifespan. Among the subject areas covered are: - Perceived self-efficacy and its relationship to resilience. - Resilience and mental health promotion in the schools. - Resilience in childhood disorders. - Critical resources for recovering from stress. - Diversity, ecological, and lifespan issues in resilience. - Exploring resilience through the lens of core self-evaluation. Resilience in Children, Adolescents, and Adults is an important resource for researchers, clinicians and allied professionals, and graduate students in such fields as clinical child, school, and developmental psychology, child and adolescent psychiatry, education, counseling psychology, social work, and pediatrics.

*Handbook of Writing Research, Second Edition* Corwin Press  
Models of human nature and causality; Observational learning; Enactivelearning; Social diffusion and innovation; Predictive knowledge and forethought; Incentive motivators; Vicarious motivators; Self-regulatory mechanisms; Self-efficacy; Cognitive regulators.

*The Handbook of Behavior Change* Psychology Press  
For students, this is an invaluable collection of some of the best work on the topic, and for the specialist it will be a handy resource. It is ideal for advanced undergraduate and graduate courses on self, identity, and related topics.

*Sport, Exercise, and Performance Psychology* Simon and Schuster  
This Encyclopedia provides a comprehensive overview of individual differences within the domain of personality, with major sub-topics including assessment and research design, taxonomy, biological factors, evolutionary evidence, motivation, cognition and emotion, as well as gender differences, cultural considerations, and personality disorders. It is an up-to-date reference for this increasingly important area and a key resource for those who study intelligence, personality, motivation, aptitude and their variations within members of a group.

*The Power of Self Efficacy* Cambridge University Press  
The Handbook of Motivation at School presents the first comprehensive and integrated compilation of theory and research on children's motivation at school. It covers the major theoretical perspectives in the field as well as their application to instruction, learning, and social adjustment at school. Key Features: Comprehensive – no other book provides such a comprehensive overview of theory and research on children's motivation at school. Theoretical & Applied – the book provides a review of current motivation theories by the developers of those theories as well as attention to the application of motivation theory and research in classrooms and schools. Chapter Structure – chapters within each section follow a similar structure so that there is uniformity across chapters. Commentaries – each section ends with a commentary that provides clear directions for future research.

*Self-Efficacy* Prometheus Books  
If you're ready to develop greater Self Efficacy in order to achieve any goal you set out for yourself, then this book is for you!How do you fare in the face of adversity? Do you have the ability to overcome fears and other obstacles in order to achieve your ultimate goal? Or do you have a more defeatist attitude? Self-efficacy is the belief in your own abilities to adequately deal with challenges life throws your way. This plays a huge role in your feelings of self-worth and in your ability to achieve ultimate success. Each step you take towards your dream, no matter how big or small, brings you closer and closer. There will be setbacks; there always are. No one's life is perfect. Without your struggles, you would never learn what it means to surpass them to succeed. But when your faith in yourself wavers, self-efficacy is exactly when you need to push yourself even harder. This book is

specifically designed to help you develop greater self-efficacy, taking your ability to succeed to an entirely new level. If you're ready to learn how, let's get started!

*Social Foundations of Thought and Action* Stefano Calicchio  
Written by leading researchers in educational and social psychology, learning science, and neuroscience, this edited volume is suitable for a wide-academic readership. It gives definitions of key terms related to motivation and learning alongside developed explanations of significant findings in the field. It also presents cohesive descriptions concerning how motivation relates to learning, and produces a novel and insightful combination of issues and findings from studies of motivation and/or learning across the authors' collective range of scientific fields. The authors provide a variety of perspectives on motivational constructs and their measurement, which can be used by multiple and distinct scientific communities, both basic and applied.

*Self-Efficacy In Nursing* Psychology Press  
Self efficacy, or the belief that one can self-manage one's own health, is an important goal of health care providers, particularly in chronic illness. This book explores the concept of self efficacy from theory, research, measurement, and practice perspectives. The core of the book is an international collaboration of nurses from the U.S. and the Netherlands who have developed tools for promoting and measuring self efficacy in diabetes management.

*Interpersonal and Intrapersonal Expectancies* Springer Nature  
Advances in Motivation Science, Volume Nine, the latest release in Elsevier's serial on the topic of motivation science, contains interesting articles that cover topics such as The Relentless Pursuit of Acceptance and Belonging, Reward uncertainty and the aversion-attraction dilemma, Neurobiological Mechanisms of Selectivity in Motivated Memory, Accounting for long-term motivation and sustained motivated learning, Interest: A Unique Affective and Cognitive Motivational Variable That Develops, and Neural systems for aversively motivated behavior, Neural systems for aversively motivated behavior, and more. Presents new research in the field of motivation science and research Provides a timely overview of important research programs conducted by the most respected scholars in psychology Gives special attention to directions for future research

*Albert Bandura and the self-efficacy factor* OUP Oxford  
Albert Bandura's highly anticipated examination of his vastly influential work on self-efficacy is now available. The result of over 20 years of research by this renowned psychologist, the book articulates comprehensively Bandura's theory that believing one can achieve what one sets out to do results in a healthier, more effective, and generally more successful life.

*Resilience in Children, Adolescents, and Adults* Academic Press  
Perfect for research assignments in psychology, science, and history, this concise study guide is a one-stop source for in-depth coverage of major psychological theories and the people who developed them. Consistently formatted entries typically cover the following: biographical sketch and personal data, theory outline, analysis of psychologist's place in history, summary of critical response to the theory, the theory in action, and more.

*Encyclopedia of Human Behavior* Springer Publishing Company  
The aim of this encyclopedia is to provide a comprehensive reference work on scientific and other scholarly research on the quality of life, including health-related quality of life research or also called patient-reported outcomes research. Since the 1960s two overlapping but fairly distinct research communities and traditions have developed concerning ideas about the quality of life, individually and collectively, one with a fairly narrow focus on health-related issues and one with a quite broad focus. In many ways, the central issues of these fields have roots extending to the observations and speculations of ancient philosophers, creating a continuous exploration by diverse explorers in diverse historic and cultural circumstances over several centuries of the qualities of human existence. What we have not had so far is a single, multidimensional reference work connecting the most salient and important contributions to the relevant fields. Entries are organized alphabetically and cover basic concepts, relatively well established facts, lawlike and causal relations, theories, methods, standardized tests, biographic entries on significant figures, organizational profiles, indicators and indexes of qualities of individuals and of communities of diverse sizes, including rural areas, towns, cities, counties, provinces, states, regions, countries and groups of countries.

*Cognitive Perspectives on Emotion and Motivation* Guilford Publications  
This book presents the contributions of the members of an Advanced Research Workshop on Cognitive Science Perspectives on Emotion, Motivation and Cognition. The Workshop, funded mainly by the NATO Scientific Affairs Division, together with a contribution from the (British) Economic and Social Research Council, was conducted at Il Ciocco, Tuscany, Italy, 21-27 June 1987. The venue for our discussions was ideal: a quiet holiday hotel, 500m high in the Apennine mountain range, approached by a mile of perilously steep, winding narrow road. The isolation was conducive to concentrated discussions on the topics of the Workshop. The reason for the Workshop was a felt need for researchers from disparate but related approaches to cognition, emotion, and motivation to communicate their perspectives and arguments to one another. To take just one example, the framework of information processing and the metaphor of mind as a computer has wrought a major revolution in psychological theories of cognition.

That framework has radically altered the way psychologists conceptualize perception, memory, language, thought, and action. Those advances have formed the intellectual substrate for the "cognitive science" perspective on mental life.

Self-efficacy in Sport Springer Publishing Company

The Encyclopedia of Human Behavior, Second Edition, Three Volume Set is an award-winning three-volume reference on human action and reaction, and the thoughts, feelings, and physiological functions behind those actions. Presented alphabetically by title, 300 articles probe both enduring and exciting new topics in physiological psychology, perception, personality, abnormal and clinical psychology, cognition and learning, social psychology, developmental psychology, language, and applied contexts. Written by leading scientists in these disciplines, every article has been peer-reviewed to establish clarity, accuracy, and comprehensiveness. The most comprehensive reference source to provide both depth and breadth to the study of human behavior, the encyclopedia will again be a much-used reference source. This set appeals to public, corporate, university and college libraries, libraries in two-year colleges, and some secondary schools. Carefully crafted, well written, and thoroughly indexed, the encyclopedia helps users—whether they are students just beginning formal study of the broad field or specialists in a branch of psychology—understand the field and how and why humans behave as we do. Named a 2013 Outstanding Academic Title by the American Library Association's Choice publication Concise entries (ten pages on average) provide foundational knowledge of the field Each article features suggested further readings, a list of related websites, a 5-10 word glossary and a definition paragraph, and cross-references to related articles in the encyclopedia Newly expanded editorial board and a host of international contributors from the United States, Australia, Belgium, Canada, France, Germany, Ireland, Israel, Japan, Sweden, and the United Kingdom

Personality Theory in a Cultural Context Prentice Hall

Self-belief, known as 'self-efficacy' by sports psychologists is widely believed to be an essential component of sporting success. This volume examines the nature of efficacy as it applies to sporting behaviour in coaches, athletes and teams.

**Encyclopedia of Personality and Individual Differences** Rowman & Littlefield

First published in 1991, this book consists of 13 articles that were originally published in the journal Anxiety Research. They address the topic of anxiety and self-focused attention from a variety of perspectives, representing recent advances in social, clinical and personality psychology at the time. As a whole, the book poses a stimulating theoretical challenge to traditional anxiety research, which had been dominated by psychometric issues, clinical case studies and stable personality constructs. The contributors share the view that anxiety is an emotional state of distress dependent upon specific antecedent cognitive processes such as self-awareness, perceived role discrepancy or unfavourable expectancies.

*Make Learning Personal* Macmillan

This book concentrates on the last twenty years of research in the area of goal setting and performance at work. The editors and contributors believe goals affect action, and this volume has a lineup of international contributors who look at the recent theories and implications in this area for IO psychologists and human resource management academics and graduate students.

**The Self in Social Psychology** Springer

Bringing together several key elements needed to identify the most promising themes for future research in selection and classification, this book's underlying aim is to improve job performance by selecting the right persons and matching them most effectively with the right jobs. An emphasis is placed on current, innovative research approaches which in some cases depart substantially from traditional approaches. The contributors -- consisting of professionals in measurement, personnel research, and applied and military psychology -- discuss where the quantum advances of the last decade should take us further. Comprehensive coverage of the selection and classification domain is provided, including a broad range of topics in each of the following areas: performance conceptualization and measurement, individual differences, and selection and classification decision models. The presentations in each of these areas are integrated into a set of coherent themes. This integration was the product of structured group discussions which also resulted in a further evolution of some of the ideas presented.

*Handbook of Motivation at School* Cambridge University Press

The volume addresses important issues of human adaptation and change.
