Southern Africa Make Your Own Diagnostic Equipment (MYODE) This book, "Make Your Own Diagnostic Equipment" came about from the need of many readers and viewers to be able to make and maintain fairly simple diagnostic gadgets. It is meant to show and guide the professional technician and DIY mechanic on how to make these gadgets. In many cases, due to the

nature of the equipment industry, it is very expensive or virtually impossible to get these tools. The reason being is that often times tool makers don't see a profit in making these simple but effective gadgets. Most, if not all of these tools, are invaluable in diagnosing modern automotive systems. You can estimate that having one of these tools, at the right time when needed, will cut your

diagnostic time by at least 50%. Of course, knowing how to use it is also important. However, by definition if you've already studied how the gadget works, how to build it an also ended up building it yourself, you've already passed the learning curve and chances are you'll know how to use it. At the very least, reading this book will put you in a much better position to also asses diagnostic

This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers

these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively. *Corporate Governance and Climate*

This book  
introduces the  
reader to the

basic concepts of the generation and manipulation of synchrotron light, its interaction with matter, and the application of synchrotron light in the “classical” techniques, while including some of the most modern technological developments. As much as possible, complicated mathematical derivations and formulas are avoided. A more heuristic approach is adopted, whereby the

general physical reasoning behind the equations is highlighted. Key features: A general introduction to synchrotron radiation and experimental techniques using synchrotron radiation. Contains many detailed “worked examples” from the literature. Of interest for a broad audience - synchrotrons are possibly one of the best examples of multidisciplinary research

 The anthrax attacks in September

and October 2001 highlighted the need to develop medical countermeasures. The Project BioShield Act of 2004 authorized the Department of Health and Human Services (HHS) to procure countermeasures for a Strategic National Stockpile. However, in December 2006, HHS terminated the contract for a recombinant protective antigen (rPA)

anthrax vaccine because VaxGen failed to meet a critical contractual milestone. Also, supplies of the licensed BioThrax anthrax vaccine already in the stockpile will start expiring in 2008. GAO was asked to identify (1) factors contributing to the failure of the rPA vaccine contract and (2) issues associated with using the BioThrax in the stockpile. GAO interviewed

agency and industry officials, reviewed documents, and consulted with biodefense experts.

A guided tour of the world's best sailboats with an entertaining expert at your side. With over 100,000 copies sold, these volumes have become invaluable reference for sailors and would-be sailors alike. Using 400 magnificent color

photographs and black-and-white illustrations per volume, Máté analyzes the designs and construction methods of the 30 best boat-builders in the world, builders who have, over the years, consistently shown the highest quality and most creative innovation. He visited boatyards in Europe, Canada, and the United States, for his scrupulous firsthand survey. While revealing the

secrets of the best builders, he lucidly demonstrates what makes these boats the best, furnishing knowledge that can then be applied while choosing any sailboat of whatever make. Besides the perennial classics of Alden, Baltic, Hinckley and Swan, are new entries like the super-fast J-Boats and super luxurious Oysters. The color photographs are benchmarks in nautical publishing,

while the writing is thoughtful, hugely informative and always entertaining. *Mercedes-Benz C-Class Service and Repair Manual* Echo Point Books & Media After her nightmarish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. A Sociable God is a concise work based on Wilber's "spectrum of consciousness " theory, which views individual and cultural development as an evolutionary continuum. Here he focuses primarily on worldviews (archaic, magic, mythic, mental, psychic, subtle, causal, nondual) and evaluates various cultural and religious movements on a scale ranging from</p>	<p>egocentric to ethnocentric to worldcentric to Kosmic. By using this integral view, Wilber hopes, society would be able to discriminate between dangerous cults and authentic spiritual paths. In addition, he points out why these distinctions are crucial in understanding spiritual experiences and altered states of consciousness . In a lengthy new introduction, the author</p>

brings the reader up to date on his latest integral thinking and concludes that, for the succinct and elegant way it argues for a sociology of depth, A Sociable God remains a clarion call for a greater sociology.

Penguin Advancements in boats, tackle, and

equipment, as well as changes in the attitudes and ethics of shark fishermen, have revolutionized recreational sharking. Modern Sharking is about sustainable shark fishing, and in this book, anglers will learn the latest techniques for pursuing sharks while armed with rods, reels, and a higher level of knowledge and respect for their quarry. For more than three

decades, Captain Mark Sampson stood watch over chum lines, ran shark tournaments, worked with biologists, chased IGFA records, and guided thousands of clients to unique shark encounters. Now Captain, he shares the knowledge and experience that allowed him to guide friends and clients to 17 IGFA world records for sharks. In Modern Sharking, Sampson

examines how to chum, rig for, bait, hook, land, clean, cook, or release 20 species of sharks you'll most likely encounter. If you want to challenge one of the strongest, fastest, most exciting creatures on planet Earth, then Modern Sharking is for you.
