If you've ever whiled away an afternoon dreaming of another world, then you know that place is real. Oyster R. Motel has dreamed of another world for almost his whole life. (But that's only understandable—he's been raised in a nunnery. Do you think nuns approve of swinging from the belfry? Of raising tadpoles in the holy water? Of playing the organ at all hours? They do not.) Oyster didn't even know that imaginations could be mapped; he barely knew he had an imagination. But then a gust of wind and a distant voice send him on a dizzying ride in a silver bucket, and Oyster finds himself, his own map in hand, in someone else's imaginary world—a place where rivers breathe and sugar snows down from the sky. Whose world is it? And what does it have to do with Oyster's map? You'll have to read the book to find out. Imagine that.

The Titius-Bode Law of Planetary Distances: Its History and Theory is a 15-chapter book that first discusses the prehistory of the Law from Kepler to Kant. The next chapter details the formulation of the Titius-Bode Law. Subsequent chapters describe the Law's early successes and failures, early modifications of the Law, the Blagg-Richardson formulation, and the significance of the Law with respect to the origin of the solar system. Other chapters discuss the theories of all types that have been proposed to explain the "'classical Titius-Bode Law'", i.e. the geometric progression.

The Noble Mistress Harper Collins

The cataclysmic Long Night has ended, with humanity slowly recovering from the madness-inducing rule of Harrowers. Out of the ruin of the old empires rise two new powers-the democratic Protectorate of Free Cities and the Dominance of Thrycea, ruled by a dynasty of tyrants known as Storm Lords. Between the two lies a buffer zone of provincial kingdoms, where the powerful nations fight out their differences. And in the shadows, defeated but not destroyed, the Harrowers lurk. In Rivern, the westernmost city in the Protectorate, three unlikely individuals stumble into a complicated plot of murder, magic, and politics. One is a Storm Lord, a young woman seeking an arranged marriage to save her kingdom. Another is a healer turned assassin, whose partner is an intelligent sword. And the third is an alcoholic wizard, who may have accidentally unlocked the key to ultimate power and immortality. Three damaged, flawed individuals face a plot to wipe Rivern off the map. Alone they have little to recommend them. Together they might just be able to win out against the manipulative scheming of the Queen of Lies.

Now with a brand new foreword from New York Times bestselling author Jeffrey Zaslow. FIRST YOU HAVE TO ROW A LITTLE BOAT first hit shelves in the mid 1990s and has been inspiring readers ever since. Written by a grown man looking back on his childhood, it reflects on what learning to sail taught him about life: making choices, adapting to change, and becoming his own person. The book is filled with the spiritual wisdom and thought-provoking discoveries that marked such books as Walden, The Prophet, and Zen and the Art of Motorcycle Maintenance. For nearly twenty years, it has enchanted and endeared sailors and non-sailors alike, but foremost, anyone who seeks large truths in small things. This refurbished edition will find a place in the hearts of a whole new generation of readers.

During the 19th century, throughout the Anglophone world, most fiction was first published in periodicals. In Australia, newspapers were not only the main source of periodical fiction, but the main source of fiction in general. Because of their importance as fiction publishers, and because they provided Australian readers with access to stories from around the world—from Britain, America and Australia, as well as Austria, Canada, France, Germany, New Zealand, Russia, South Africa, and beyond—Australian newspapers represent an important record of the transnational circulation and reception of fiction in this period. Investigating almost 10,000 works of fiction in the world’s largest collection of mass-digitized historical newspapers (the National Library of Australia’s Trove database), *A World of Fiction* reconceptualizes how fiction traveled globally, and was received and understood locally, in the 19th century. Katherine Bode’s innovative approach to the new digital collections that are transforming research in the humanities are a model of how digital tools can transform how we understand digital collections and interpret literatures in the past.

Ask any cartoonist: invention comes hard. But not, apparently, for Vaughn Bode, the inimitably gifted creator of Cheech Wizard, from whom characters, concepts and stories pinwheeled at a prodigious rate. His recently discovered diaries, kept from 1963 to 1973, offer even more persuasive evidence of the wild profligacy of his talent. Reprinted in a facsimile format, this four-volume series offers a wealth of finished cartoons, illustrations and strips, as well as tantalising glimpses of Bode classics yet to come, such as "The Man".

Your Greatest Adventure Fantagraphics Books

The two-time Olympic medalist and champion skier shares his story, the secret of his success, and his philosophy of life. Born and raised "off the grid"--Without electricity or indoor plumbing--in a cabin in the woods near Franconia, New Hampshire (pop. 850), Bode is unconventional to the core. The strong values of his simple upbringing, where he and his family had to "invent, grow, or carry in" all the essentials, have made him unique among

today's sports stars. He revolutionized his sport by adopting new and crossover technologies, such as "shape" skis. His outsider status, killer smile, and outspoken yet laid-back persona have earned him a reputation as the Michael Jordan of skiing.--From publisher description.
