This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Truly personal handheld and wearable technologies should be small and unobtrusive and allow access to information and computing most of the time and in most circumstance.

Complimentary, environment-based technologies make artifacts of our surrounding world computationally accessible and facilitate use of everyday environments as a ubiquitous computing interface. The International Symposium on Handheld and Ubiquitous Computing, held for the first time in September 1999, was initiated to investigate links and synergies in these developments, and to relate advances in personal technologies to those in environment-based technologies. The HUC 99 Symposium was organised by the University of Karlsruhe, in particular by the Telecooperation Office (TecO) of the Institute for Telematics, in close collaboration with ZKM Karlsruhe, which generously hosted the event in its truly inspiring Center for Arts and Media Technology. The symposium was supported by the Association of Computing Machinery (ACM) and the German Computer Society (Gesellschaft für Informatik, GI) and held in cooperation with a number of special interest groups of these scientific societies. HUC 99 attracted a large number of paper submissions, from which the international programme committee selected 23 high-quality contributions for presentation at the

symposium and for inclusion in these proceedings. In addition, posters were solicited to provide an outlet for novel ideas and late-breaking results; selected posters are also included with these proceedings. The technical programme was further complemented by four invited keynote addresses, and two panel sessions.

Though a large proportion of Canadians live in suburban communities, the Canadian cultural imaginary is filled with other landscapes. The wilderness, the prairie, cityscapes, and small towns are the settings by which we define our nation, rather than the strip mall, the single-family home, and the developing subdivision, which for many are ubiquitous features of everyday life. *Canadian Suburban* considers the cultures of suburbia as they are articulated in English Canadian fiction published from the 1960s to the present. Cheryl Cowdy begins her excursion through novels set between 1945 and 1970, the heyday of modern suburban development, with works by canonical authors such as Margaret Laurence, Richard B. Wright, Margaret Atwood, and Barbara Gowdy. Her investigation then turns to the meaning of the suburbs within fiction set after the 1970s, when a more corporate model of suburbanization prevailed, and ends with an investigation of how writers from immigrant and racialized communities are radically transforming the suburban imaginary. Cowdy argues there is no one authentic suburban imaginary but multiple, at times contradictory, representations that disrupt prevalent assumptions about suburban homogeneity. *Canadian Suburban* provides a foundation for understanding the literary history of suburbia and a refreshing reassessment of the role of

space and place in Canadian culture and identity.

Samuel Craig, Senior Akshay Sonthalia

How is your marriage? Is it everything you hoped it would be? Is it the happy, successful, fulfilling relationship that God promises it will be in His Holy Scriptures? If we are honest, no matter how good our marriages are, we have to admit that marriage did not live up to our expectations. The good news truth though, is that our marriages can be everything that God promises and that truth is based on these very promises of God. There are things we need to know, understand and act on in order for God's promises to come true in our lives and that is what this book is about - helping you to know how to take your marriage and make it all that God promises your marriage can be in His Word.
