Anyone who has ever imagined plunging bare hands into cool, moist clay and shaping it into a vase, platter, or tile can now experience the pleasure of pottery. Lifelong potter Bill van Gilder has a bounty of time-tested advice on all the basics, and a plethora of fantastic techniques. That means novices will enjoy the advantages of a master teacher guiding them through each stage of the process--while intermediates will eagerly soak up every new idea he has to offer. With van Gilder's help, beginners can try hand building, and progress onto the fundamentals of wheel-throwing. They'll get expert tips on shaping spouts, handles and feet; adding texture, color, and luster; and combining techniques to create a variety of attractive projects. A production potter for more than 30 years, Bill van Gilder, host of DIY Network's Throwing Clay, has traveled around the world to learn, teach, and exhibit his craft. He is a regular contributor to Clay Times magazine, and is on the faculty of The Art League School in Alexandria, Virginia. In 2000, he founded the Frederick Pottery School in Maryland.

These proceedings demonstrate the increasing interest and importance of contact mechanics and wear to the railway industry. The 27 contributions succeed in sustaining a balance between mechanics and metallurgy, theory and practice, and will be of considerable interest to those engaged in research, as well as practising engineers.

Self-Knowledge and Healing Through the Wheel of the Year Unthinkable Media

Hans Giebernath lives among the dull and respectable townfolk of a sleepy Black Forest village.

When he is discovered to be an exceptionally gifted student, the entire community presses him onto a path of serious scholarship. Hans dutifully follows the regimen of study and endless examinations, his success rewarded only with more crushing assignments. When Hans befriends a rebellious young poet, he begins to imagine other possibilities outside the narrowly circumscribed world of the academy. Finally sent home after a nervous breakdown, Hans is revived by nature and romance, and vows never to return to the gray conformity of the academic system.

Pulleys make it easier to raise and lower heavy loads. We can find them all around us, on boats, bikes, flagpoles, and many more places. Pulleys are made up of an axle and a wheel with a groove around its edge. The groove keeps a rope, chain, or cable from slipping off the wheel. Pulleys come in a variety of sizes and materials and can either be fixed or moveable. When two or more pulleys work together, they're called compound pulleys. Readers will learn these facts, see examples of how they are used, learn about the pulley's inventor, and learn where pulleys can be found in their daily lives.

A wheel and axle is a disk and cylinder joined together. These two objects are only a simple machine when used in tandem. A wheel and axle is a modified first-class lever. When force is applied to the axle, the force is multiplied and transferred to the wheel. This causes the wheel to cover more area. Readers will learn about the invention of the wheel and axle, where wheels and axles can be found, and how they make difficult jobs easier.

In *Living the Wheel*, Annabelle Nelson helps us move beyond psychological denial so we can begin to heal the emotions of the unconscious mind, thus opening it to merge with the spirit self hidden there. Spiritual development is not about being "good." It is about suspending judgement of the inner and outer world. In the process, we often deny the very emotions that make us human. Nelson presents positive techniques for people who have gone beyond the first phases of spiritual work so they can deal constructively with the emotions that are often perceived as being "wrong" or "bad" for someone on this path. In this exciting book, Nelson enables us to find our way to emotional health, unite with our spirit, and chart the awakening of the inner self.
