Part of Water Quality Set - Buy all four books and save over 30% on buying separately! Bioanalytical Tools in Water Quality Assessment reviews the application of bioanalytical tools to the assessment of water quality including surveillance monitoring. The types of water included range from wastewater to drinking water, including recycled water, as well as treatment processes and advanced water treatment. Bioanalytical Tools in Water Quality Assessment not only demonstrates applications but also fills in the background knowledge in toxicology/ecotoxicology needed to appreciate these applications. Each chapter summarises fundamental material in a targeted way so that information can be applied to better understand the use of bioanalytical tools in water quality assessment. Bioanalytical tools in Water Quality Assessment can be used by lecturers teaching academic and professional courses and also by risk assessors, regulators, experts, consultants, researchers and managers working in the water sector. It can also be a reference manual for environmental engineers, analytical chemists, and toxicologists. Authors: Beate Escher, National Research Centre for Environmental Toxicology (EnTox), The University of Queensland, Australia, Frederic Leusch, Smart Water Research Facility (G51), Griffith University Gold Coast Campus, Australia. With contributions by Heather Chapman and Anita Poulsen

This handbook offers a thorough treatment of the science of linguistic annotation. Leaders in the field guide the reader through the process of modeling, creating an annotation language, building a corpus and evaluating it for correctness. Essential reading for both computer scientists and linguistic researchers.Linguistic annotation is an increasingly important activity in the field of computational linguistics because of its critical role in the development of language models for natural language processing applications. Part one of this book covers all phases of the linguistic annotation process, from annotation scheme design and choice of representation format through both the manual and automatic annotation process, evaluation, and iterative improvement of annotation accuracy. The second part of the book includes case studies of annotation projects across the spectrum of linguistic annotation types, including morpho-syntactic tagging, syntactic analyses, a range of semantic analyses (semantic roles, named entities, sentiment and opinion), time and event and spatial analyses, and discourse level analyses including discourse structure, co-reference, etc. Each case study addresses the various phases and processes discussed in the chapters of part one.

A collection of blistering, darkly humorous stories that upend the idyllic image of the Greek holiday island. Seeking to escape the paralyzing effects of the Greek economic crisis, a group of Athenian friends move to an Aegean island in the hopes of starting over. Viewed with suspicion and disdain by the locals, they soon find themselves enmeshed in the same vicious cycle of money, power, and violence they thought they had left behind.

Lightweight Landscape Springer Science & Business Media

Ranked by many scholars as the greatest master of early Italian Renaissance painting, Masaccio (1401-1428) was the first artist to use effects of light to create three-dimensional images on a two-dimensional plane. This achievement, revolutionary in Masaccio's day, is one of the painter's significant contributions to art history. This book explores Masaccio's accomplishment as epitomized by the multipaneled painting of which theSaint Andrewpanel is thought to have once formed a part: the Pisa Altarpiece, one of the truly great polyptychs in the history of Italian Renaissance art, produced in 1426 for a chapel in the church of Santa Maria del Carmine, Pisa. The text discusses Masaccio's short life and illustrious career; the commission for the altarpiece; its patron and program; the painting's original location; and the role that the church friars played in the actual commission. Finally, after examining the polyptych's individual panels, the book traces their subsequent history and recounts how art historians came to identify them.

First published in Germany in 1929, *The End and the Beginning* is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Muhlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised

and corrected translation of Zur Muhlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

Kurt Farber war ein Journalist, Abenteurer und Reisender zu Beginn des 20. Jahrhunderts. Er schrieb Reiseberichte, war Korrespondent für verschiedene Zeitungen und brachte seine Reiseerfahrungen auch in Buchform heraus – meist veröffentlicht von seinem Bruder Walter Faber. Wohl als einer der ersten Reisenden der Moderne überhaupt berichtete er über exotische Länder und Orte wie die Anden, Kurdistan oder Persien. Er reiste unter anderem nach Südamerika, Indien und China, besuchte Eskimos und Goldschürfer, reiste mit Hundeschlitten, Segelschiffen und Eisenbahnen. Wer ein Gespür dafür bekommen möchte, wie es war, zu einer Zeit zu reisen, als es zwar schon die ersten motorisierten Fortbewegungsmittel gab, aber noch die wenigsten Gegenden auf der Welt touristisch erschlossen waren, der muss diese Sammlung lesen. Seine Abenteuerlust wurde Kurt Faber zum Verhängnis: Er erfror an den Ufern eines Flusses in Alaska, seine aufgefundenen Leiche war von Tieren angefressen. Es war spät in der Nacht, als ich endlich wieder nach dem Hotel zurückfand. Ich war todmüde, aber schlafen konnte ich nicht, denn tausend Gedanken gingen mir durch den Kopf. – Wie es mir wohl ergehen würde in dieser kalten, bösen Welt? Ob ich mein Glück machen würde auf diesem heißen Pflaster, und dereinst als gemachter Mann, wie dieser Mister Chicago, mit zahllosen Koffern und Kisten und einem Diamantring an jedem Finger nach Deutschland zurückkehren würde? Oder – ja, das war immerhin auch möglich! – ob man nicht in Not und Elend verkommen würde zwischen diesen grauen Häusern; gestorben, verdorben im fremden Lande, wie man es zuweilen in den Büchern las, und wie es leider so oft, so oft auch in Wirklichkeit vorkommt? Dann schämte ich mich meiner Zaghaftigkeit. – Oho! Was ist nur in dich gefahren? Wie ein verzogenes Muttersöhnchen benimmst du dich, und nicht wie einer, der sich schon in allen Ecken und Winkeln der Erde herumgetrieben hat. Bist du droben im Eismeer nicht umgekommen, so wirst du auch hier nicht zugrunde gehen, wo so viele andere ihr Auskommen finden. Im Nu war der Leichtsinn wieder da, und knabenhafte Fantasie fing an zu träumen von Räubern und Gauchos und allerlei anderen exotischen Caballeros, von weiten Reisen über eisige Cordilleren und sonnige Pampaflächen, bis das Dämmergrau des hereinbrechenden Tages in die kahle Stube fiel. Null Papier Verlag www.null-papier.de

Rambles in Rome Mitchell Beazley

This book explains how lightweight materials and structures can be deployed in buildings to meet high environmental and aesthetic standards and emphasizes how the concept of lightness in building technology and design dovetails with the desire to enhance landscape. The first part of the book, on lightweight construction, aims to foster the use of membranes within the specific climatic context and in particular considers how lightweight materials and innovative technologies can enrich the quality of temporary spaces. The second part focuses exclusively on landscape, presenting novel approaches in the search for visual lightness and the quest to improve urban spaces. Particular attention is paid to the Italian experience, where the traditional appreciation of brick and stone has limited the scope for use of lightweight structures and membrane materials, often relegating them to a secondary or inappropriate role. The reader will come to appreciate how this attitude demeans a very advanced productive sector and neglects the ancient tradition of temporary architecture.

Good Will Come From the Sea Oxford University Press

This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read at Oxford Scholarship Online and

offered as a free PDF download from OUP and selected open access locations. Rising inequality and widespread poverty, social unrest and polarization, gender and ethnic disparities, declining social mobility, economic fragility, unbalanced growth due to technology and globalization, and existential danger from climate change are urgent global concerns of our day. These issues are intertwined. They therefore require a holistic framework to examine their interplay and bring the various strands together. Leading academic economists have partnered with experts from several international institutions to explain the sources and scale of these challenges. They gather a wide array of empirical evidence and country experiences to lay out practical policy solutions and to devise a comprehensive and unified plan of action for combatting these economic and social disparities. This authoritative book is accessible to policy makers, students, and the general public interested in how to craft a brighter future by building a sustainable, green, and inclusive society in the years ahead.

Pediatric Incontinence African Minds

Each disease-related chapter begins with a detailed description of the patient and the delineating symptoms used for establishing the diagnosis and differential diagnosis. The highly detailed figures illustrate the metabolic derangement in a uniform way, together with essential aspects of the genetics involved, thus affording clarification and better understanding of the treatment. Topics covered range from general aspects such as the clinical approach, emergency treatment, diagnostic procedures, and psychosocial care for the child and the family, to specific discussions of new modes of treatment, including liver, bone marrow transplantation and somatic gene therapy.

Its clear style and comprehensive coverage make this book an important resource for those researching child care and education practices in the European Union' - "NNEB News " This book would be a useful "quick reference" addition to the library of anyone interested in international issues in education' - "International Journal of Early Years Education " This study provides rigorous and incisive analysis of the data in relation to the conditions existing in each of the member states included in the work' - "Studies in Education " The book is accessible and informative, with a wealth of data which are clearly presented. It will be useful to further and higher education courses for all adults who work with young children' - "Educational Psychology " This book is written by leading representatives in the field of early childhood from eight European countries - Belgium, Denmark, France, Germany, Italy, Spain, Sweden, and the UK. The contributors provide an analysis of the history, philosophy and politics of the forms of provision for young children in their own countries, and the extent to which that provision is deemed to be educational in its general aims.

'Breathtakingly beautiful' i 'Tender and wholehearted' Helen Jukes LONGLISTED FOR THE WAINWRIGHT PRIZE A BEST BOOK OF THE YEAR IN FINANCIAL TIMES AND I When she suddenly finds herself uprooted, heartbroken, grieving and living out of a suitcase in her late twenties, Alice Vincent begins planting seeds. She nurtures pot plants and vines on windowsills and draining boards, filling her many temporary London homes with green. As the months pass, and with each unfurling petal and budding leaf, she begins to come back to life. Mixing memoir, botanical history and biography, *Rootbound* examines how bringing a little bit of the outside in can help us find our feet in a world spinning far too fast.

Rund um die Welt Springer

The worldwide bestseller - 1/3 million copies sold 'With his expert guidance we travel around the globe, from Burundi to Honduras via Vietnam, sipping and spitting as we go. This is high geekery made palatable by the evident love pulsing through every sentence.' - The Guardian 'The subject of coffee has never been more, er, hot, and *The World Atlas of Coffee* takes a close look at its history and evolution, the international range of beans and all the best ways to enjoy coffee. Great pics too.' - Susy Atkins, The Telegraph For everyone who wants to understand more about coffee and its wonderful nuances and possibilities, this is the book to have. Coffee has never been better, or more interesting, than it is today. Coffee producers have access to more varieties and techniques than ever before and we, as consumers, can share in that expertise to make sure the coffee we drink is the best we can find. Where coffee comes from, how it was harvested, the roasting process and the water used to make the brew are just a few of the factors that influence the taste of what we drink. Champion barista and coffee expert James Hoffmann examines these key factors, looking at varieties

of coffee, the influence of terroir, how it is harvested and processed, the roasting methods used, through to the way in which the beans are brewed. Country by country - from Bolivia to Zambia - he then identifies key characteristics and the methods that determine the quality of that country's output. Along the way we learn about everything from the development of the espresso machine, to why strength guides on supermarket coffee are really not good news. This is the first book to chart the coffee production of over 35 countries, encompassing knowledge never previously published outside the coffee industry.

Alps and Sanctuaries of Piedmont and the Canton Ticino Archipelago

Oesophageal atresia-tracheoesophageal fistula (OA-TOF) is a congenital digestive malformation. With improvements in surgical techniques and perioperative care, survival rates now exceed 90% and OA-TOF is no more just a neonatal surgical problem, and the focus has now shifted from mortality to morbidity with focus on long-term survival and quality of life issues. The primary complications experienced by these patients include gastroesophageal reflux, peptic and eosinophilic esophagitis, anastomotic stricture, esophageal dysmotility, abnormal gastric function, feeding difficulties and respiratory disorders including tracheomalacia and "cyanotic spells". Concerns in adults include oesophageal adenocarcinoma and epidermoid carcinoma which have been recently reported. This highlights the need for careful multidisciplinary follow up not only in childhood but also after transition to adulthood. Data regarding long-term outcomes and follow-ups are limited for patients following OA-TOF repair. The determination of the risk factors for the complicated evolution following OA-TOF repair may positively impact long-term prognoses. This e-book contains review articles and position paper on all aspects of management of this condition. The material presented in the following articles is primarily based on the presentations by world experts during the recent Fourth International Conference on Oesophageal Atresia held in Sydney in 2016.

Rootbound Oxford University Press

Pediatric incontinence: evaluation and clinical management offers urologists practical, 'how-to' clinical guidance to what is a very common problem affecting up to 15% of children aged 6 years old. Introductory chapters cover the neurophysiology, psychological and genetic aspects, as well as the urodynamics of incontinence, before it moves on to its core focus, namely the evaluation and management of the problem. All types of management methods will be covered, including behavioural, psychological, medical and surgical, thus providing the reader with a solution to every patient's specific problem. The outstanding editor team led by Professor Israel Franco, one of the world's leading gurus of pediatric urology, have recruited a truly stellar team of contributors each of whom have provided first-rate, high-quality contributions on their specific areas of expertise. Clear management algorithms for each form of treatment support the text, topics of controversy are covered openly, and the latest guidelines from the ICCS, AUA and EAU are included throughout. Perfect to refer to prior to seeing patients on the wards and in the clinics, this is the ideal guide to the topic and an essential purchase for all urologists, pediatric urologists and paediatricians managing children suffering from incontinence.
