Billion-Dollar Brain Department of the Air Force

#1 New York Times bestselling author Frederick Forsyth delivers a frighteningly possible novel of international terrorism and impending war... As the Russian people face starvation, the Politburo is faced with a hard choice: negotiate with America for food, go to war for national survival, or deal with an uprising in the motherland. Through an informant, British Agent Adam Munro learns that the situation is growing dangerously tense, with powerful forces in the USSR maneuvering for supremacy. But even as East and West conduct delicate talks,

events spiral out of control and threaten to undo every step taken. The world's largest oil tanker is hijacked by terrorists, and a Ukrainian "freedom fighter" is rescued in a bloody catastrophe on the Black Sea. From Moscow to Washington, the stakes grow ever more perilous as the mad actions of a few threaten to engulf the entire world in nuclear war—unless Munro can stop them.

By the New York Times bestselling author of *The Bone Clocks* and *Cloud Atlas* | Longlisted for the Man Booker Prize Selected by Time as One of the Ten Best Books of the Year | A New York Times Notable Book | Named One of the Best Books of the Year by The

Washington Post Book World, The Christian Science Monitor, Rocky Mountain News, and Kirkus Reviews | A Los Angeles Times Book Prize Finalist | Winner of the ALA Alex Award | Finalist for the Costa Novel Award From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. Black Swan Green tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepiest village in muddiest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys' games on a frozen lake;

of "nightcreeping" through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an elderly bohemian emigré who is both more and less than she appears; of Jason's search to replace his dead grandfather's irreplaceable smashed watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher's recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-motion divorce in four seasons. Pointed, funny, profound, left-field, elegiac, and

painted with the stuff of life, *Black Swan Green* is David Mitchell's subtlest and most effective achievement to date. Praise for *Black Swan Green* "[David Mitchell has created] one of the most endearing, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like."—The Boston Globe "[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon and Herman Melville, one feels the roof of the narrative lifted off and oneself in thrall."—Time

The incredible story of an Israeli mission that rescued 103 hostages from a hijacked jetliner. On June 27, 1976, Air France Flight 139 was hijacked by terrorists and flown to Entebbe Airport in Uganda. In the following agonizing days, Israeli passengers were singled out and held hostage. A week later on July 4, one hundred Israeli commandos raced 2,500 miles from Israel to Entebbe, landed in the middle of the night, and in a heart-stopping mission that lasted ninety minutes, killed all guerillas and freed 103 hostages. In captivating detail, Stevenson provides a fast-paced hour-

by-hour narration from the hijacking to the final ninety-minute mission. In addition to discussing the incredible rescue itself, Stevenson also covers the political backdrop behind the hijacking, especially Ugandan President Idi Amin's support for the hijackers, which marked one of the first times a leader of a nation had backed terrorist activities. An illustration of one nation's undying spirit, heroism, and commitment to its people in the face of threat, Operation Thunderbolt has become a legendary antiterrorist tale. Although first written in 1976 (and published within weeks of the event), Stevenson's account presents this act of terrorism in a way that is still relevant in our modern-day political climate. A factual account of what could easily be read as sensational fiction, 90

The authors suggest new strategies for enhancing creativity, improving memory, criticizing ideas and generating alternatives, and communicating more effectively with a wider range of people. Using the results of laboratory research previously available only in a piece-meal fashion or in scientific journals,

Bransford and Stein discuss such issues as Teaming new information, overcoming blocks to creativity, and viewing problems from a variety of perspectives.

The Ideal Problem Solver Routledge

The triumphant return of a book that gave us permission to throw out the rulebook, in activities ranging from play to architecture to revolution. When this book first appeared in 1972, it was part of the spirit that would define a new architecture and design era—a new way of thinking ready to move beyond the purist doctrines and formal models of modernism. Charles Jencks and Nathan Silver's book was a manifesto for a generation that took pleasure in doing things ad hoc, using materials at hand to solve real-world problems. The

implications were subversive. Turned-off citizens of the 1970s immediately adopted the book as a DIY guide. The word “adhocism” entered the vocabulary, the concept of adhocism became part of the designer's toolkit, and Adhocism became a cult classic. Now Adhocism is available again, with new texts by Jencks and Silver reflecting on the past forty years of adhocism and new illustrations demonstrating adhocism's continuing relevance. Adhocism has always been around. (Think Robinson Crusoe, making a raft and then a shelter from the wreck of his ship.) As a design principle, adhocism starts with everyday improvisations: a bottle as a candleholder, a dictionary as a doorstop, a tractor seat on wheels as a dining room chair. But it is also an

undeveloped force within the way we approach almost every activity, from play to architecture to city planning to political revolution. Engagingly written, filled with pictures and examples from areas as diverse as auto mechanics and biology, Adhocism urges us to pay less attention to the rulebook and more to the real principle of how we actually do things. It declares that problems are not necessarily solved in a genius's "eureka!" moment but by trial and error, adjustment and readjustment.

This work examines whether "centralized control and decentralized execution" is a valid doctrinal tenet, given the

technological advances in the information age. Fascinating scenarios from recent operations, set in the context of a "complex air operations system," show the dilemmas presented by participants' increased access to information-and the resulting consequences of their decisions. With the uncertainty of war and the blending of diverse organizations, the author illustrates that commanders must balance empowerment with accountability by developing depth in command relationships among their subordinates.
