History of Chess by H. J. R. Murray is widely regarded as the most authoritative and most comprehensive history of the game. Murray's aim is threefold: to present as complete a record as is possible of the varieties of chess that exist or have existed in different parts of the world; to investigate the ultimate origin of these games and the circumstances of the invention of chess; and to trace the development of the modern European game from the first appearance of its ancestor, the Indian chaturanga, in the beginning of the 7th century. The first part of the book describes the history of the Asiatic varieties of chess, the Arabic and Persian literature on chess, and the theory and practice of the game of shatranj. The second part is concerned with chess in Europe in the Middle Ages, its role in literature and in the moralities, and with medieval chess problems, leading up to the beginning of modern chess and the history of the modern game through to the 19th century.

The conviction that the development and promotion of the arts, humanities and culture through the study of literature and the aesthetic are the fundamental constituents of any progress in society is at the heart of this volume. The essays gathered here explore the role of the imagination and aesthetic awareness in an age when the corporatization of knowledge is in the process of transforming literary studies, and political commitment is in danger of disappearing behind a supposedly post-ideological late-capitalist consensus. The main focus of the volume is the mutual implication of aesthetics and ideology and the status and value of different types of art within the political arena. Challenging issues in contemporary aesthetics are examined within the wider framework of current

debates on the disappearance of the real, the crisis in representation, and the use of new media. The wide range of examples collected here, stretching from experimental poetry in post-war Germany, political commitment in twentieth-century French theatre, and countercultural Rumanian theatre under Ceauşescu, to Neo-Victorian fiction, Verbatim theatre in the UK, and political theatre for the masses in Estonia, vouchsafe unique insights into the intersection of aesthetics and ideology and the practical consequences thereof. As such, the volume opens up a space for a meaningful engagement with authentic forms of art from inside and outside the Anglosphere, and, ultimately, uses these examples as a platform from which to imagine some form of "aesthetics", representing an ideal union of aesthetics and ideology. This concept, first coined by the French philosopher Philippe Lacoue-Labarthe, will prove to be relevant both within the parameters of the examples discussed here, but also beyond, for the contributors to this volume are unanimous in refusing to believe that aesthetics and ideology can exist one without the other, and in recognizing the centrality of ethics in any discussion of these notions.

Striking toward peace and harmony the human being is ceaselessly torn apart in personal, social, national life by wars, feuds, inequities and intimate personal conflicts for which there seems to be no respite. Does the human condition in interaction with others imply a constant adversity? Or, is this conflict owing to an interior or external factor of evil governing our attitudes and conduct toward the other person? To what criteria should I refer for appreciation, judgment, direction concerning my attitudes and my actions as they bear on the well-being of others? At the roots of these questions lies human experience which ought to be appropriately clarified before entering into speculative abstractions of the ethical theories and precepts. Literature, which in its very gist, dwells upon disentangling in multiple perspective the peripeteia of our

life-experience offers us a unique field of source-material for moral and ethical investigations. Literature brings preeminently to light the Moral Sentiment which pervades our life with others -- our existence tout court. Being modulated through the course of our experiences the Moral Sentiment sustains the very sense of literature and of personal human life (Tymieniecka).

Nothing like wordplay can make difference between languages look so uncompromising, can give such a sharp edge to the dilemma between forms and effects, can so blur the line between translation and adaptation, or can cast such harsh light on our illusion of complete semantic stability. In the pun the whole language system may resonate, and so may literary traditions and ideological discourses. It follows that the pun does not only put translators to the test, it also poses a challenge to the views and concepts of those who study translation. This book brings together experts on translation and the pun, as well as researchers representing a variety of other relevant disciplines and schools of thought, ranging from theology to deconstruction and from contrastive linguistics to feminism. It can be read as a companion volume to *Wordplay and Translation*, a special issue of *The Translator* (Volume 2, Number 2, 1996), also edited by Dirk Delabastita *The Royal Engineer Journal* Walter de Gruyter GmbH & Co KG Die Reihe Islamkundliche Untersuchungen wurde 1969 im Klaus Schwarz Verlag begründet und hat sich zu einem der wichtigsten Publikationsorgane der Islamwissenschaft in Deutschland entwickelt. All over the world, in the most varied contexts, contemporary theatre is a rich source for increasing the visibility of communities generally perceived by others as minorities, or those who see themselves as such. Whether of a linguistic, ethnic, political, social, cultural or sexual nature, the claims of minorities enjoy a privileged medium in theatre. Perhaps it is because theatre itself is linked to the notions of centre and periphery, conformism and marginality, domination and subjugation - notions that minority theatre constantly examines by staging them - that it is so sensitive to the issues of troubled and conflicted identity and able to give them a universal resonance. Among the questions raised by this volume, is that of the relationship between the particular and the more general aims of this type of theatre. How is it possible to speak to everyone, or at least to the majority, when one is representing the voice of the few? Beyond such considerations, urgent critical examination of the function and aims of minority theatre is needed. To what kind of public is such drama addressed? Does it have an exemplary nature? How is it possible to avoid the pitfalls and the dead end of ghettoization? Certain types of audience-specific theatre are examined in this context, as, for example, theatre as therapy, theatre as an educational tool, and gay theatre. Particular attention is paid to the claims of minorities within culturally and economically dominant western countries. These are some of the avenues explored by this volume which aims to answer fundamental questions such as: What is minority theatre and why does theatre, a supposedly bourgeois, if not to say elitist, art form, have such affinity with the margins? What if, particularly in contemporary society, the theatre as a form, were merely playing out its fundamentally marginal status? The authors of these essays show how different forms of minority theatre can challenge cultural consensus and homogenization, while also aspiring to universality. They also address the central question of the place and status of apparently marginal forms of theatre in the context of globalization and in doing so re-examine theatre itself as a genre. Not only do they illustrate how minority theatre can challenge the dominant paradigms that govern society, but they also suggest their own more flexible and challenging frameworks for theatrical

activity.

The works of the 17th-century French harpsichord composers, the clavecinistes, are among the principal treasures of the harpsichord repertoire. It is a commonplace of music histories that their style was strongly influenced by contemporary lutenists, yet the assessment of this influence has until now been limited to pointing out a few superficial resemblances. This book is the first comprehensive account of the relationship between the two styles. The nature and extent of the influence can now be seen as much more far-reaching than has been supposed. The clavecinistes adopted many details of lute style, and an understanding of these is essential for the proper performance of their works. More importantly, the lute style opened up the possibility of an entirely new expressive dimension in the playing of the harpsichord; in exploring this the clavecinistes evolved a style which dominated European keyboard music in the 17th-century, and provided a basis for the subsequent development of idiomatic keyboard style.

Games form an integral part of life and the rules that determine how they are to be played provide us with rich insights into the specific nature of cultures. Comprising theoretical, philosophical, and legal discussions, the contexts of game playing are comprehensively examined in essays which range widely through time and space. In focussing on the topic of game playing this volume of essays - which stems from a Transcultural symposium on the transcultural key-concept of "the rules of the game" - engages in a fresh way with the field of sports as a unique and yet shared cultural phenomenon.

This volume is mainly a collection of papers presented at the 1995 Mandelieu conference in France which brought together artists and critics. The theme was that of contemporary African theatre in the former British and French empires. The contributions are of interest to those working in theatre generally and to those specialising in African performance,

development studies and comparative literature. The varied topics include: popular theatre, Soyinka and France, syncretic theatre, comparisons between Anglophone and Francophone theatre in the Cameroon, censorship, development theatre and Sony Labou Tansi. There are also interview with Southern African writers and pieces of creative writing.

The Finnish mathematician and astronomer Anders Johan Lexell (1740-1784) was a long-time close collaborator as well as the academic successor of Leonhard Euler at the Imperial Academy of Sciences in Saint Petersburg. Lexell was initially invited by Euler from his native town of Abo (Turku) in Finland to Saint Petersburg to assist in the mathematical processing of the astronomical data of the forthcoming transit of Venus of 1769. A few years later he became an ordinary member of the Academy. This is the first-ever full-length biography devoted to Lexell and his prolific scientific output. His rich correspondence especially from his grand tour to Germany, France and England reveals him as a lucid observer of the intellectual landscape of enlightened Europe. In the skies, a comet, a minor planet and a crater on the Moon named after Lexell also perpetuate his memory.

The map we draw of seventeenth-century French literary and intellectual culture is usually a small one, centered on Paris and Versailles to reflect the consolidation of intellectual and artistic capital under absolutism. Yet this process of centralization depended on the creation of strong infrastructures connecting France's seat of political and cultural power to the provinces and the rest of the world: an efficient postal system, Europe's largest network of foreign embassies, trade links stretching to Asia and the Americas. How

might a focus on these networks – and on the agents, materials, concepts, and practices that constituted them – broaden our mental topo-graphy of seventeenth-century French culture? This question animated a rich discussion during the May 2014 conference of the North American Society for Seventeenth-Century French Literature, held at Duke University and the University of North Carolina, Chapel Hill. The present volume represents a selection of the contributions to the conference. [The International English and French Dictionary](#) Springer
