demography: What
happened to human
population growth about
500 years ago? Human
population started

growing more rapidly about 500 years ago. _____ is a change from high birth rates and high death rates to low birth rates and low death rates. Demographic transition

Quia - Section 5-3 Human Population Growth

1 FOCUS Objectives 5.3.1 Describe how the size of the human population has changed over time. 5.3.2 Explain why population growth rates differ from country to country. Vocabulary Preview Students would benefit from scan-5-3 Human Population Growth

Section 5-3: Human Population Growth

Like the populations of many other living organisms, the size of the human population tends to increase with time. The characteristics of populations, and the social and economic factors that affect them, explain why some countries have high population growth rates while populations of other countries grow slowly or not at all.
