Foreign Direct Investment in Latin America and the Caribbean 2010 The Location Group

This open access book presents theoretical and practical research relating to the vast, publicly financed program for the construction of new schools and the reorganization of existing educational buildings in Italy. This transformative process aims to give old buildings a fresh identity, to ensure that facilities are compliant with the new educational and teaching models, and to improve both energy efficiency and structural safety with respect to seismic activity. The book is divided into three sections, the first of which focuses on the social role of the school as a civic building that can serve the needs of the community. Innovations in both design and construction processes are then analyzed, paying special attention to the Building Information Modeling (BIM) strategy as a tool for the integration of different disciplines. The final section is devoted to the built heritage and tools, technologies, and approaches for the upgrading of existing buildings so that they meet the new regulations on building performance. The book will be of interest to all who wish to

learn about the latest insights into the challenges posed by, and the opportunities afforded by, a comprehensive school building and renovation program.

Project Management - Project Management Case Studies Palgrave Macmillan

In 1977, precisely 20 years after the last unforgettable high speed Mille Miglia in 1957, the great race came back to relive its history all over again with the commemorative Mille Miglia, attracting once more to Brescia's Piazza della Vittoria the cars of the greatest, most prestigious race in the world that took place between the end of the '20s and the second half of the '50s. Since then, the Mille Miglia has gone back to being an event not to be missed, first every two years and then

yearly for all motoring and motor racing enthusiasts. A book tells the story of this great sporting and cultural event, the 2014 edition of which opens with a historical section that recalls the 1934 race, won by Achille Varzi, and the 1954, with the magnificent victory of Alberto Ascari. After that, the book concentrates on the race that took place last May and its protagonists - competitors, crew after crew, car after car, in a long and fully-illustrated section. 2014 Mille Miglia starting grid was full of exceptional protagonists too: actors Luke Evans, Adrien Brody and Jeremy Irons, American TV personality Jay Leno, French stylist Paloma Picasso and industrial designer Mark Newson. Many musicians were also there: Brian Johnson, AC/DC frontman, British rapper Example, Scottish singer Amy Macdonald and Belgian singer Milow. Many racing drivers took the start, first and foremost Eros Crivellari, the only one with an original Mille Miglia to his credit, Andy Wallace, Jochen Mass, Teo Fabi, Bernd Schneider, Jacky Ickx, Martin Brundle and Bruno Senna, with the very evocative helmet of his late uncle Ayrton. This is indispensable publication for all those who were there, and for all vintage car enthusiasts.

Fresh from the Farm 6pk Springer Science & Business Media

Alberto Ponis was born in Genoa in 1933 and studied at Florence University, where he qualified as an architect in 1960. He worked in London with Erno Goldfinger and Denys Lasdun in 1960-64 under the strong and lasting influence also of the movements of Modernism and New Brutalism then prevailing in the theoretical discourse in British architecture. His own studio Ponis established in 1964 in Palau, on the Italian island of Sardinia, working since on private, public and urban planning commissions. In 1990 he was awarded the INARCH prize for the Village of "Stazzo Pulcheddu" in Palau. Ponis often refers to the natural conditions and the social history of Sardinia when talking about his work in architecture. Besides of nature and society, he has also extensively studied the "stazzo," Sardinia's typical rural building type. This thorough knowledge of conditions, traditions and requirements are the foundation of an oeuvre of more than 300 residential buildings. Each of them deeply rooted in its environment and connected with the land and other dwellings by the "sentiero," the path leading to and from the house. Ponis's houses are meant to be summer homes, their inert warmth reflecting the architect's fundamental optimism. They show a natural modesty and simplicity

rather than their owner's wealth or status. They express the architect's great formal skills and sensitivity. They are inconceivable without the Sardinian landscape and history and the island seems to have been expecting just these particular buildings, merging naturally with nature. The new book "Alberto Ponis Sardinia" is the first comprehensive monograph on this highly interesting and original yet little known architect. In five lavishly illustrated sections it documents his biography and early work, his extensive research on Sardinia, eight selected buildings created between 1965-98 that make traceable the evolution of Ponis's work, his philosophy (Thoughts and Forms), and a concluding essay on the essence of his architecture. "

This rich and absorbing history of China from earliest times to the present covers the country's complex political and economic structures and culture in a concise yet nuanced manner. For this new edition, Roberts has developed his analysis of recent interpretations of Chinese history, especially those relating

to prehistory and early history, intellectual and cultural trends, China's relationships with her neighbours and the wider world, the rise of the Communists and the role of women in Chinese society.

Cases and Readings in Management Science Springer

The first Worldwide Retail Market Study carried out by the Location Group examined the 65 most noteworthy international fashion capitals, together with Switzerland, Germany and Austria on 500 pages. As part of this study, 850 retailers, 600 High Streets and 450 shopping centres were put under the microscope. 53 newcomers to Zurich's Bahnhofstrasse were described in the 10-year report.

Currency Substitution and Financial Innovation McGraw-Hill Europe

Operations Management in the Supply Chain: Decisions and Cases is an ideal book for the instructor seeking a short text with cases. This book employs a cross-functional perspective that emphasizes strategy and critical thinking, appealing to non-majors and practical for use in an MBA level or undergraduate course in operations management. The size and focus of the book also make the text attractive for the cross-functional curriculum where students are required to purchase more than one text. The sixteen cases offer variety in length and rigor; and

several are from Ivey, Stanford, and Darden. This mix makes the book appropriate for both undergraduates and MBA students.

The Supply Chain Management Casebook Penguin UK

Filled with 1:72-scale drawings of armored vehicles from the U.S., Britain, Canada, and Russia.

Retail Market Study 2012 Baker Publishing Group (MI)
