This training material is targeted primarily at government officials, with the view that training workshops should be part of a national plan for the support and scale-up of HWTS. These training materials are made up of a Trainer Manual, which provides guidance on planning workshops, selecting trainers and participants, logistic arrangements, and other preparations for workshops, and this manula for participants. The training materials may be adapted to suit the audience. As HWTS is relevant for other health initiatives, such as nutrition, maternal and child health, and HIV/AIDS, the wider application and

dissemination of this training material is greatly encouraged as an option for improving the safety of water, especially among the vulnerable populations and the poor.

The World Health Organization's recently published Global Report on Drowning found that drowning is the third leading cause of unintentional injury death worldwide—making the information

presented in this new book an important part of the global effort to reduce this health risk. Written by leading researchers and academics from around the world, *The Science of Beach Lifeguarding* focuses on the scientific evidence that underpins what is taught to and practised by beach lifeguards. It is the first book to pull together all the different areas involved in beach lifeguarding and evaluate their evidence base. An accessible and informative reference underpinned by the best current research, the book's key themes cover the context of beach lifeguarding, the physical environment in which lifeguards work, medical aspects, practical lifeguarding techniques, physiological standards for lifeguards, safety education, and future developments in beach lifeguarding. The book presents groundbreaking work quantifying the scientific rationale behind a universally accepted fitness standard. It supplies an in-depth examination of the risks and hazards associated with the beach environment, including rip currents and cold water immersion. The book includes a state-of-the-art review of drowning and a comprehensive chapter on first aid. Detailing the recently announced 2015 European Resuscitation Council Guidelines, this book is a must-have for beach lifeguards, beach lifeguard managers, search and rescue personnel, paramedics, sports scientists, health and safety practitioners, and occupational health practitioners.

Bring STEM to life for students with zombies, rockets, celebrities, and more STEM to Story: *Enthralling and Effective Lesson Plans for Grades 5-8* inspires learning through fun, engaging, and meaningful lesson plans that fuse hands-on discovery in science,

technology, engineering, and math (STEM) with creative writing. The workshop activities within the book are the innovative result of a partnership between 826 National's proven creative writing model and Time Warner Cable's Connect a Million Minds, an initiative dedicated to connecting young people to the wonders of STEM through hands-on learning. Authentically aligned with both the Common Core State Standards and the Next Generation Science Standards, this book provides teachers, after-school and out-of-school providers, and parents with field-tested lessons, workshops, and projects designed by professionals in each field. Including reflective observations by arts and science celebrities like Jon Scieszka, Mayim Bialik, and Steve Hockensmith, lessons feature bonus activities, fun facts, and teaching points for instructors at every level. These quirky, exploratory lessons will effectively awaken student imaginations and passions for both STEM and creative writing, encourage identity with scientific endeavors, and make both science and writing fun. Grades five through eight is the critical period for engaging students in STEM, and this book is designed specifically to appeal to - and engage - this age group. The guided curricula fosters hands-on discovery, deep learning, and rich inquiry skills while feeling more like play than school, and has proven popular and effective with both students and teachers. Awaken student imagination and get them excited about STEM Fuse creative writing with STEM using hands-on activities Make scientific principles relevant to students' lives Inspire students to explore STEM topics further The demand for STEM workers is closely linked to global competitiveness, and a successful future in STEM depends upon an early introduction to the scientific mindset. The challenge for teachers is to break

through students' preconceptions of STEM fields as "hard" or "boring," to show them that STEM is everywhere, it's relevant, and it's loads of fun. For proven lesson plans with just a dash of weird, STEM to Story is a dynamic resource, adaptable and applicable in school, after school, and at home.

Janet Lansbury's advice on respectful parenting is quoted and

shared by millions of readers worldwide. Inspired by the pioneering parenting philosophy of her friend and mentor, Magda Gerber, Janet's influential voice encourages parents and child care professionals to perceive babies as unique, capable human beings with natural abilities to learn without being taught; to develop motor and cognitive skills; communicate; face age appropriate struggles; initiate and direct independent play for extended periods; and much more. Once we are able to view our children in this light, even the most common daily parenting experiences become stimulating opportunities to learn, discover, and to connect with our child. "Elevating Child Care" is a collection of 30 popular and widely read articles from Janet's website that focus on some of the most common infant/toddler issues: eating, sleeping, diaper changes, communication, separation, focus and attention span, creativity, boundaries, and more. Eschewing the quick-fix 'tips and tricks' of popular parenting culture, Janet's insightful philosophy lays the foundation for a closer, more fulfilling parent/child relationship, and children who grow up to be authentic, confident, successful adults.

An infant can drown in as little as an inch of water in less than thirty seconds. A bathtub, toilet, bucket, swimming pool, hot tub, or any other container can be dangerous, and water safety should never be taken lightly. It's imperative never to leave a child unsupervised near water, and because child drowning is preventable with a long term commitment to swimming lessons, it's equally important to make sure your child can swim. The

ability to swim is one of the best life skills you can give your child, and the sooner you do it, the safer your child will be. Statistics show that when water skills and comfort in the water are introduced early, children are less likely to develop a fear of swimming. Since a child's fear of water might prevent future attempts at learning the necessary water skills, it's important to start early and be safe. *Mommy and Me Go to Swimming Lessons* is a must-read guide book before starting swimming lessons with your child. Written through a child's eyes, it helps introduce parents and children to swimming lessons and encourages them to feel comfortable and excited about going. Your child will be asked to learn all of the water skills introduced in this book at their own swimming lessons. This is an easy, fun book that your child will want to read over and over again, even after they have started learning to swim. About the Author: Angela A. Kear is the mother of a daughter named Adriana. She wrote this story from her personal experiences with her daughter at swimming lessons. She believes there is a HUGE need for a book that helps prepare parents and children for swimming lessons and encourages them to feel at ease and energized about going. Mrs. Kear is the bestselling author of a wedding planning book titled, *The Busy Brides Bible for Planning a Fabulous Wedding Without the Expensive Cost of a Wedding Planner*. She is originally from Buffalo, New York and currently lives in Columbia, South Carolina as a freelance writer. A magna cum laude graduate from The State University of New York College at Buffalo, she also works as a visual merchandiser for a top name brand clothing line.

This book includes information on all six areas of the PE National Curriculum (games, gymnastic activities, dance, swimming, outdoor and adventurous activities, athletic activities), to increase subject knowledge and to develop teaching, management and planning skills. This book provides professional development for generalist primary teachers and student-

teachers and also offers support to subject leaders charged with the responsibility for other colleagues. It will build on current practice and aim to increase knowledge, understanding, confidence and enthusiasm in an area of the curriculum which often receives a very short time allocation during initial teaching training courses. Teaching Physical Education in the Primary School is a comprehensive guide to the subject for primary educators. It deals with not only the teaching and learning of PE, but also everything that is relevant to co-ordinating the subject.
