Companies are being forced to react to the growing individualization of demand. At the same time, cost management remains of paramount importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter&Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss, among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a customer centric enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology and innovation management, customer behavior, as well as marketing.

An examination of long-term trends in capital formation and financing in the U.S., this study is organized primarily around the principal capital-using sectors of the economy: agriculture, mining and manufacturing, public utilities, non-farm residential real estate, and government. The analysis summarizes major trends in real capital formation and financing, and the factors that determined the trends. Originally published in 1961. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The study of media language is increasingly important both for media studies and for discourse analysis and sociolinguistics. In *Media Discourse*, Norman Fairclough applies the "critical discourse analysis" framework he developed in *Language and Power* and *Discourse and Social Life* to media language. Drawing on examples from TV, radio, and newspapers, he focuses on changing practices of media discourse in relation to wider processes of social and cultural change, particularly the tensions between public and private in the media and the tensions between information and entertainment.

Redesigning Physical Education is a bold and innovative manifesto for the fundamental redesign of physical education for the twenty-first-century world. Aiming at better outcomes for children, better working conditions for teachers, and innovative solutions to the decline of school PE, it calls for a transnational collective action project based on new research frameworks, stressing the fundamental importance of health-enhancing, life-enriching active participation for all children and young people. Action-oriented and evidence-based, the book examines the key challenges driving change, including the equity agenda, institutionalization, outcome and accountability based teaching, and physical activity requirements in schools. With a truly international scope, the text explores perspectives from the USA, Canada, Scotland, England, Wales, Ireland, New Zealand, Australia, and Italy. This is important reading for students and academics studying and working in physical education, kinesiology, public health, and children's physical activity. It is also a valuable resource for pediatric exercise specialists, especially sport and exercise psychologists.

This book explores the problematic relationship between education, social justice and the State, against the background of comparative education research. The book critiques the status quo of stratified school systems, and the unequal distribution of cultural capital and value added schooling. The authors address one of today's most pressing questions: Are social, economic and cultural divisions between the nations, between school sectors, between schools and between students growing or declining?

For many years, the operative manipulation of the most minute structures was frustrated by the limitations of the human eye. With the introduction of the operating microscope by Nylen (1921), fine detailed anatomy was made visible, so that structures could be prepared, presented and manipulated. Nylen used the microscope for treating diseases of the middle ear. In 1946 Perrit in the U.S.A. introduced the operating microscope into the field of ophthalmic surgery. In 1964, Smith, Kunze and Mitchen published reports on their clinical experience using the operating microscope in nerve surgery. Using this technique, it was possible to divide a peripheral nerve into individual fascicle bundles and repair each bundle precisely. Following on from these developments, the term "microsurgery" was introduced to cover that branch of surgery which was carried out using the "equipped" eye - either by using 10x spectacle magnification or, more commonly, the operating microscope. The term "microvascular surgery" developed for the operative treatment of small vessels below 2 mm in diameter. Experimental studies for the use of microsurgery in the clinical situation developed alongside its use on small research animals for transplantation models in immunological study. Microsurgical techniques were used in the transplantation of rat liver, kidneys, pancreas, heart and other organs. The clinical application of these microsurgical techniques is nowadays called "reconstructive microvascular surgery."

Voters in India are more vigilant in monitoring government at the

local than at the national level. In state assembly elections voters reward incumbents for local income growth, and punish them for a rise in inequality, over their entire term in office. But in national elections voters behave myopically, rewarding growth in national income and a fall in inflation and inequality only in the year preceding the election.

Amarna Studies Teach Yourself

Some years ago we, the editors of this volume, found out about each other's deeply rooted interest in the concept of time, the usage of time, and the effects of shortage of time on human thought and behavior. Since then we have fostered the idea of bringing together different perspectives in this area. We are now, therefore, very content that our idea has materialized in the present volume. There is both anecdotal and empirical evidence to suggest that time constraints may affect behavior. Managers and other professional decision makers frequently identify time pressure as a major constraint on their behavior (Isenberg, 1984). Chamberlain and Zika (1990) provide empirical support for this view, showing that complaints of insufficient time are the most frequently reported everyday minor stressors or hassles for all groups of people except the elderly. Similarly, studies in occupational settings have identified time pressure as one of the central components of workload (Derrick, 1988; O'Donnell & Eggemeier, 1986).

Capital in the American Economy World Bank Publications

This book was radically challenging when it was first published, and is only more so today as the concept of consumer collapses under the weight of its many meanings' - Madeleine Bunting, Columnist, *The Guardian* Western-style consumerism appears unstoppable. Yet it has failed to deliver greater happiness and is now facing major environmental, population and political challenges. This book examines the key Western traditions of thinking about and being a consumer. Each chapter posits a consumer model with examples from the international community. Readers are invited to enter an exciting and radical analysis of contemporary consumerism which suggests that consumerism is fragile and consumers unpredictable. Updated with new material, this Second Edition looks at the impact of new technologies on consumerism and the consolidation of consumerism and 'consumer' language in spheres like education and health. The authors discuss the spread of consumerism to developing countries like India and the effect of demographic change and migration. The fallout from 9/11 and United States

military hegemony is examined, as is the influence on consumerism of Islamic fundamentalism, the anti-globalization movement, environmental concerns and depleting natural resources. This book is of interest to advanced undergraduate,

postgraduate and MBA students taking courses on behaviour, buyer behaviour, customer behaviour, consumers and society and retailing. Any one interested in better understanding consumerism will also find this book a fascinating read.
