DK Eyewitness Aztec is a spectacular and  
informative guide to the rise and fall of the  
Aztecs, Incas, and Mayas, who built vast  
empires and left behind a legacy of  
mystery and wonder. Incredible colour  
photographs offer your child a unique  
"eyewitness" view of these amazing  
civilisations. Show your child how jewellery  
was made, and learn what kind of food the  
Aztecs ate, how the Incas built their

homes, and how the Mayan calendar  
worked. Great for projects or just for fun,  
make sure your child learns everything  
they need to know about the Aztecs. Find  
out more and download amazing clipart  
images at [www.dk.com/clipart](http://www.dk.com/clipart).

The Poetics of Aristotle is the earliest  
surviving work of dramatic theory and first  
extant philosophical treatise to focus on  
literary theory. In it, Aristotle offers an  
account of what he calls "poetry". In this  
reflections Aristotle includes verse drama  
– comedy, tragedy, and the satyr play – as  
well as lyric poetry and epic poetry. The  
similarities and differences are being  
described in this work.

*Early Christian & Byzantine Art* Springer

Science & Business Media

Johannes Kepler is a fascinating man who  
would revolutionize humanity's conception  
of the cosmos and their place within it. He  
would replace the Ptolemaic system with  
his three laws that described the orbital  
motion of the planets around the Sun. This  
scientist's work continues to inform and  
facilitate modern advances in technology,  
astronomy, and astrophysics. In addition  
to being an enthralling life and times  
account of a great thinker, this biography  
also supports Common Core standards for  
the reading of biographies, historical and  
scientific accounts, the analyzing of the  
relationship between primary and  
secondary sources, and citing evidence to  
support that analysis.

*Poetics* Independently Published

This wide-ranging reference book covers almost 3000 years, offering enthralling insights into the art and architecture, myths and legends, and everyday life of Mesoamerica. Stories of sun-gods and blood sacrifice, of pyramids and temples, and of the fabulous treasuries filled with gold have fascinated many generations. The World Heritage sites of historic Mexico City and Tenochtitlan, Teotihuacan, Chichen Itza, Tikal and Monte Alban are examined in detail. This unrivalled volume is not only a perfect introduction to the history of these lost civilizations, but also a stunning visual record of a unique period that has helped to shape our world.

No-Nonsense Algebra Perfection Learning  
 Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for

educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it- this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.

*October 1962* Penguin UK

A thirteen-year-old Jewish girl and her family abandoned their house in Amsterdam and went into hiding in 1942, when Nazis occupied Holland. They and another family stayed cloistered in the "Secret Annex" of an old office building for the next two years, until their whereabouts were revealed to the Gestapo. They suffered starvation, boredom, the daily cruelties of living in

tight quarters, and the ever-present prospect of discovery and death because they were cut off from the outside world. Anne Frank kept a diary throughout this time, recording vivid recollections of her events. Her story is a fascinating meditation on human tenacity and weakness, as well as a riveting self-portrait of a sensitive and vibrant young woman whose promising future was sadly cut short.

The Talented Tenth Peter Lang

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make

physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering

all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

*Educating the Student Body* Southwater

In October 1962, Washington pushed the world to the edge of nuclear war. Here, for the first time, the full story of that historic moment is told from the perspective of the Cuban people, whose determination to defend their sovereignty and their socialist revolution blocked U.S. plans for a military assault and saved humanity from the consequences of a nuclear holocaust.

Santiago, an old Cuban fisherman, has gone 84 days without catching a fish. Confident that his bad luck is at an end, he

sets off alone, far into the Gulf Stream, to fish. Santiago's faith is rewarded, and he quickly hooks a marlin...a marlin so big he is unable to pull it in and finds himself being pulled by the giant fish for two days and two nights. Louis G. Perez revisits Japan's turbulent past and recent events in the past decade and 21st Century in this revised and fully expanded second edition of *The History of Japan*, a must-have for all high school and public libraries. This essential resource provides readers with a comprehensive look at Japan's long and rich history, examining its politics, culture, philosophy, and religious beliefs throughout the ages. Also included are up-to-date discussions of political situations, environmental issues, and even a glimpse into the cultural lives of the Japanese today. Students will learn

who the Japanese are today, and how the past has shaped their contemporary society. An updated timeline, appendices, and glossary, along with an illustrative bibliographical essay that includes both print and electronic sources, round out this valuable reference tool. Roughly the same size as the state of California, the island nation of Japan is one of the world's most densely populated nations-not to mention an economic powerhouse and a mecca of advanced technology. But the Land of the Rising Sun did not always lead the world with its success in the automobile industry, innovative electronics, and powerful stock market. Louis G. Perez revisits Japan's turbulent past and recent events in the past decade and 21st Century in this revised and fully expanded second edition of *The History of Japan*, a must-have for all high school and public libraries. This essential resource provides readers with a comprehensive look at Japan's long and rich history, examining its politics, culture, philosophy, and religious beliefs throughout the ages. *The Animal Mind* Dorling Kindersley Ltd  
Stefan Rhein wählt für dieses Buch einen naheliegend logischen Ansatz: den Blick auf das Jahr 1517, den Blick auf das Jahr der Erneuerung des Glaubens - und beschreibt den Zustand der Stadt, der Bauten, der Institutionen, der Menschen. Die Antwort auf die Frage?Ohne Wittenberg keine Reformation??, nicht leicht, aber eindeutig zu beantworten: auf Seite 106!  
Dr. Stefan Rhein ist Vorstand und Direktor der Stiftung Luthergedenkstätten in Sachsen-Anhalt.

**Modern World History California Edition** McGraw Hill Professional

When I was sixteen I became an Islamic fundamentalist. Five years later, after much emotional turmoil, I rejected

fundamentalist teachings and returned to normal life and my family. I tried to put my experiences behind me, but as the events of 7/7 unfolded it became clear to me that Islamist groups pose a threat to this country that we - Muslims and non-Muslims alike - do not yet understand. Why are young British Muslims becoming extremists? What are the risks of another home-grown terrorist attack on British soil? By describing my experiences inside these groups, the reasons I joined them and how, after leaving I recovered my faith and mind, I hope to explain the appeal of extremist thought, how fanatics penetrate Muslim communities and the truth behind their agenda of subverting the West and moderate Islam. Writing candidly about life after extremism, I illustrate the depth of the problem that now grips Muslim hearts and minds. I will lay bare what politicians and Muslim 'community leaders' do not want you to know. This is the first time an ex-member openly discusses life within radical Islamic organisations. This is my story.  
[The Old Man And The Sea](#) Vintage  
NATIONAL BESTSELLER • A groundbreaking work of science, history,

and archaeology that radically alters our understanding of the Americas before the arrival of Columbus in 1492—from “a remarkably engaging writer” (The New York Times Book Review). Contrary to what so many Americans learn in school, the pre-Columbian Indians were not sparsely settled in a pristine wilderness; rather, there were huge numbers of Indians who actively molded and influenced the land around them. The astonishing Aztec capital of Tenochtitlan had running water and immaculately clean streets, and was larger than any contemporary European city. Mexican cultures created corn in a specialized breeding process that it has been called man’s first feat of genetic engineering. Indeed, Indians were not living lightly on the land but were landscaping and manipulating their world in ways that we are only now beginning to understand. Challenging and surprising, this a transformative new look at a rich and fascinating world we only thought we knew.

[The History of Japan](#) Springer

Clay Christensen's groundbreaking bestselling work in education now updated

and expanded, including a new chapter on Christensen's seminal "Jobs to Be Done" theory applied to education.

"Provocatively titled, *Disrupting Class* is just what America's K-12 education system needs--a well thought-through proposal for using technology to better serve students and bring our schools into the 21st Century. Unlike so many education 'reforms,' this is not small-bore stuff. For that reason alone, it's likely to be resisted by defenders of the status quo, even though it's necessary and right for our kids. We owe it to them to make sure this book isn't merely a terrific read; it must become a blueprint for educational transformation." —Joel Klein, Chancellor of the New York City Department of Education "A brilliant teacher, Christensen brings clarity to a muddled and chaotic world of education." —Jim Collins, bestselling author of *Good to Great* "Just as iTunes revolutionized the music industry, technology has the potential to transform education in America so that every one of the nation's 50 million students receives a high quality education. *Disrupting Class* is a must-read, as it shows us how we can blaze that trail

toward transformation." —Jeb Bush, former Governor of Florida According to recent studies in neuroscience, the way we learn doesn't always match up with the way we are taught. If we hope to stay competitive-academically, economically, and technologically-we need to rethink our understanding of intelligence, reevaluate our educational system, and reinvigorate our commitment to learning. In other words, we need "disruptive innovation." Now, in his long-awaited new book, Clayton M. Christensen and coauthors Michael B. Horn and Curtis W. Johnson take one of the most important issues of our time-education-and apply Christensen's now-famous theories of "disruptive" change using a wide range of real-life examples. Whether you're a school administrator, government official, business leader, parent, teacher, or entrepreneur, you'll discover surprising new ideas, outside-the-box strategies, and straight-A success stories. You'll learn how: Customized learning will help many more students succeed in school Student-centric classrooms will increase the demand for new technology Computers must be disruptively deployed to every

student Disruptive innovation can circumvent roadblocks that have prevented other attempts at school reform We can compete in the global classroom- and get ahead in the global market Filled with fascinating case studies, scientific findings, and unprecedented insights on how innovation must be managed, Disrupting Class will open your eyes to new possibilities, unlock hidden potential, and get you to think differently. Professor Christensen and his coauthors provide a bold new lesson in innovation that will help you make the grade for years to come. The future is now. Class is in session.

**1491 (Second Edition)** Addison-Wesley This Elibron Classics title is a reprint of the original edition published by the

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

**Social Marketing in Action** Bloomsbury Publishing USA

Kagero Nikki, translated here as *The Gossamer Years*, belongs to the same period as the celebrated *Tale of Genji* by Murasaki Shikibu. This remarkably frank autobiographical diary and personal confession attempts to describe a difficult relationship as it reveals two tempestuous decades of the author's unhappy marriage and her growing indignation at rival wives and mistresses. Too impetuous to be

satisfied as a subsidiary wife, this beautiful (and unnamed) noblewoman of the Heian dynasty protests the marriage system of her time in one of Japanese literature's earliest attempts to portray difficult elements of the predominant social hierarchy. A classic work of early Japanese prose, *The Gossamer Years* is an important example of the development of Heian literature, which, at its best, represents an extraordinary flowering of realistic expression, an attempt, unique for its age, to treat the human condition with frankness and honesty. A timeless and intimate glimpse into the culture of ancient Japan, this translation by Edward Seidensticker paints a revealing picture of married life in the Heian period.
